

Propellerheads / Shirley Bassye – History Repeating

2014.okt.31

Ukens Utvalgte

The past cannot be changed, simply because 'done is done'. However, the quality of history-telling can and should. Single-sided, censored, misguiding and cryptic tales, disguised as historical fact are now exposed for what it really is, - with the democratic access to information. Fragments getting clearer, new pieces are discovered and misguiding tales are supplemented with facts. It's transparent now that the 500 years history of the Nordic Union is highly related to Roma3. This UU is therefore mainly some translated summaries to indicate milestones and trends in a 5D 3x3 historical survey. The models are described in UU 2014.sept.12.

There is, however, a much longer history to Roma3, - over 2000 years. Roma3 is not mentioned much in the cold-war history books. Yet, the interest grew while writing the UU theme 'LifeQuality and Empires'. Nevertheless, the 5D 3x3 models provide new points of view on historical events. Here is just a 'taste' of what the following will do to formal history tales: Rome1 fell probably due to global collective shifts in collective UnderConscience Belief (UB) that followed the eruption of the Vesuvius volcano and the elimination of Pompeii. There was a subsequent OverConscience Belief (OB) that split Roma in two and caused an irreversibly 5D shift in humanity's path of development. (Ref UU 2014.april.25)

Furthermore: "Marco Polo was probably far more important to the faith of Roma2 than history indicates. Briefly summarized from the video tells that Marco belonged to a large group of Mediterranean people. They served Kublai Khan for decades as 'observers', 'counselors', 'priests' etc. The Mongols had previously conquered Beijing, the capital of China, in 1213. The Khan got in-depth knowledge about European society, religion, technology, weapons and warfare. The Mongols reaction and rage towards Roma2, after reading 'John's Revelation', can be understandable, - if they were pointed out as the Bad Guys. Eventually, the khan released Marco and his men for a final service, - to escort a Chinese princess to a Persian prince for an arrange marriage. The journey was fatal and Marco was one of the few survivors that arrived Venetia. He was imprisoned, but his tales were written by an inmate."

"The crusades were disreputable. The first ones were arranged by the theocratic regime of Roma2 with roman soldiers. The crusades were later reinforced by European Thrones, since Roma2 was considered a shield against Muslim invasions. The Muslim theocracy conquered Egypt, Jerusalem, Syria and other important regions in the Middle-East. Three crusades were arranged towards the expansion. But the fourth crusade was fatal when Roma2 was attacked instead of the Muslim Egypt. The capital was plundered to ruin. The crusaders did not administer the city and finally left the ruins to the returning theocracy." This is also a major historical 5D shift and a complex 4th degree global Game including Thrones, States and Temples. Tale of the event and following Games are too shadowy and mystified though. It should however, be possible to get a more realistic understanding of humanity's nature with proper use of historical 5D analysis.

"Moscow was a small and underdeveloped region at 1500, mostly due to Mongol-Tatar plundering, taxes and ruling. Kiev was the Russian capital at that time. It is not clear how Moscow became the 3rd Roma, but some milestones are that; Ivan III (the Great) concurred a Mongolian city and relieved Moscow from taxes and terror, - and that he married a princess from Roma2. He probably used the title Tsar/Caesar on occasions. More formally; in 1510, the Russian monk Philotheus (Filofey) declared that: "Two Romas have fallen. The third stands. And there will be no fourth. No one shall replace your Christian Tsardom'." (UU 2014.mai.02) No doubt, this statement is another 5D historical event.

"Even though that monk identified Moscow as the land and not merely the city, the maps show that Moscow was a rather limited area compared to later claims. Moreover, the constitution is without legality since the regimes of neither Roma1 nor Roma2 have ever supported it. It is simply not sufficient to single sided declare independence of Roma2 and take its coat of Arms, 'the double headed eagle'. It might even be plundered by the 'fourth crusade' and acquired by piracy." Not directly related to Norden at the time,

however relevant is that America was (re-)discovered at the time. The settlements and expansion certainly seems to be executed by ex-crusaders as well. It is called Roma4 talked through in UU 2013.juni.14.

“Ivan IV Vasilyevich (the Great) was a crown prince of Moscow at that time. He was appointed as Cesar/tsar of all-Russia and got a role like Julius Caesar of Roma1. There was formed a strong alliance of Throne and Temple. In the beginning, the republican State had a minor role. The Russian Temple declared independence of Roma2 in protest to a settlement in Firenze. Not surprisingly, there were suddenly far more marriage proposals for Ivan, which must have led to countless complex TOL Games (TLM – Two Little Maidens) in the Court of the King. Finally Anastasia Romanova was the chosen one. She became a well reputed tsarina that influenced Ivan’s decisions considerably. However, the Tsardom was highly exposed to external as well as internal powers. The early death of the tsarina was suspicious and Tsar Ivan accused his opponents.” (UU 2013.Mai.24) This was probably a start for an unsound CB development (Conscience Belief) of the Russian Throne.

“There are some other curious relations to Roma3. Less known is the Russian-English relation that Ivan made with Queen Elisabeth I. England wanted a trade-alliance, while Russia wanted a defense-alliance. He was guaranteed asylum in England if his regime should fall. It was not used because Ivan suddenly died of heart-attack. Moreover, the last Romanov tsar-family had a daughter called Anastasia. There were speculations after ww1 if she survived and had rights to the Throne. It is however more likely that the rumors refer to that Moscow should resume the cultural heritage after the original tsarina Anastasia.” Furthermore, knowing the nature of Games, it seems that the ‘conquering’ of the ‘Russian Mongols’ included some unofficial agreements where the peace most certainly had a high price. These 5D events can explain the close relations of Moscow and Beijing today, as well as some happening in-between, like the CdE in Mongolia and Beijing.

“There is probably a ‘Superior-Ego’ state to the development from Roma1 to 3. ‘The Oprichnina’ of Roma3, the secret State police, is a key indicator. Similar was in Roma1 too, called the ‘Praetor Guard’. The term is also related to Roma2, but was considerably improved and advanced. Praetor in Roma2 was the Caesar’s ‘first minister’. Roma2 divided the empire into 4 main regions, each with a praetor. In that way the dividing was a fact and the outcome was like the Game DAC (Divide & Conquer). Some praetors of Roma2 were probably involved in the formation of Roma3 and initiated their strategies and operations. An opposing Tsar or Tsarina would merely be considered some annoying obstacles, - that can be removed. It is said that the tsar died of heart attack during a game of chess after the tsarina’s death. Maybe so, - especially if he also saw the Oprichnina/Praetor real strategies and operations for the future Roma3.”

Finally how the idea Superior-ID became: “The Oprichnina/Praetor is like a definition of psycho-social Games. The Actors and the Games are ulterior and concealed like the very nature of secret services. It is however a problem if the democratic Quality of Life is not respected. It is serious if the organization consider itself as a Superior-Ego and individual as inferior. It is catastrophic, if it also inherited the properties of Ivan’s murky mentality as a collective obsession.” The theory of Superior-Id is talked through in UU 2014.jan.10 and the OD (OverConscience Drive) in UU 2014.aug.22.

Ivan (the terrible) attacked the Baltic region brutally. The nations responded with raids, invasions and blockades. The Polish, Lithuanians, Swedes, Dutch and Germans were together in the resistance. Ivan accused that Novgorod could end up being catholic in a polish/Lithuanian alliance. The claim has no documented validation though. Roma3’s final annexations by Ivan and Oprichnina was terrible and led to the ‘Novgorod massacre’ in 1570. This also terminated the trade-route between the Baltic sea, Kiev and the Black Sea/Roma2.” (UU 2014.mai.02). It seems that control over the Baltic Sea was an obsession. A trade route to the Atlantic Sea via Germany was also frequently terminated with wars at Holstein. It left the Danish castle Kronborg as the only passage regulated with taxes. This UNESCO heritage is also the site for Shakespears ‘Hamlet’ with the infamous quote: «Something is rotten in the state of Denmark”. (UU 2014.mai.09.)

“The three Thrones of Norway, Denmark and Sweden formed a Nordic union (The Calmar union) about the 15th century for mutual collaborations and defense. At that time, Norway included Iceland, Greenland and the Faroe islands. Sweden included Finland. It was confederal and there were never any legal transfer of land to the union. It worked for a century until Moscow converted to Roma3. Sweden, with King Gustav Vasa, opposed the empire. Soon the Danish Throne declared single sided that Norway with Greenland, Iceland and Faroe Island was their provinces. However, that has never been legally recognized. The split of the Nordic union happened at the same time as Ivan’s aggressive annexations and massacres on the continent. Relations of the events are therefor likely. The assumption is strengthened with the fact that the brother of King Frederik II of Denmark, Magnus of Holstein, was appointed by Tsar Ivan as king of Linovia (Estonia). Magnus also got a Russian army of 20,000 to conquer Swedish land that was part of the opposition towards Roma3. He even might have been tempted by the Danish Throne. However, the death of Tsar Ivan caused the abdication and expulsion of Mangnus from the Baltic regions.” (UU 2013.mai.31)

“Moscow, the third Roma, was in shock when Tsar Peter ‘the Great’ moved the regime to St. Petersburg. The relation did not improve with suspicion that Tsar Alexander’s diplomacy might have caused the burning of Moscow in 1812. Moscow wanted the power back and could not wish for more than the fall of the Throne in St. Petersburg. Moscow’s republicans were probably just as annoyed by all the European Thrones. They might have thought something like: “How did the first Roma fall?” With its previous relation to Roma1, there might have been conspiracy discussions about the faith of Julius Caesar and Cleopatra. Nevertheless, Moscow was built on the merits of Ivan ‘the terrible’.” UU 2014.mai.30. It seems like it developed into a UB (UnderConscience Belief) in Imperial 3x3 ego-state.

“In brief, the results of the napoleon wars were basically a grand slaughter of European royalists in the military, - especially those related to the French Throne. There is therefor reason to think that the result might have been the overall goal in that Game. Anyhow, not only Moscow claimed the right to the heritage of Roma (UU 2014.mai.02), but also St. Petersburg, Austria, Germany, Italy and France, - like some Roma3b, 3c, 3d, 1b and 3e. Moreover, the Ottoman Empire was practically a Muslim Roma2b and an aggressive rival to them all. Notably is Napoleon’s bodyguard Roustam Raza, alias Idzhahia, of particular interest. He was originally an Armenian, kidnapped as a child, sold as a slave to the ottomans and a gift to Napoleon from the sheik of Cairo. He protected Napoleon from a local plague outbreak in Egypt and became a close and trusted person.” Besides Peter the Great had a close relation to Holland which in their turn managed fleets in several Baltic sea-battles between Sweden and Denmark. The Tsarina Catherine is also called ‘the Great’ for several reasons. Most of all, she proved that women can be successful rulers like the English Elisabeth I, - even in the highly patriarchal Roma3.

“Norden was considerably involved in the napoleon wars, even though it is not mentioned in the TV series ‘Napoleon (2002)’ or elsewhere. The consequences for Denmark were fatal when they tried to stay neutral till the end. They previously lost the old relation to Danzig (today’s Gdansk) when Napoleon ‘liberated’ it. However, most notably was the French-Russian diplomatic relation and their demand to choose a side ‘for us or against us’. England reacted when Denmark had to choose France, because of hostile relations to Germany and Holstein. The English feared that the Danish fleet was going to be used by Napoleon in an invasion of Ireland and then attack England from behind (like a millennium before). The English fleet bombed the capital Copenhagen and captured the naval fleet in 1807. That was the beginning of Denmark’s fall and Norway’s rise. Sweden, that somehow opposed Russia and allied with France, landed anyhow on the victorious side.” UU 2014.mai.16.

“Nevertheless, the war was not settled yet. Russia took Finland from Sweden and Russia was considered a victim since Moscow was burned to the ground in 1812. Norway was considered a suitable compensation as a spoil of wars. However, Norway made its own sovereign constitution with English and German support and was recognized in Kiel. Norway was liberated and avoided submission of Russia or Sweden. The treaty was signed by Denmark, England and Sweden at the congress of Vienna in 1814. However, Denmark got the Throne and Sweden the Foreign policies. Even with that, whatever futile and pathetic, - Napoleon returned in 1815 to undo the losses, but merely met his ‘Waterloo’.” UU 2014.mai.16. That rises some images of ‘jack in the box’. In social-psychological sense, Napoleon was probably not very influential but rather highly

influenced. In relation to Game theories, it is obvious that there was a global 4th degree CdE Game going on. It might even be a sub-sequence of the lost rivalries in US which constituted half a century earlier. UU 2013.juni.14.

“50 years later, Denmark was again lured into a futile war. DR (Danish Radio/TV) has recently made a big TV drama about the Schleswig-Holstein war with Germany in 1864. Earlier, Denmark had the three German principals Slesvig, Holstein and Lauenborg. The Prussian minister-president Bismarck ruled the region according to international treaties in London. However, in 1863, Denmark re-claimed Schleswig-Holstein. In fact, that was a violation of international law and declaration of war. Denmark expected support from England, which indicates some major diplomatic deceptions. It certainly looks like another 4th degree Game of LYAHF (Let's You and Him Fight) like during the Napoleon/Russian War-Games exactly half a century earlier.” UU 2014.mai.23

“The Games in the Winter Palace, this ‘Doll’s House’, is talked through in UU 2013.mai.17 with some Nordic variations: “Another Game can be DAC (Divide and Conquer). The Game is closely related to LYAHF (Lets You and Him Fight), but DAC has one winner and two losers. The Game is rather related to organizations and nations though. Rasputin played DAC, as a marionette for others. Another kind of Game is arc-Nordic and can be named DSITDEN (Du Skal Ikke Tro Du Er Noe (You Should Not Think You’re Someone) – or namely; ‘Jante’). It is a collective Game of ‘All against One’. One honest motive can be to get harmony, but the Game can certainly be abused and has therefor 3 degrees of outcome. Collective genocide can be a fatal one. It seems like the Game Jante is spread from Roma3 to Norden throughout the centuries.” UU 2014.mai.30. However, most relevant is probably (the new self-defined) 4th degree Game called CdE (Coup d’ Etat) is mentioned several times like in UU 2014.sept.12 and UU 2014.aug.29. It will certainly be taken up in the following UUs.

The Danish princess Dagmar from Holstein was married into the Russian Throne in the Winter Palace, presumably as a compensation to the Danish losses in Russian war Games. As the last and surviving tsarina, her history is important to understand Norden in a 5D 3x3 view: “Dagmar’s journeys were mainly to Crimea, Kiev, England and Denmark. Her favorite sister that was named Alexandra too (like her despised daughter in law from Germany). Her sister was married with Albert Edward of Wales that became King Edward VII. The ‘mysterious’ reason for believing that England would join the Schleswig-Holstein war against Germany in 1864, can be due to some fatal and faulty LYAHF Games with the Danish and Russian Thrones at stake. (It is a similar illusion exactly 50 years later when it was believed that England would be involved and try to save Tsar family in 1914). The two Danish princess-sisters have probably always played Games together as Child and Adult in the English, Russian and Danish houses. This again provides associations to the first tsar Ivan and his chaotic ‘Court’ (see UU 2013.Mai.24).” It still seems to be a relevant for understanding Roma3 of today. Actually, it goes for all the ‘Doll’s Houses’ Games of Thrones, Temples and States of any Roma.

EW2 (European part of ww2) has been talked through in several UU. Two infamous characters are highly relevant for 5D 3x3 analysis. Their collective archetypes are fundamental to social-psychological understand how Games of ww can happen. Likewise, it is important to note that the cold war history tales are not quite reliable as sources for historical facts. History writing is a spoil of wars. They are mentioned in several UU and summarized in UU 2013.juni.28:

“The Man of Steel / Stalin, alias Ioseb Besarionis je Jūgāšvili, was originally a local mafia boss in Caucasus that advanced to the chief of operations to the Bolsheviks. They financed the organization with bank robberies, kidnapping, extortions and murders. He was imprisoned and sent to Siberia seven times but was always set free. He had no military background and did not serve in ww1. The need for better reputations was arranged by starting the newspaper Pravda (Truth). Next he took the nickname Stalin (Man of Steel) to propagate himself and his organization. Lenin said that Stalin was the right person to operate Soviet and posted him as general secretary. Soon Lenin got stroke and had to resign. Stalin continued Lenin’s merits with 10 times the execution of own citizens. Stalin simply made Moscow a mafia empire. Nevertheless, Stalin is now a ‘patriarch of mass-psychopathy’.” UU 2014.juni.06. These genocides of tens of millions of

their own citizens were presumably simply to ensure loyalty to the new State regime instead of the previous Throne regime as part of the CdE Game. Brute logic might be that killing and brutalizing is most effective. However terminating the previous elite is like lobotomizing oneself as a society. The retardation and traumas take centuries to psycho-socially heal, - if ever possible at all.

“The other figure (was) Hister/Hitler, alias Adolf Schicklgruber. He moved from Austria to Germany and became the leader of the Nation Socialist Party. Adolf got governmental power due to an electoral alliance with the Stalinists. The Parliament was burned to the ground and Hitler was promoted to dictator soon after the electoral victory. There are reasons to consider this strong the Nazi-Stalin alliance as an important part of the WW Game, - from start to end. Hitler seems to be Stalin’s ‘Mini-Me’, a Stalinist marionette in the rival’s board. In this view, he was an effective replacement for the founder of the Red Army, - Trotsky. The reason that SU stopped to criticize Nazism and fascism publically, was the belief that they would attack and destroy each other, and that Hitler (and Mussolini) merely were triggers to the processes. That would open for a following Soviet invasion of Europe.” It should leave no doubt that world wars was a cascade of CdE Games gone out of control and with humanities worst outcomes till now.

“The Cold War (ww3) was mostly about the empire’s political rivalries. The United Nations, and all its nations’ parliaments, were official arenas for the rivalries. Unofficially, secret services were organized in political parties, public and private undertakings, and by criminal organizations. A Danish terrorist cell of RAF (Red Army Faction) was finally discovered and called Blekingegadebanden (‘The Blekinge street gang’) (UU 2013.aug.16). They and their clones in Germany, Italy and Spain were extremely greedy, violent and social-psychopathic. They copied Stalin’s actions prior to his carrier. The Danish leader Gotfred Apple converted from Stalinism to Maoism in the 60’s and this meta-organization has certainly influence Denmark with maoistic secret services for half a century. It seems rather clear that the strange outcomes in Danish politics; for example the Chinese behavior at the environmental conference, that China got precedence before Europe in the Artic council, and the political acceptance of extreme social dumping in possible mining at Greenland.” UU 2013.des.06. It is getting more transparent now that such terror-cells were concealed, but closely related, to the secret services of cold-war empires’, - namely SU & US – Roma3 & Roma4. Furthermore, the western Nordic nation joined the NATO with US and all rejected SU in fear.

Using the 5D 3x3 on historical tales can lead to rather unorthodox explanations and conclusions. As mentioned in the introduction of this UU, the geographical and mental shift of Roma1 to Roma2 would probably not happen at that time without the apocalyptic natural disaster of a volcano. A split, a power-shift and all the consequences might have happened in another 5D and led to a rather different history and situation than today. There have probably been lots of other historical 5D event throughout history that might have caused quite different 5D outcomes than our collective history Belief tells. Anyways, - using 5D on the previous century led to a re-discovery of a major natural ‘apocalyptic’ event just prior to ww1, - namely the Tunguska event. It happened during the Roma3 war against China in 1908. No one could rationally explain this explosion that was 1000 times the Hiroshima bomb which could be noticed globally. The war against the Mongol-Tatar failed, the Russians retreated and major changes were to happen in the Winter Palace of Roma3. (Ref UU 2013.juni.21.)

Looking a century back and a century forward with 3x3 5D view, this extract sums up a major concern: “A hypothesis is then that the apocalyptic ew/ww started 200 years too early according to Egyptian astrology. A benefit of this mistake is that this upcoming New Age Game is already exposed so there is now time to prevent the real Game in the next century. Basically, there are 2 main factors that can prevent social-psychological Games. One is to discover the motives and moves. The next is to remove the motivation by removing the Goal/Spoils. To remove the Spoils is to make a ‘Game Over’ by letting this current Age/Era of the Pisces end as it astrologically will do around 2150. Next, there is need to persuade the collective OverConscience Belief (OB) that there is no need to start a new round of Ennead based Age/Era for the Aquarius. The fundament for that Belief is simply an astrological 2D illusion Belief about stars and planets. This misunderstanding is hyped with mass-psychotic soap-opera scripts based on Egyptian stone-age theocracy and concealed Osiris apocalyptic cults. Such false prophets should be de-

cloaked and hindered discretely and not given the chance to stir up more apocalyptic intrigues." UU 2014.jan.03

Anyways and finally about the 500 years old Nordic Union. The Nordic council is actually somehow like a Nordic union. It is however far from what it could be and should be. In 5D 3x3 relation, it is clearly a result of centuries of 4th degree DAC Games. A summary from UU 2013.mai.31 says: «The cold war is also called 'a balance of terror' between SU and US. Norden however, was not in balance, but terrorized mainly by Roma3. Today, one can still see that Norden is organizationally bound to Kaliningrad, Leningrad and Murmansk. These 3 cities are like a 'Baltic Cuba', KGB/FSB headquarter, and the Arctic nuclear test-site. Furthermore, there are direct ferry lines between Kaliningrad-Gdansk-Copenhagen-Oslo. Sweden and Finland have probably similar lines. Direct influence is shown by the increasing terror-flights towards the Nordic nations with Russian bombers made for nukes. It is done to recall memories of SU terror bombing of Bornholm in ww2, and the plans to make Copenhagen/Sjælland (Selandia) an 'East-Denmark', like East-Germany and East-Europe. This (OB) fear influences effectively the agenda and decisions in the Nordic Council of Ministers. Therefore, it is time to start rotating the housing of the Council, - like EU does. Consequently, Norden might finally come out of the Cold War freeze."»

'History Repeating' is chosen mainly because of its lyrics. However, Shirley Bassey's vocal is remarkably strong and suits well such 'James Bond' music. In this UU sense, with a 500 years' summary of Norden, it seems rather clear that the history is actually repeating over and over again. However, we could be better prepared for this next round.

Propellerheads was a British big beat musical ensemble, formed in 1995 and made up of electronic producers Will White and Alex Gifford. The term propellerhead is slang for a nerd they thought it would be the perfect name for their band. They previously worked with the James Bond composer David Arnold on the Bond tribute album Shaken and Stirred. The track 'History Repeating' is a fusion of several different styles of big beat, breakbeat and jazz combined with the powerful vocals of Shirley Bassey.
