

DeVo 2.0 - Freedom Of Choice

2014.nov.14

Ukens Utvalgte

'Democracy Threatens' is the second part of the documentary 'Putin, Russia and The West'. Still, the 5D political model does not include democracy, which makes the LQ (LifeQuality) definition an important addition. Basically, LQ is based on Human Needs and Rights. Quite alarming is that the documentary then might as well be called 'LifeQuality Threatens Neo-Russia'. It seems to revert to the former SU (Soviet Union) – like a SU 2.0 - like a childlike empire in social-psychological sense. This UU therefore present a talk-through on such views on its 5D political shift of this century.

Wikipedia is brief about the documentary and writes: "This episode focuses on the 2004 Ukrainian presidential election, the subsequent Orange Revolution, and Russia's involvement in it." The 1 hour documentary reveals several important aspects of today's 'Putin, Russia and Ukraine'. As we now very well know, this has become a major concern globally and can set humanity back to a cold war of ulterior political Games. Most alarming, - they certainly know what they are doing, the risk they expose on their neighbors and the possible fatal outcomes. These 5D events seem to be repeating symptoms of history and are in fact intentional. However, the 'Game board' has changed considerably and the outcomes cannot be predicted as before.

Here are some personal summaries about 'Democracy Threatens', followed by some comments:

- Putin initiated several campaigns against certain enemies. The old case about the UK 'spy rock' was re-publicized as scandalous news. The reports did not tell anything about what the electronic content do, - and quite frankly, it seems silly that the MI6 would label such a secret device with something like 'made in UK'. The problem with such claims is that no secret service can diplomatically or legally deny or confirm it. Nevertheless, the public campaign was domestically effective to justify the anti-democratic law and get support for the upcoming democratic election.
- Putin claimed that Islamists, Arabs and "you name it" were establishing in Georgia 3 years after Russia conquered Chechnya. That argument of preventive self-defense was supposed to legitimize an attack. Georgia had become an ineffective and corrupt post-SU state and could not deal with it. US had a relation Georgia, offered to help military and was accepted. The following pro-democratic protests and demanded the President removed. SU accepted an election, but demanded to keep the president. Still, a new president was elected. The following overstated use of US and EU flags and anthems alarmed both US and SU. It was obviously a deliberate provocation towards SU.
- US wanted Ukraine in NATO, but SU rejected since it is important for their oil-pipelines and marine base. The 'Orange' democratic movement became increasingly popular due to the discontent with the SU puppet president and the bureaucratic corruption. SU supported a new puppet president and made several hinders to the Orange campaigns. The Orange campaign manager was called to a meeting with secret service officers that were close to Putin, but he would not cooperate.
- The Orange leader Viktor was seriously poisoned with dioxin that would normally put him out of the campaign. However, the democracy responded in sympathy and extra votes. The puppet president won despite several disputed happenings. However, the Supreme Court had to investigate the election, when both sides accused the opposite for swindle. The Orange won the new and monitored election.
- The 'Democracy Threats' in Georgia and Ukraine turned Russia more dictatorial. The voting rules were changed to secure State's position and power. A former FSB agent in England was poisoned by radioactivity and died. Consequently, MI6 stopped working with SU secret services.
- 'Nashi' (Наши) was a youth organization where Putin and Medvedev got personally involved in political and moral talks about national and social patriotism. It was soon called "Youth Democratic Anti-Fascist Movement" and "Ours!" Nashi declared itself to be a democratic, anti-fascist, and anti-'oligarchic-

capitalist' movement. It was also encouraged by senior figures in the Russian Presidential administration. There was also issued a new law forbidding foreign support to international NGO's for human rights.

- By late 2007, Nashi had grown to 120,000 members aged 17 to 25. Some Nashi fractions started harassment actions towards business men on their way to work. Other more hardcore violent organizations found legitimated support to terrorize and even murder opponents.

Democracy is fundamental for anyone's LifeQuality (LQ). As defined in UU 2014.okt.17, LQ is based on Human Needs and Rights. Basically the needs relate to; Physical, Safety, Social, Respect and Self-realization. The Rights relate to; private properties, self-determination, security, privacy, family, work, education, freedoms of thought, conscience, religion, expression and more. Democratic individual power to self-realize is vital for the LQ of society as well. No central power can possibly understand and influence human individuals optimal. This is also the reason why public services need constantly innovation. (See UU 2014.okt.24.)

Anti-democratism is simply based on faulty childlike illusions and obsessions like narcissism, oedipus/electra complexes, psychosis, mania, phobia, etc. All in all, in Freudian sense, the reason for the mental disorder is dominating (external) S-E (3x3 Belief) forcing an inferior Ego (3x3 Will). (See UU 2014.juli.18.) This psycho-sociological theory can be extended to organizations, nations and empires as well. It explains why LQ based democracy is vital for the quality of any society and why anti-democracy cause decay and degeneration. Neo-Russia, SU 2.0, shows increasingly symptoms of such a 'devolution'. Roma3/Moscow seems to re-establish the anti-democratic natures of its ancestors Roma2 and Roma1 with anti-democracy as a prioritized political power.

Little is known of what became of organized crime of today's Roma3. It is legitimate to ask: How did the neo-Oprichnina handle the other oligarchs and what do they do today? As mentioned in UU 2013.april.26, most typical organized international crimes are about money laundry, trafficking, and drugs. Weapons and war could be included to that list. There are serious indications that some actors moved to Cyprus and have been influential in the growth of the 'Arabic spring', - the cascading Games of CdE in the Middle East and North Africa. Syria is indeed involved with such war-crimes with extended use of Russian weapons. In the end, - conflicts in oil-producing regions cause increased income for the competitors, - including Russia.

The documentary tells how the secret and public services of Roma3 treated former puppet states like Georgia and Ukraine. Controlling the puppet heads of states seems to be an overall goal at all cost. The means and methods seemed unlimited, which includes extortion, bully elections, fixed ballots, manipulations, terror and even murder. All in all, these actions have written Oprichnina/FSB all over. There are good reasons to professionally re-evaluate the political national security for all the European nations, especially the Nordic ones. Take a look at the English version of Pravda at the internet and compare the arguments with the domestic political parties' arguments. Some stand out clear as puppet politicians and puppet parties. Relevant political issues are particularly influencing European free trade, security, money, energy, defense, civil rights, environment, public income and spending, migration, etc.

Last week, there was the 25 anniversary for the fall of the Berlin Wall. It was a major 5D political turn, caused by Glasnost (openness) and Perestroika (restructuring). Most of all, it was the final fall of STASI, the Ministry for State Security, in the annexed East Germany. STASI had over 91,000 employees, 15,000 military and 173,000 informants/spies – about 2.5% of the population. Anyhow the statistics, 2% infiltration is an indication and a 'thumb-rule' that probably goes for the Nordic countries too. The STASI faction gives an indication of how the original Oprichnina has developed the past 500 years. It also gives an indication on how Praetor/Oprichnina has developed and become after 2000 years. However, it is not a main issue in this

UU yet. Meanwhile, related are; UU 2014.mai.02 about the original Oprichnina, UU 2014.juli.04 about Selmer the Norwegian forced teenager spy and the stalinazism, UU 2014.juli.25 about the nature of a 'dystopian Thralltopia' and UU 2014.juni.13 about the modern RAF (Red Army Factions).

Putin served for 16 years in East Germany and was trained as a professional agent during the fall and dissolvent of STASI. It makes Oprichnina/STASI most important to understand what Games are to come. That single battle over STASI in the US-SU cold war Game of secret services ended 1-0. It was a temporary victory and retributions are yet to see. Putin witnessed and sensed how the once so respected organization fell in humble misery, - leaving traumatized exposures at the battle-field. He saw how the exposures to public enlighten harmed millions of KGB/Oprichnina agents, - and how the ulterior anti-LQ empire crumbled and dissolved. Yet, the opened archives have not been opened to the concerned public at all, - just 'some distracting bones to chew on'. The archives are most probably digitalized, moved and converted for use in this century's cyber-wars with new alliances and new victims. This is far from settled with some symbolic fall of a wall. It takes generations for such major Game-shifts. Meanwhile, - it is all re-arranged for the next global psycho-social Games at empire level.

Public profiles on Putin that reveals his personality, are scarce. However, some is public like that; his family was poor in Leningrad, his father served in the navy and his mother even cooked for Lenin. Somehow, Vladimir Putin won a car and used it personally despite his family's needs. In some way he also managed well in the hard criminal gangs of Leningrad. There is a Russian proverb saying "Beat your own and others will fear you". Actually, it seems that an east-bloc underworld Game 'BYOOWFY' of 3rd and 4th degree is identified. It seems to be legitimated in Roma3. Still, Putin doesn't seem to do the beating himself, but rather have someone else to do it, - like murky oligarches, street gangs, 'jugend', police, para-military or other ulterior secret services. That is simply the Game of LYAHF. The Game is however originally feminine and related to the rivalling tsarinas of the Winter Palace. (See UU 2014.mai.30.)

Putin is simply the greatest puppet president of them all. It is obvious, since the main objective of foreign policy is to control their 'head of state'. Then it must certainly be most important to control its own head of State. Since Roma3, neo-Russia, is run by secret services, the understanding of the ulterior Games is necessary. Some social-psychological Games are talked through in UU 2014.sept.12. "Classic and new Games in the new CdE category can be; LYAHF (Let's You and Him Fight), BGGG (Bad Guy – Good Guy), TOL/TLM ('Tuppen & Lillemor' i.e. 'Two Little Maids'), DAC & UAC (Devide&Conquer & Unite&Conquer), OBD (Offense is the Best Defense), ISR (It Started with the Retribution), EDAB (One's Death Another's Bread) and RPPP (Robbing Pete to Pay Paul)." In general, ending destructive Games can simply be done by uncovering the Games and the Players – and/or making the Spoils hopelessly unachievable.

Nashi, the Putinized youth organization, turned unacceptable. Wikipedia says: "In 2012, the leader of Nashi announced that the movement would be dissolving in the near future, possibly to be replaced by a different organization. He stated that the movement had been 'compromised' during the recent presidential election. In 2008, the movement was divided into groups: Nashi-2.0, Steel, All Houses, Nasha Victory and other. Critics have compared it to the Soviet Komsomol or the Hitler Youth and dubbed as Putin jugend." In a Nordic view, it is remarkable that Nashi flag is like a diagonal Danish one and the neo-Russian flag is like a diagonal Norwegian one.

Although still emotional controversial, it is now legitimate to relate Nashi to Nordic political youth organizations, - and AUF in particular. No doubt that AUF is strongly related to 'heads of state', the major political party, the labor organization (LO) and public sector. AUF, like Nashi, do also harassments to opponents, 'oligarchs' and democratic citizens (plebs, 'borgere', bourgeois) in particular. However, AUF have been open to let other ethnic groups to power, - which is rather controversial under the surface in their related organizations.

This comparison might be political and emotional provocative, since it is about hardcore 4th degree Games of a new and near relation. Nevertheless, this is deliberately done as a clear warning: Do not open such a political 5D path. There seems to be some alarming similarities to some ABB personal profiles. UU 18.mai.2012 to UU 20.Juli.2012 followed the 22/7 trial about the CdE bomb and AUF massacre. During the trial, there were 2 contradicting psychiatric evaluation of his personality that caused serious distrust to the legal psychiatric system. The second psychiatric evaluation diagnosed ABB as not schizophrenic, delusional or psychotic, but rather with antisocial and narcissistic personality disorder, possibly Asperger and Tourette syndrome and some possibly paranoid psychosis. His lack of emotion, monotonous voice, 'stone-face' and peculiar smile was considered deliberate responses to his environment, indicating ulteriority, dishonesty, - or briefly, - a Game player. Furthermore, some psychiatrists seem political motivated Game players. See also the talk through of the 'Thomas Quick case' in UU 2014.juli.18.

As questioned in UU 2014.okt.17: "What organizations can and will see through such a massive operation, with unhindered executions, leaving too few trials and overruling a national legal systems? 'Follow the money' - and follow the footprints. ABB appears like a 'pro-Russian separatist'-wannabe." Actually, - seeing how it works in Ukraine, - he appears to be a well-trained pro-Russian separatist. Some memory refreshments should be in place: He had conflicts with the national authorities, joined violent street gangs, was unfit for military training but joined paramilitary training camps in Eastern Europe. Held several secret meetings with Underworld Game players. Got illegal supplies unnoticed despite monitoring systems. Most important, the bomber has never been identified and it is unlikely that a single person was all alone about both the bombing and the massacre.

Comparing ABB with pro-Russian stated values, ideology and myths leaves few doubts where it stems from. If still in doubt, take a look at English version of Pravda on internet once more. Finally, ABB's obsessions of some knights Templar could stem from the 4th crusade that plundered Roma2 before the Muslim invasion and constitution of Roma3 in Moscow. (See UU 2014.okt.31.) There are most probably many such sleeping cells, neo-RAF, in all 'western' nations. (See UU 2014.juni.13.) More about that in the next chapter of the documentary.

Devo 2.0 was created for Walt Disney Records with help from the original Devo. Child actors sang, danced and mimed playing along to songs. Some were actually credible musicians though. The lyrics were edited to make them more 'family friendly' – Disney-style. The editing removed much of the insinuation and irony typical of the Devo songs. In 'Freedom of Choice', the line "Freedom from choice is what you want" was changed to "Freedom of choice is what you want", and the line "he went in circles/till he dropped dead" became "he went in circles/till he dropped down".

The original band DEVO and 'Gates of Steel' was selected in UU 2013.okt.11 to the talk through about SU Stalinism. The band was originally formed as a practical joke by some art students. The name DEVO is short for De-evolution and indicates that human development has become reversed. They did not imagine being a band before they got support from David Bowie, Warner Brothers and Brian Eno. The main message in the song 'Gates of Steel' is that humans are humans and constructions are constructions, - even though the real life 'Devo' called himself 'man of steel' or Stalin. Now, with Devo 2.0, the new puppet president appears like some teenage ulterior Game player with 4th degree consequences in a 5D political model.
