

Pet Shop Boys - Go West (2)

2014.nov.28

Ukens Utvalgte

This last episode of the BBC documentary 'Putin, Russia and The West' has the optimistic title 'New Start'. Since then, the realities of repeating history have hit hard. The previous episode 'War' seems rather to be the real 5D turn. However, there was a positive and optimistic period with Medvedev as President which was rather differing to Putin's. This UU will talk through the episode to investigate the development in relation to Games and the 5D and 3x3 models.

Wikipedia sum up "New Start" like this: "After Barack Obama was elected President of the United States in November 2008, the Russian president Dmitri Medvedev attempted to improve Russia–United States relations." The rest of this UU will provide some elaborations to the content, - followed by some comments and analysis. There will be special focus on 3x3, 5D and Game theories:

- US and SU got new presidents. There was a completely new setting after the Bush/Putin reign. Medvedev's first move was however to continue the previous attitude and threatened US because of nukes in Poland. Obama said he wanted a world without nukes and stopped the rockets plans in Europe. Obama invited himself to SU and Medvedev accepted. They had open talks. Putin appeared alienated and said he do not like to be set aside. Obama decided to deal with only Medvedev in the future. Two notable relations are that Putin do not speak English while Medvedev is skilled, and that Putin had a secret deal with Medvedev to run together for one period only, which made time to change the election law.
- The new deals for arms control and inspectors had bureaucratic difficulties despite the understandings between Obama and Medvedev. Putin changed things and hindered some issues. The deadline passed and ended with no right to inspect nukes. However, during the environment summit in Copenhagen in 2009, Obama and Medvedev had discussions on nukes that went well. The new presidents' diplomacies finally paid off despite the obstacles.
- Oil prices fell and hit Russian economy hard, but Putin said that structural change is impossible. It proved that the previous SU success was mostly due to increased oil income and not the governance. Businesses collapsed and Putin threatened factory owners while there were civil distress. Medvedev disagreed and wanted Russia to be a dynamic high tech civilization, which requires democracy and equality to the law. A HR lawyer and a NGO journalist was shot by nationalistic skinheads, - like some other 3 years earlier. Putin said their work was insignificant while Medvedev gave them sincere condolences.
- US informed SU about a new secret Iran nuke facility and wanted SU to cancel a billion dollar arms deal with Iran. Medvedev wanted SU in WTO to escalate businesses. He was invited to US in return to consider potential business prospects. Medvedev, who is a 'computer geek', wanted to make his own Silicon Valley project and visited Washington and many IT enterprises in Silicon Valley. (There were obstacles, but the Russian Federation has been a member of WTO since 2012.)
- 1000 Russians went to US to fulfill their dreams. Several became secret agents for SU in US. US did not want a scandal before Medvedev's visit. Soon after the visit, some SU spies were revealed and expelled. However, some were treated like heroes in SU, assumingly due to SU Secret Services.
- A new presidential election campaign started in SU. Now they were not the dynamic duo anymore, but hard rivals. Putin was more popular and appealed with nationalistic symbol, posing and statements. Medvedev could not match the media-shows, but got popular by firing some corrupt bureaucrats under PM Putin. In return the imprisoned oil oligarch was put in new rounds in court, supported with Putin public allegations. He got 7 more years in prison that proved that Medvedev cannot provide HR/democratic rule of law. He lost votes, withdraw and asked his supporters to vote for Putin. They swapped roles back again.

Putin has newly stated that he will not be president for life, which is more alarming than comforting since it can mean '10-20 more year'. Recent history shows that rule by democracy law has been seriously undermined and wars have escalated during that reign. Furthermore, the warning against 'colored revolutions' is a warning against east-European democratic contra-revolutions as opposition to SU2 as well as SU1. Europe and US has now become very careful around the neo-SU, - not knowing what is up in all the cloaked sleeves. Germany's Merkel has expressed that "he is not in touch with reality" and 'Glasnost' Gorbatsjov has expressed that "in Putin's head, there is only God above him".

The differences and rivalries between the democratic elected Medvedev and the FSB installed agent Putin becomes transparent with the BBC documentary and recent information. They seem to represent differences like; democracy/bureaucracy, extravert/introvert, glasnost/secretcy, reforms/traditions, innovation/stagnation and Human Rights/State's Rights. The opposites might indicate the cracks that seem to tear this temporary neo-SU apart. Anyhow, it seems rather clear that neither president Medvedev nor Putin have ever been in real control, - even though the public media indicates so. There are far more actors and organizations that play their parts behind the scenes.

However, the two presidents seem to be set up in traditional Russian psycho-sociological Games. The original CdE Game started when the crown-prince Ivan of Moscow was selected as the coming tsar of Roma3. That was just after Roma2 was plundered by 'The Pirates of the fourth Crusade' and handed over its coat of Arms, 'the double headed eagle' to Moscow (UU 2013.Mai.24). This CdE Game is of 4th degree (war) and have lasted for half a millennium. It involves all of the three meta-organizations Throne/State/Temple that are related to individuals' 3x3 ego-states Drive/Will/Belief. Consequently, even though it appears simpler to focus on representative individuals, the organizational psycho-sociological Games are far from manageable. Actually, it is too complex for any individual or organization to understand and handle. Anyways, the following will be very simplified to indicate points to a 4D analysis for 5D suggestions.

All the complex sub-Games are related to one single meta-Game called CdE (Coup d' Etat). It seems that history somehow repeats on the 100 years anniversary of 1914 and the most fatal CdE of them all in the Winter Palace. The overall CdE Game's motive is that Oprichnina, the collective of Praetors, wants to regain autocracy as under the puppet head-of-state Stalin, - like Ivan before him. Now there is the puppet president Putin that is raised in its system. However, its main rival is not 'western' organizations, but internal democratic organizations, and the feared internal PRO, PRS and RAF-rus (Pro-Russian Olicrates & Separatist, and Red Army Faction) that can cause a so-called 'colored revolution', that simply is a rematch of the counter-revolution of Glasnost. The complexity of the CdE sub-Games shows indications of all mentioned in UU 2014.sept.12: LYAHF (Let's You and Him Fight), BGGG (Bad Guy – Good Guy), TLM/(TOL) ('Two Little Maids' / ('Tuppen og Lillemor'), DAC & UAC (Devide&Conquer & Unite&Conquer), OBD (Offense is the Best Defense), ISR (It Started with the Retribution), EDAB (One's Death Another's Bread) and RPPP (Robbing Pete to Pay Paul). However, the traditional Games at personal level seem also to be played, like: YDYB (Why Don't You, Yes But), IFWY (If It Weren't For You), WAHM (Why does this Always Happen to Me?), SWYMD (See What You Made Me Do), UGMIT (You Got Me Into This), LHIT (Look How Hard I've Tried), ITHY (I'm Only Trying to Help You), LPAFJ (Let's Pull A Fast one on Joey), NIGYSOB (Now I've Got You, You Son of a Bitch), RAPO, 'Psychiatry' and 'Courtroom'."

Most obvious Games at play are: BGGG, where US/EU or KGB/FSB is labelled Bad. TLM is about two girls' rivalries over a playground (like the tsarinas Dagmar & Alexandra in the Palaces before ww1). TLM often leads to 'sexual driven' rivalry Games of LYAHF that usually have fatal outcomes. The obvious relations of Games between individuals and organizations is not that simple to explain. However, since certain organizations are dominated by certain ego-states, some stereotyped relations are that; organizations of

Thrones will tend to play by 3x3 Drive, - Stat organizations will tend to play by 3x3 Will, - and Temple organizations will tend to play by 3x3 Belief. However note that organizations are not that stereotyped in reality as in theory, - like there might be families ruling certain States organization, Temple can be dominated by State (like the Nordic State-churches) and Thrones can have puppet kings and really is run by its bureaucratic court, - or eliminated as organization and substituted by powerful aristocratic families. (More detailed description about 3x3 and Games is in UU 2014.sept.12.)

Nevertheless the theory, - history seems to be that Obama's invitation of president Medvedev to US was a major diplomatic success for a new SU-US relation, - in a democratic sense. However, no matter the intentions for the US Tour, there had to be some follow up in SU. This is Oprichnina's playground. Putin is formed by and destined to the Secret Services which has Oprichnina as its organizational archetype and patriarch/matriarch. It stems from the collective of Praetors of Roma2 and acts like a substitute to any head of state (Caesar/Tsar). The main properties of the secret state-police are ulterior Games that can overrule democratic ethics, laws and morals. Therefore, the Gimmicks (rules of the Game) of the Secret Services are timely quite opposite of the civilized diplomatic ones. It was most certainly triggered when SU spies were publically revealed and expelled from US after Medvedev's good-will visit. Some were publically received in SU as heroes. Medvedev's counterparts were probably promoters of that dividing gesture.

However, there were far more serious long term massive aftermaths. Although not apparently directly related, there are events and results that highly indicate so. Soon after Medvedev's good-will tour, there were massive exposes of so-called 'whistle blowers'. Some of the most focused ones are: Bradley Manning who was convicted of violating the US Espionage Act that sentenced to 35 years in US prison. The Australian publisher and journalist Julian Assange, the editor-in-chief of the website WikiLeaks, which he co-founded after an earlier career in hacking and programming. Edward Snowden, a former system administrator for the CIA and a counterintelligence trainer at DIA that leaked masses of classified information from the NSA. Snowden is recently granted 3 years refuge in Russia and is offered Russian citizenship. Actually, it seems that he has been with SU all along and a citizenship will certainly label him with a history as another double-agent. Anyways, even with the massive information about the global cyber wars, - the public knowledge is obviously merely from scenes at the stage.

The Mitrokhin archives were mentioned in the previous UU 2014.nov.21. Still, like with the re-cloaking of the STASI archives, not much is revealed, except that there certainly is much more to reveal, - somewhere. A brief summary from Wikipedia say: "Notes in the Mitrokhin Archive claim that more than half of the SU weapons are based on US designs, that the KGB tapped Henry Kissinger's telephone when he was US Secretary of State, and had spies in place in almost all US defense contractor facilities. In France, some 35 senior politicians were alleged to have worked for the KGB during the Cold War. In West Germany, the KGB was said to have infiltrated the major political parties, the judiciary, and the police. Large-scale sabotage preparations were supposedly made against the US, Canada and elsewhere in case of war, including hidden weapons caches; several have been removed or destroyed by police per Mitrokhin's information. The book describes establishing the "Moscow Patriarchate" on order from Stalin in 1943 as a front organization for the NKVD, and later, for the KGB (and assumingly today's FSB). All key positions in the Church, including bishops, were approved by the Ideological Department of CPSU and by the KGB." One can only conclude that RAF in US and Canada exist. Actually, which nation hasn't one?

One source for recruiting agents is simply what one of the original critics of the BBC documentary says: "You don't need conspiracy theories to explain this (because in) the democratic West (there are always some) left wing and anti-American." However, as mentioned in the movie JFK, which was a basis for the ABB analysis (starting with UU 18.mai.2012), one of the exiled Cubans said in despair something like: "They only need to find one single personal weakness to abuse to get you into it." Now, uncloaking of SU spies in 'the West' also reveals how they were tricked into it with ulterior Underworld and Sexual Games of Secret

Services. A few headlines of the present domestic newspaper says: "Homosexuality, alcoholism, messy economy, and adultery is used by KGB as blackmail." However, the unique interview of the unwilling spy 'Selmer' in (UU 2014.juli.04) and the SU CdE attempts in Ukraine (UU 2014.nov.14) indicates far more extensive hardcore Underworld Games.

Today, there is certainly rather drugs than alcohol, in addition to abuse of multimedia from mobile phones and computers. It is simply available anywhere at anytime to anyone. Even hypnosis technics like NLP (Neuro-linguistic programming) suggestions and questioning are used, - in addition to inducing false memories and perceptions. These abuses have escalated and are mentioned in UU 2014.aug.01, UU 2013.april.12 and UU 08.juli.2011. The uses and abuses are far more common than the public realize, simply because the victims do not realize what happens at all. In fact, that is the whole point of NLP and Games. In Denmark, NLP is well reputed as training programs, also for leaders, in the public and private sector. In politics, such skills can probably be found amongst so-called spin-doctors. NLP is even merged with the occult Enneagram in the so-called 'NLP Huset' in Demark. If still in doubt about NLP, see the Derren Brown video provided below.

The TV series 'The Americans' sets a believable focus on secret services work on personal levels. A brief summary is: "A pair of deep-cover Soviet spies masquerades as a typical DC couple whose children, neighbors, coworkers & friends are completely unaware of their activities. At home, they're the stereotypical parents of stereotypical kids; at work, they pose as travel agents; but at night, they weave a web of confidants, lovers, dupes, and historical figures from the Reagan-era Cold War. The startlingly realistic plot twists force the viewer to consider the real cost of an undeclared war, what it takes to protect one's beliefs, if it's worth it, and if it actually worked for either side." The author of 'The Americans' worked for a while in the CIA and was intrigued how field agents combined daily life with such work. The series seems to be based on stories similar to the Mitrokhin cases. The agents were 'hidden in plain sight' and the methods used fits the Mitrokhin descriptions. (Based on this, there could be made a hundred TV-series called The Norwegians, The Danes, The Europeans etc.) The next season will focus on how Christian churches were infiltrated, manipulated and used by 'atheists' for secret services. Maybe a future season will show the same for abuse of today's Islamic organizations. There should not be any doubt that extreme such now have become a global threat to LifeQuality for anyone.

'Big Red', a 'Big Blue' faction, is probably the most alarming 5D scenario thinkable for the NATO nations. Yet, despite 20 years of warnings after my Master graduation, - it just recently happened. No wonder that the cyber-wars have escalated and is out of control with no proper defense. The following clips are taken from some personally published postings: "Now it is real. The 'Big Red' faction has acquired 'Big Blue' IT customers including the majority of mainframes in the NATO nations. IBM sold to Lenovo their control over Intel technology, some software, personnel and customers, including major IT systems in public sectors." "Knowing all too well that the ongoing global cyber-wars between NATO, Russia and China has gone too far, - the security needs immediate massive upgrade. The most secure solution for Intel processors is to upgrade to Windows 2008 or 2012 operating system. Such security projects need holistic security models, implementations and guardians as the vital asset it is. All personnel involved should be NATO loyal and certainly not related to any NATO's rivals." "This warning might sound too harsh to see, - at least the results of today's major scandals indicates such attitudes." Related warnings have been talked through in UU 2013.des.06 to UU 2013.des.20 and UU 2014.mars.07 to UU 2014.april.04 and initially in UU 2013.juli.19.

However, IT espionage and sabotage has been going on in the public sector's IT since the beginning. CSC Denmark is a particular relevant such site. Originally there was the Datacentralen in 1959 that provided IT services for the public sectors, communes, police, military, health etc. However, there were parliamentary distrust to its operations that caused outsourcing and selling 75% of the shares to CSC in US/NATO. The first director was previously a consultant from IBM because it all basically ran on IBM mainframes. Soon the

critics turned and there was expressed considerably political concerns that sensitive data could end up in US, like previous concerns was about SU. Hard conflicts was initiated via the labor union PROSA. Finally, in 2009, the union was ordered by the court not to interfere in work and negotiations for national security reasons.

As mentioned in UU 2014.nov.21, the "RAF-dnk brothers Weimann were consultants and installed computer-systems for the Police and Ministry of Foreign Affairs. They got confidential access and were responsible for the maintenance that includes access to read, copy and manipulate data." It means that RAF-dnk has been highly influential in Datacentralen/CSC all along, which explains the allegations against NATO/US influence. There are clear connections between RAF-dnk and today's neo-RAF via IBM machines. After rejecting Microsoft Operating System (Windows), IBM made their Intel-based computers highly available for Linux Operating Systems. As the 'international business machine' IBM really is, - the only reason that mattered was that Linux is free, which could increase IBM profit. However, there is a high cost and risk in the lack of security of this highly manipulatively OS. In fact, North Korea has made a Macintosh 'lookalike' based on Linux OS, called Red Star OS, that can practically run on every IBM based Lenovo computer. North Korea has also foreign computer sites that most certainly can be used in cyber warfare. Their alleged nukes are probably not the main threats towards US and NATO.

Moreover from the published postings: "The massive cybercrimes against the Police, Military, Tax-authorities Public health in CSC Denmark and IBM mainframes, were executed by disloyal employees, remote computers in Pirate Bay and controlled from Asia. The delays in police investigation indicate massive organized crimes that also include employees in the Danish police force. Therefore, it is simply beyond any nativity to claim that this major operation was organized (merely) by two young sociopaths. Unfortunately, I personally know all too well how hard and costly it is to be loyal in such organized psychopathic criminal cultures." In fact, the Danish police hindered investigations for 11 months and actions were taken only after several serious warnings from the Swedish police force, since the Pirate Bay founder was Swedish. According to the prosecution there were copied personal information from the Danish police's criminal registers, drivers' license register and the EU police register (Schengen) about international criminals in Europe. To top it all, the access to 10,000 police officers' password and email was copied via Pirate Bay to Asia. By experience it seems reasonable to advice the two major IT providers that Microsoft should realized that Microsoft Denmark might be as infiltrated as CSC Denmark, - and that IBM Denmark cannot play on all sides anymore and needs to choose NATO or not - before it all backfires.

Although, not as well documented as the manipulations of Danish public IT, there are certainly many indications on major cybercrimes in Norway too. As mentioned in UU 2014.okt.24 and UU 2013.okt.25, there are huge differences between public sector's perceptions and reality in public IT spending, objectives, qualities and corruption. The state of police, military and health services have been constantly criticized for a decade without seemingly improvements. Most of this became valid public criticism after the 22/7 terror attacks (see UU 08.Juni.2012). Even the anti-terror law, where the Parliament increased the maximum penalty to 30 years, is delayed several years due to 'computer issues'. Even the Constitution was ratified without the Parliaments modification in the final 'nynorsk' (New Norwegian) version. It seems too obvious that the Norwegian public sectors suffers from the same kinds of manipulations as in the case of 'CSC Denmark vs Pirate Bay'.

Finally from UU 2013.des.06: "By the way, the secret services are not that secret anymore, since they are published on Wikipedia like this: foreign/domestic/military/IT-Tele: US: CIA/FBI/DIA/NSA, SU/Russia: SVR/FSB/GRU/Spetsvyaz, UK: SIS/Mi5/DI/GCHQ and China: MSS/MSS/MID/SIGINT." However, most alarming is that hypnotic techniques like NLP (Neuro-linguistic programming) for suggestions and questioning, can be used to get passwords, confidential information and even have employees' to do things

unconsciously against their Will. Actually, that is nothing new, - that kind of 'programming' can be traced back to the start of civilization itself.

This video 'Go West' by Pet Shop Boys was used in UU 2013.mai.03, which is an exception to a personal rule not to repeat the choices. However, history's repeating, - especially here. Anyways, the duo 'Pet Shop Boys' is by the way particularly productive and has Guinness record as the most successful music duo in the UK history. The video 'Go West' is special in several ways. This disco hit by Village People were turned inside-out, around and ended in something not even imaginable by most. Note that the animations were far ahead at that time. Originally, it was an expression in the 70' to make San Francisco a 'gay utopia'. In this video US is invaded by a SU gay army, - as if a hetro army isn't alarming enough. Here the dynamic duo of Roma3 enter Roma4 in their dream-world.

Extra UU 2

This extra UU presents a unique and quite interesting version of David Bowies 'Young Americans'. It is an introduction to free-stream of the TV-series 'The Americans'. This was the turning-point for Bowie when the drugs-abuse took over and his talents became fumbling and his career tumbling. And John, - it seems that RAF-us didn't like his democratic appeal in New York much. He left like some JFK.
