

Japan – Visions of China (2)

2014.dec.12

Ukens Utvalgte

2014 is about to end, - and so is this UU theme about Norden in 1514-2014. In order to sum up at a national and continental level, some bigger pictures are provided by use of the 'Good Country Index'. The GCI measures far more values than economic wealth, which puts Norden and Europe at the top ratings. This extended view of nations' qualities and values will therefore be talked through in this UU, - and related to the models of GCR, LQ, 3x3 and 5D.

The GCI (Good Country Index) is a composite statistic of 35 data points that are mostly generated by the United Nations (UN). The data points are combined into a common measure that ranks the seven categories; Science and Technology, Culture, International Peace and Security, World Order, Planet and Climate, Prosperity and Equality, Health and Wellbeing. The extend value system from 'rich' to 'good' was made because of unexpected side effect of the globalization. Problems that once were local, now have worldwide consequences. However, nations still operate too independently, as if they do not quite realize their inter-dependencies. (See the video and web-site below.)

The scores of GCI might surprise. Nine of the top 10 countries are in Western Europe, where 4 are of the 5 Nordic nations. (Iceland is #17 due to the global financial crises.) An explanation can be the European balance between Supply & Demand, whilst SU over-focused on Supply and US on Demand. Besides, Norden was not as damaged in the previous century's war as the rest of Europe. Other relevant rankings are that US = #21, Russia = #95 and China = #107. The GCI do inspire to see national values from different views. Even economy can be characterized as global pandemics at times, but even if we got the required information there are serious lack of actions. As the speaker says; one explanations can be that there are so-called 'social psychopaths' in power. Taking that further, such actually starts, maintains and take use of sociopathic means like cyber-, financial- and geopolitical- Games of 4th degree (War). Another explanations is that there simply are social malfunctions caused by corrupting organizations. Even though the European nations are much smaller and more manageable, - the (confederal) EU nations get the 'goodest' score overall. It proves that HR/LQ based democracy do work.

The GCI is interesting in relation to the value-system called GCR (Good/Constructive/Right) (UU 2014.sept.12). GCI and GCR are practically compatible and supplementary. The approximation is close enough to be virtually similar. Originally, the GCR was related to the 3 Freudian ego-states at individual and social levels. However, the GCR advanced to the 3D political axis in relations to the political meta-systems; Throne/State/Temple. Besides, the three axis has negative as well as positive scales, which can de-cloak anti-forces of civilizations, - like CdE Game-players.

All the GCI factors are closely related to the definition of LifeQuality (LQ) since they relate to the Human Needs of the Maslow hierarchy; Physical, Safety, Social, Respect and Self-realization. Furthermore, like LQ, all the GCI factors are related to UN HR treaties the UNC (United Nations Charter), the ICCPR (International Covenant on Civil and Political Rights) and the ICESCR (International Covenant on Economic, Social and Cultural Rights) (UU 2014.okt.17). LQ is directly related to true political democracy and consequently the conditions for individual and social mental health.

Finally, the 3x3 ego-state model is also closely related to the GCI, simply because any national culture and politics can be directly related to human social-psychology. The 3x3 model is explained in UU 2014.okt.24. It is based on Freud's ego-state model and combined with Jungian ones. A reason for adding 3 levels of conscience is that the traditional Freudian is too limited and the Jungian social and collective natures of

organizations provide such. The theoretical break-through came with the realization that there has to be a 'superior-ID' as there is a 'Superior-Ego' state. However, this will be discussed further in the final UU of this theme. Furthermore, the 3x3 model is well adapted to Erik Berne's theories of socio-psychological T.A. and Games.

A main question for this UU theme will then be: What puts Russia and China in such a miserable position in the Good Country Index? First of all, the GCI is based on UN criteria for personal, national and global concerns. Both empires' low score simply shows the lack of dedications to LQ based HR and to global welfare. Historically, a 5D cause of this is that they both suffered greatly from the self-inflicted CdE Game of 1914, - the brutal powershift from Throne to State. However, somehow it was believed that such a social 'self-lobotomizing' by massacring tens of millions of their own human resources would improve society. These worst crimes toward humanity are still unsettled without proper trials and still continues as destructive meta-Games. The self-destructive Stalinist psyche was spread like a mental pandemic from Moscow (Roma3) via Mongolia to Beijing - and lots of other prey nations.

Although a rather personal break, there are reasons to my awareness of such negative political powers. Reasons based on LO/SU and their anti-HR were talked through in the previous UU 2014.dec.05. Next, 20 years ago, I rented an apartment owned by a Chinese organization. Payment was cash and the contract was simple. During a French friend's wedding in the US, there was a major drug razzia related to the restaurant (primo May 1991 in Kirkeveien 51 in Oslo). The owners and employees were arrested and expelled. Returning home and reading the newspapers, I decided to end the contract, but stay there for the 3 months that I had paid for in advance. However, the owners did not realize that the payment was not a deposit and posted a letter threatening to 'drive me out'. I suppose there was need for scapegoats for the self-inflicted miseries of drug-addicted paranoia at organizational level. Anyways, for nearly 25 years now, Stalinist/Maoist-related incidents have made life hard and unfortunate, - also for closely related ones.

On the other hand, with 25 years of such firsthand experiences of political Underworld Gameplayers, it has become very easy to spot such ulterior RAF related Games. Consequently it has become an inflicted and unwanted life- task to figure out why and how such 'low GCI' powers can continue to spread its negative values and misdeeds at individual, organization and national levels. In a sense, the reason is quite simple though, - since it is basically the very anti-thesis of UN - turning up-side-down the values of LifeQuality, Human Rights and ethics of Good/Constructive/Right (GCR). The methods that seemingly legitimize such goals of civil warfare, are the corrupting crimes of drugs, human trafficking, money laundering and weapons trade. The very basics of RAF is recruited by domestic sociopaths believing to be national or international socialists. Recruiting is rather done by converting domestics with illusions, extortion, comradeship, scandals, fraud, debts, bribery and other means of Underworld Games. Foreigners tend to draw too much suspicion.

Some Maoist related politicians, like the Danish 'Pompel & Pilt', argue that 'western nations' doped China with drugs and got them addicted in the 18th century. The argument promotes Underworld Games like Debtor to indirectly legitimize retribution by narcotic trade to the 'western world'. However, documented history says that: "Opium was first introduced to China by Turkish and Arab traders in the late 6th or early 7th century." "By 1729 it had become such a problem that the Yung-cheng emperor prohibited the sale and smoking opium." Therefore, there were clearly well established domestic illegal drug cartels when the distribution was outsourced to free-lancers. "The traffic that developed in the 18th and 19th centuries in which Western nations, mostly Great Britain, exported opium grown in India and sold it to China." My personal and unfortunate encounter with a RAF related Chinese drug syndicate, have caused awareness of 'junkies' politics' Games and consequently civil misfortunes. This was first expressed in the UU 01.juli.2011 in sympathy for the Stoltenberg family.

It is hard to document Underworld secret services by international organized crime. Yet, - information about crimes of drugs, human trafficking, cyber warfare, corruption etc. are now much better documented and becomes evident. In order to substantiate and relate such, the abstract organizations are logically categorized, related and identified as variations of some uncloaked RAF (Rote Armee Faction). As mentioned in UU 2014.juni.13, there are probably RAF in most nations and RAF-rus and RAF-chn cooperate closely. Relations from RAF-dnk to RAF-chn is clear since the leader Gotfred Appel converted from Stalinism to Maoism in the 60'. Furthermore, there is still the relation with the STASI/KGB agent 'the Carlos the Jackal', and the newer-ending war against Jews, - covered and legitimized with the organization PFLP. The RAF entities were talked through in UU 2014.nov.21. They are now extended with the entities PRO and PRS (Pro Russian Oligarch and Separatists) according to the present sociopathic crimes in Ukraine.

However, for this century, a 'dark adapted eye' should also see the re-organizations and the re-cloaking of the RAFs. Furthermore, the theoretical BAF (Braun Armee Faction) was talked through in UU 06.Juli.2012 during the ABB trial. This is based on the ww2 Underworld Games of war and particularly related to the color brown and National Socialism. Not much is mentioned in post-war history books about the close cooperation of Stalin and Hitler before ww2 with the 'Molotov-Ribbentrop Pact (1939-1941), the Stalinist cooperation in LO during the war and the conversion of National Socialists to Stalinists after ww2. This red-brown alliances during ww2 is called BRAF (Braune-Rote Armee Faction). (UU 15.Juni.2012 and UU 2014.nov.21.)

Green is a rising political colored faction. It seems to be highly ulterior like its forerunners. Green factions use political arguments of 'environment'. Somehow the term and color is associated with the nature. However, that is not quite true, since the 'environment' per definition is "the sum total of what is around something or someone". Thereby the environment can be anything except for oneself. Consequently there are arguments for work environment, social environment, other persons and nations, and the globe in addition to the nature. In brief, political arguments about the 'environment' is also abused as abstract counter-arguments that corrupts political discussions and can even gather veto powers against vital issues. A most evident example is Gazprom corruption of environmental organizations to slow down Norwegian competitor to the Arctic region. However, such 'light green' political factions are merely at 2nd and 3rd degree political Game players.

Far more alarming is the 'dark green' political factions. As known, green is also the color of Islam. Quasi-religious extremists abuse the relation of political and religious influences. Having identified the natures of RAF and BAF, it appears obvious that ulterior war-like organizations of GAF (Green Army Factions) are developed since the eve of this century. Islamic organizations are infiltrated and manipulated like Christians were in the previous century. Now it is very transparent that there are 4th degree CdE Games in relation to African guerillas, 'the Arabic spring' and IS of the Middle East. As mentioned in UU 2014.nov.21 "However, less mysterious is the Syrian war with several Muslim groups with loads and loads of Russian weapons, traded by murky oligarch via Cyprus. Nevertheless, the newest actor in Muslim self-genocides is the so-called IS, alias ISIL alias ISIS. It does not seem to be true religious at all, but rather another neo-RAF, - Jackal style. In fact, the L in ISIL mean Levant that includes Jordan, Israel, Palestine, Lebanon, Cyprus an south Turkey, - which indicates that Israel is a long term goal. IS might as well mean 'Iblis State'."

Cyprus is a key-island and mentioned as a center for war-like trades of narcotics, money, human trafficking and weapons. (It makes associations to the 'Pirates of the 4th Crusade', see UU 2014.nov.28.) The island is strategically sited by the Suez Canal to the Pacific Ocean (Asia) and next to all the war-zones of Syria/Iraq/Iran, Albania/Kosovo, Turkey/Hellas, Palestine/Israel and 'Arabic spring nations' like Libya and Egypt. Cyprus is divided between Russia and EU and functions like some cold-war Berlin outpost towards the Middle-East. Consequently it is mentioned several times like: "The main Danish pseudo-scientific institution of the NLP and Enneagram is closely related to Cyprus and Russia. (UU 2013.des.20) Arne

Treholt, a main SU spy for Iraq, works as a guide and consultant at Cyprus (UU 2013.aug.30). More about the relations to the Middle East can also be read in UU 2013.aug.02.

North-Korea has taken the role as a main opponent toward UN and US in the Asian region. No doubt that the nation is played by a joint Russian/Chinese interest towards the request of Asian sovereign nations for protection against the unstable aggressor. This is talked through in UU 2013.juli.19: "The UN security council decided (in the 60's) that South Korea could get support from UN nations like US, UK, Australia, Canada, Benelux, France and South-Africa. Several other Asian nations bought protection from US towards SU indirectly invasions and civil wars." "North-Korea continued to mass-produce SU weapons for half a century and isolated itself to improve mass-destructions. Now, the republic is edgy with ticking weapon depots, - in a state of collective psychotic-neurotic crisis. This Chinese alter-ego is the largest threat towards itself, its environment and the entire humanity." "There is a simple solution to such problems, - in theory. North-Korea must be free from the SU restraints. Next, it needs to get real civilized conditions via UN to transform the industry and culture, to finally re-unite with its true alter-ego, - South Korea, - and then the rest of Asia. Neo-SU needs to realize the sunk-cost of the war-investments. Yet, neither China nor SU seem to be capable of 'loosing face/mask'." However, nukes seems merely to be a symbolic threat, because they probably have very limited abilities since the missile-parts merely are brought from Cuba via the Panama Canal. North-Korea is a very aggressive cyber worrier state with tight Chinese relations.

China is a major concern and was talked through in UU 2013.juli.19: "The SU/Roma3 assimilation of China has caused exponential economic growth. But the Party has not fulfilled the promises of socialism at all. Half the farmers had their lands confiscated while created a super-rich elite, basically related to corrupt party bureaucrats. The growth is visibly based on pirate copying of 'western' industries, cities, technology, culture, finance - as well as IT. China is simply an Asian Pirate Bay empire. Its superior competitiveness is based on extreme 'social dumping' and illegal stat-subsiding. Furthermore, the handover of the Hong Kong financial-machine to China can now be used for continental investments, but can also be abused in global financial Warfare. It is therefore highly alarming that IBM sold ThinkPad, including technology, employees and customer to the Chinese State. (Most alarming is the recent take-over of all IBM Intel Server in all NATO nations public and private sectors. See UU 2014.nov.28.) Big Blue made Big Red by handing over the needed resources, network, servers and technology to execute considerable IT hacking, espionage, and info/money manipulations." NATO nations' public sectors do not seem to realize that most of their main IT systems are now legally in Chinese control too.

The Nordic nations have their success despite SU closeness and infiltrations, - not because of it. Nordic relations are talked through in UU 2014.juli.25 and UU 2013.mai.31: "Even after the cold war, one can see that Nordisk Råd (the Nordic Council) is bound to Kaliningrad, Leningrad and Murmansk. These three cities were represented as "the Cuba of the Baltics" KGB/FSB, and the site for massive nuclear testing (See the previous UU 2014.dec.05). Furthermore, there are daily ferry connections between Kaliningrad-Gdansk-Copenhagen-Oslo. Sweden and Finland have probably similar indirect connections to Kaliningrad. More directly are the terror-flights with nuke-capable bombers against the member nations of the Nordic Council. That recalls memories of the terror-bombing of the Danish island Bornholm in ww2, and the threats to make Copenhagen/Sjælland (Selandia) to an East-Denmark like East-Germany. (It seems realized with political pre-CdE related Games though.) The imposed fear influences effectively the agendas and decisions in the Nordic Council of Ministers. Therefore, the Councils should rotated the hosting like the EU does".

All in all, the Good Country Index, shows clearly to the Nordic Nations that they basically should hold on to their polices, hold together and keep the positive relations to the rest of European nations. (Domestic policies and qualities of products and services are talked through in UU 2013.okt.04.) The GCI also clearly shows that the Nordic countries should protect themselves from the massive negative influences of neo-SU

and China, - in addition to some negative sides related to the US. Ulterior fake organizations, related to 'RAF, BAF, BRAF, GAF and future GRAF, can be revealed in order to end their sociopathic Games, - by use of models like 3x3, LQ, 5D and GCR. Actually, we all know what should be done and not – but somehow feel inadequate to do our part. I'd be happy to help.

The English band Japan had their breakthrough in the 80's. They made remarkable innovative songs. Japan also made some hits that were played at discotheques, but they were artistically way beyond the rest. At a time there were personal differences and the band split. David Sylvian came well out of it as a serious musician with a broad relationship with several well reputed artists. An exciting spin-off, with the Bauhaus' vocalist Pete Murphy, was called Dali's car. Ironically, it didn't go well. This week's selected "Visions of China" is almost unmentioned in relation to Japan. It might be that the Maoist critic was considered political incorrect in musical milieus. It has previously been selected in UU 02.Mars.2012.

Being a sci-fi fan, this classic rock-opera based on H. G. Wells, makes associations. Even though 'War of the Worlds' had other concerns, it does indeed recall concerns about the escalating 'cyber-war of the worlds'. The book was originally written in 1898, two years after the electric genius Nikola Tesla suggested to make contact with Mars by radio. Wells was inspired by a UK genocide in Australia with superior technologies, and the new theories of Darwin. Wells then imagined that aliens might be superior to humans and just as hostile. This is the original to most sci-fi invasion stories. Most known, however, is the dramatic live radio-version during the cold-war. 'The Red Planet' made associations to 'The Red Empire' and triggered collective fears of what might come next after the nuclear technology. Anyhow, the story might have caused social-psychological positive effects, like sympathy for the victims and collaboration towards common challenges and threats, - in addition to an openness to unexpected solutions.

(See the interesting video below about Well's personality and works.)

The Jeff Wayne's Musical version of The War of the Worlds is a 1978 concept album retelling the story. It features the actor Richard Burton, and musicians like Justin Hayward (of The Moody Blues), Chris Thompson (of Manfred Mann), Phil Lynott (of Thin Lizzy), Julie Covington and David Essex. Its format is progressive rock and string orchestra, using narration and themes to carry the story via melodic lyrics that express the feelings of the characters. The two-disc album remains a bestseller, having sold millions of records around the world, and is the 39th bestselling album of all time in the UK. It has since spawned multiple versions of the album, video games, DVDs, and live tours.
