

Waterboys- The Whole of the Moon (2)

2014.dec.19

Ukens Utvalgte

This UU is basically a renewed and finally summary of the 3x3 theories, with a main focus on the so-called S-E and S-I. There is an overall positive message, despite the serious issues addressed. It is like a doctor's diagnosis that might be positive or not, but anyways provide better long-term solution by short time cures. However, in this case, - it seems that the psychocratic health system itself is in need for qualitative diagnosis, cures and democratization, - an elevation to 2014 from 1514, – and even millenniums before.

The quality of public health services is talked through in TED where the speaker addresses several unacceptable circumstances and provides solutions. This is just as relevant for the public psychiatric services. As cited from UU 2014.aug.01 and UU 2014.juni.27: "A main point is according to the OECD that Norden, Norway and Denmark in particular, have overpricing, overuse of man-hours and relatively low results. Therefore, concerned people should see the TED Talk by Atul Gawande 'How do we heal medicine?' Some brief points are that: The most expensive solutions are not necessarily the best. The whole health system face the same fundamental challenges, so there is all reasons to listen and learn from the most innovative professionals. The health services lack holistic visions based on LifeQuality (LQ). Doctors rather try to find symptoms that suit their competences than the patient's real needs. The health services are put together like when building a car with the most expensive parts, - which doesn't function as intended and is more expensive than a new one. The use of coordinated 'check lists' caused reduction of incorrect diagnosis, incorrect treatments, deaths and cost reductions by 1/3. The pharmacy industry manipulates the health personnel and clients by merely publishing positive test-results, - even when they are fewer than the negative ones."

When there are such massive faults in the psychiatric health sectors, - why isn't it made acceptable a long time ago? Wrong diagnosis cause wrong treatment that might worsen the conditions. Wrong diagnosis can even be deliberately abused to legitimate and legalize anti-democratic disempowerment and exploitation. The reason can very well be that the psychiatric industry suffer from the same 'diseases' they are set to heal. In brief, the public psychocracy might be too obsessed by 'obsolete Believes', alienation from society's realities, and be manipulated by game players of the pharmacy industries and political factions. The psychiatric industry has simply become very capital dependent and needs a given number of clients in order to keep its powers. The industry has to make a need for their services, - by making clients if necessary. The dilemma that a psychotic person do not necessarily realize the condition, goes for organizations too, including the psychocratic bureaucracy. Besides, the ulterior lack of open debate and improvements highly indicate such a condition.

An analogy says that psychiatric diagnosis is like using stethoscope on computer to figure out what happens inside. Anyways, this UU merely provides an attempt to initiate a social-psychological diagnosis of the public psychocracy at organizational level in order to indicate possibly remedies, cures and 5D turns. The theoretical foundation for an approach was indicated in the previous UU 2014.dec.12: "If there is a Freudian ego-state S-E, there has to be a Jungian S-I as well. This merging led to a restructuring called the 3x3 ego-state model. The 3x3 ego-state micro-model is adaptable to macro models for organization, nations and empires at global level.

It is described in UU 2014.sept.12: "The 3x3 state model provides in that way 9 states that are; (UD) Underconscious/Drive, (CD) Conscious/Drive, (OD) Overconscious/Drive, (UW) Underconscious/Will, (CW) Conscious/Will, Overconscious/Will, (UB) Underconscious/Belief, (CB) Conscious/Belief and (OB) Overconscious/Belief. These are related to Freud's and Berne's states as shown in the following table:

Parentheses marks: [Freud] in square. (Berne) in bowed and {S-I}. (Note that S-I is a self-defined state and explained in UU 2014.jan.10.) Freudian states spread out diagonally from Underconscious to Overconscious, while Berne focuses on conscience. Keywords and relations to the 3x3 ego-states are:

1. UD; [ID] Life-force, biology, DNA, nerves, sex, gender, feelings, instincts, dreams.
2. CD; Preferences, joy, anger, biological selections for primary needs.
3. OD; {S-I} Senses, belonging, empathy, dependence, culture, social needs.
4. UW; (C) Ideas, habits, mania, phobia, autism, diverse personality
5. CW; [Ego] (A) thoughts, knowledge, logic, self-realization, perception
6. OW; (P) Sympathy, strategy, moral, visions
7. UB; Intuition, obsessions, rituals, psychosis
8. CB; Philosophy, religion, politics, ethics
9. OB; [S-E] Traditions, rituals, superstitions, memes, hypnosis"

Psychological and psychiatric conditions can stem from personal and/or social causes. The psychocratic services seem to over-focus on personal explanations although the social and external explanations seem far more relevant. As commonly known, - experiences similar to psychosis can be caused by narcotics and hypnosis. The health authorities' lack of registrations of abuse of harder drugs, can simply be that the drugs are mixed with hashish and drinks and thereby consumed without awareness of the manipulation. This might not be discovered in interviews and diagnosis of the client since it is unethical, illegal and might be unknown. Moreover, 'practical jokes' by hypnosis can most certainly cause 'psychotic' experiences of any kind. Diagnosis in relation to the social environments can uncover such alternative chains of causes and be crucial for the diagnostic quality and conclusions.

As talked through in UU 2014.aug.01: "Hallucinations/psychosis occurs mostly by poisoning or brain damage. Damages can be caused by Alzheimer, brain tumor, Parkinson and syphilis. Poisoning can be caused by narcotic hallucinogen drugs or lack of vitamin B. In brief, the categories of drugs are; psychedelic drugs like LSD and mescaline (hallucinogens), euphoria drugs like hashish, paralyzing drugs like morphine and heroin, in addition to central-stimulating drugs like amphetamine and designer drugs like XTC (dopamine). For example, hashish psychosis are now tripled in Denmark. A main reason is that illegal trade is that it is practically legitimized by the authorities at places like Christiania. Furthermore, drugs are sold in criminal environments and thereby naturally cause crimes. Hashish is 'doped' with amphetamine and thereby increase the addiction to the most dangerous 'psychotic' drugs. Consequently, there is an unintended interaction between the illegal and legal drug markets. Patients that are introduced to drugs in the legal health-services can get addicted and get contacted by the illegal drug-market thereafter."

The Danish and English hypnotists Jeppe Schjøtz and Derren Brown clearly warn and demonstrate how hypnotic crimes are done. This was summed up in UU 2014.nov.28: "Even hypnosis technics like NLP (Neuro-linguistic programming) suggestions and questioning are used, - in addition to inducing false memories and perceptions. These abuses have escalated and are mentioned in UU 2014.aug.01, UU 2013.april.12 and UU 08.juli.2011. The uses and abuses are far more common than the public realize, simply because the victims do not realize what happens at all. In fact, that is the whole point of NLP and Games. In Denmark, NLP is wide-spread as training programs, also for leaders, in the public and private sector. In politics, such skills can probably be found amongst so-called spin-doctors. NLP is even merged with the occult Enneagram in the so-called 'NLP Huset' in Demark. If still in doubt about NLP, see the Derren Brown videos provided below." All the cases of NLP abuse in Denmark seems not to be included in psychological and psychiatric diagnosis as social causes, - despite all the documentation and warnings from professionals. Consequently there must be a high rate of faulty diagnosis, treatments and violations of HR and LQ.

In order to explain the S-E/S-I relation at a micro-level, it is necessary to talk through some concrete examples of the present socialization. The vast majority of the Nordic citizens goes through a 10 years socialization program called 'folkschool' (folkeskolen). This has been talked through several times and summed up in UU 2014.juli.11 "There are of course basically positive experiences for children and adults in both the Norwegian and the Danish folkschools. However, there are some experiences where certain pedocrates seem to lack basic sense for democracy." (UU 2013.nov.15 and UU 2012.April.27): "Despite any children's human right for education, some pedagogues use a domestic 'veto power' by disqualification ('ikke utdannelses parat'). However, it clearly shows that there are massive violations of the pupils Human Rights for education, when pedocrates 'disqualified' 1366 pupils in 2012, even though they were allowed to gymnasium after all. The reason and the motive is not on the pupils or the gymnasium, but the pedocrates in the folkschools. The collective egoism indicates that 1 year wage of 1 folkschool pedagogue is more worth for them than 10 pupils' and a gymnasium teacher's."

Another alarming incident is mentioned in UU 27.April.2012: "There were unrest in the class from the beginning. However, it was more unfortunate that a specialist pedagogue took over as teacher. Despite the charming and cheerful appearance, certain murkier sides appeared over time. The dominating matriarch's attitude towards boys appeared highly xenophobic. It turned out to be a fact that every year, a boy with foreign relations had to leave because of 'unaccepted behavior'. (However, it seemed more to be human reaction to inhuman treatment in organized psychopathy, commonly called 'mobbing' and 'Jante'.) It simply appeared as a process of National Socialism. Thinking back, it is almost unbelievable that a teacher can dictate the school's leadership, psychologists, and parents and continue with such cleansing. The classroom, this 'Dolls' House' was untouchable for outsiders. The systematic psychological violence towards the minors have probably caused lifelong traumas. Their families were also affected by the chain-reactions. It would have been so much better for so many people if that special pedagogue was sent to the psychologists and psychiatrist instead from the very beginning. However, the final outcome was for anyone to see, - when the class got too small and had to merge with the parallel class, which made some teachers redundant. Anyways, the TED talk by Ken Robinson 'How to escape education's death valley' is inspirational to how schools should develop this century.

These events can be related to the theories of S-E and S-I at an organizational level. There are Drive (ID/sexual) related Games at 3rd degree at play. This fits rather Jungian theories, because of his concerns about collective synchronization, archetypes and sub-conscious biological powers that can overrun reasoning and empathies. The personal xenophobic and androphobic Drive can be explained by women's lack of the Y chromosomes and biological phobic reactions towards men's biology. As a dominant matriarch in a class-room cell of minors, - the collective Superior-Ego can become autocratic. No questions asked and no objections tolerated, like in the Game-change from Schlemiel to NIGYSOB, and LYAHF. In fact, the UnderConscience Drive (UD) dominates with pure ID-related version of the Game BGGG (Bad Gene – Good Gene, - i.e. Y-chromosomes). (Games are described in UU 2014.nov.28.) However, 10 years in a class-room cell with a dominant matriarch, or patriarch, takes Games to an organizational level of S-I/S-E, - in collective versions of the Games of TLM/(TOL) and national variations like 'Jante', TUD (The Ugly Duckling) and other 'Animal Farm' related Games of S-I.

The S-E/S-I phenomena wasn't limited to that particular class-room. It seemed to be a well-established pedocratic subculture extending several public services in the commune. Such relations between micro and macro levels of social-psychological cultures are hard to realize, simply because such Games are per definition ulterior. However, a common cultural ground can be that the well documented Gulag colonializations programs was about massive assimilation, - including the Nordic nations. The collective folkschool during the cold-war was certainly perfect for such objections, - and probably formed by the State bureaucracy for that. A further comment is in UU 2014.okt.17: "However, - (the extremist policies) failed on grown-ups in the universities so they targeted 'the path of the least resistance', - the 'bourgeois' (pebs')

children in the 'folkschool'. As mentioned, - with 12 years' experience from such cultures the systematic pedocratic abuses stem obviously from the post-68 generation's mass-psychopathic Drives. It includes skilled abuse of psychological pedocracy and psychiatric bureaucracy. Now they have become the oldest and most powerful generation in the system. The results have been very clear the past 12 year. Related issues to such sub-cultures in folkschool are criticized on general basis in UU 2014.juli.11 and UU 2014.aug.01."

'Organized insanity' in S-E/S-I relations for organizations' and nations' is talked through in UU 2014.jan.10 and UU 2013.april.12: "The Ennea(-gram)/NLP destructive potentials can hardly be worse than in relation to Freud/Berne psychosocial Game-analysis. It can function like a dominating and psychotic Superior-Ego that can transfer its psychosis to the client's S-E, make ID's neurosis and even split it's Ego. There are potentials for the whole spectrum of Berne's described Games, - especially LYAHF, NIGYSOB, Debitor, SWYMMMD, Courtroom, LHHIT, Schlemiel, WDYYB, Rapo, Uproar, HDYGOH, LPFOJ, IOTHY and certainly Psychiatry. The destructive results of such Ennea/NLP psychosocial Games in enterprises and governments most certainly gain their rivals and competitors most of all." Furthermore, the DR documentary 'Crimes under hypnosis' (Forbrytelse under Hypnose) and the relation to NLP is mentioned. (See also the related Derren Brown's 'The Assassin'.) Terms like mass-psychosis, brainwash and indoctrination can surely be related to such unsound S-E/S-I relations. Identifications of such ulterior and abstract organizations might be easier with use of metaphoric terms like 'The Psychopathy' and 'The Sociopathy', to relate their activities of mass-psychopathy and mass-sociopathy to the psychosocial Games." (UU 2013.april.19)

The S-E/S-I theories of organizations can even be lifted to Global levels during centuries. The most outstanding example is the CdE Game in the Winter Palace in 1914, - the Dagmar Syndrome. It started as a simple TLM/(TOL) Game between the rivalling tsarinas from Germany and Denmark. This is the ultimate example that cloaking of ulterior Games can lead to unlimited cascades of misdeeds and mischiefs, - like a snowball can cause an avalanche, - like a match can cause a forest fire and like the shot in Sarajevo. Here is a translated part of the talk-through in UU 2014.mai.30: "'Dagmar's last meeting with Rasputin' is the association to this UU. The title of the song is 'Messiah Ward' (which hints to an asylum). In other words, this will be another point of view on 1914, EW1/WW1 and the rest of that century. With hindsight, it is easier to see the moves of the Games, the players and the motives, - and who really lost and won. The overall plot should be clear after a 100 years; (a CdE Game) to convert Roma3 from Throne/Temple in St. Petersburg to State in Moscow." There are far less costly ways to do so.

Furthermore: "The origin of the up-coming of 100 years' war in Europe is previously pointed to Moscow. Rasputin was merely a so-called 'useful idiot' - a brick in the Game." "Most revealing is the 'occult' parts of the Game. 'Agent' Rasputin was educated in religion, hypnosis and psychology, - was introduced to Persian mysticism, spiritualism and occultism in Kiev, got relations in Moscow and was at last positioned by the tsarina Alexandra in the Winter Palace. He functioned as her first-advisors in the war towards her home country Germany. This Game could only have fatale outcomes. There are more talk-through of such insanity in UU 2013.april.12 about Gurdjieff, the Enneagram and NLP. The DR2 documentary 'Crime under hypnosis' is talked through in UU 2012.Juli.13" Also see the other Derren's revealing videos of crimes, frauds and tricks done with hypnosis.

Another related Nordic phenomena of psychiatric organized crimes is well documented in the STV documentary 'The woman behind Thomas Quick' (Kvinnan bakom Thomas Quick) that is talked through in UU 2014.juli.18: "The Quick case lost all its fantastic attention with the disclosure that he was no mass murderer at all, but merely a childlike patient with free meals, housing, drugs and hypnosis under the psychiatric matriarch, Margit Norell. There seems to be some Oedipus-relations where life-long room-service was the reward. 'Sweet old ladies' are unassailable and can consequently be perfect executors of misdeeds, - even the worst thinkable. There are probably no better cover for such vast criminal acts, - like

covering up for the actual massive murders.” An article talks through the cult around ‘Thomas Quick’ like this: “He admitted 39 murders (some in Norway) and was convicted for 8 that he did not even do. No technical evidences and no witnesses have ever linked him to any of the convicted murders. The trials lasted for years and cost 200 million kroner. The murders were made up by a desperate person that lied to get drugs, social relations and attention. He was supported by a cult of psychologists, doctors, police, prosecutors and lawyers, - that lied just as much, - or even more.” There are several other inter-Nordic cases suggested to investigate further, like; the Scandinavian Star ferry fire, Arnfinn Nasset hospital murders, 22/7 bombing and massacre, the Halloween murder under IT related hypnotic psychosis and several other cases. There are most probably similar cases in all the other Nordic countries too. (The infamous and unprofessional attempt by the forensic psychiatric to veto the 22/7 ABB trial is talked through in UU 22.Juni.2012.)

Finally, the Quick case is a well-documented case that proves once and for all that there actually are ulterior sub-organizations abusing the court, the police and the health services of psychology and psychiatry. Any denial is simply another brick in the Game, - even though hard to believe, - even at one’s own closest social environment at micro-level. Anyhow anyone’s perception so far, - the well documented fact of such ulterior sub-cultures will hereby be escalated to macro-level. This is talked through in UU 2014.nov.07: “Identifying and profiling the true nature of the imperial secret organization is like doing Vaticanology and Kremlinology. Previously, it has been identified and described as the Praetor of Roma¹, the Praetors (network) of Roma² and the Oprichnina of Roma³ (UU 2014.mai.02 and UU 2013.Mai.24). Furthermore, Superior-Ego and Superior-ID (S-E/S-I) were described in UU 2014.jan.10. This theory is merged together in a joint Freudian and Jungian 3x3 ego-states model. The S-E and S-I are like the OverConscience of Belief and Drive (OB and OD), which means that they can both influence collective synchronization, - like some ‘folks’ movements’.” Anyways, a rather controversial, but enlightening, TED talk explains how ordinary people can become executors of a system based on anti-values of BDW (Bad/Destructive/Wrong), Philip Zimbardo: ‘The psychology of evil’.

Escalating further from organizational level, the models of 3x3 and 5D should even apply at a meta-level, - Humanity as a whole, globally and through all times. (By the way, UU 2014.juli.25 even suggest Scandinavian social metaphors with Denmark as matriarchic, Sweden as patriarchic and the relatively young Norway as Child.) This is of course highly philosophical and should not be mixed with organizational theories too much. It is not a rivaling religion, but rather an attempt to draw the bigger pictures with some kind of milestones, guidelines and borders. However, meanwhile, there is a related subject that seems to have growing concern amongst anthropological philosophers. It was mentioned in UU 2014.aug.22: “Parasites cause another alarming manipulation of the UnderConscience Drive (UD). It sounds more fantastic than hypnosis. However, to get the idea, it is recommended to see the TED video ‘Ed Yong: ‘Suicidal crickets, zombie roaches and other parasite tales’’. It shows that collective synchronicity amongst animals are not always motivated by interpersonal socializations. In certain occasions, their UD is controlled by physical parasites that uses the hosts against their own good and to the parasites’ gain. In any case, - such similar psychic activities for collective remote control of group synchronizations is certainly the situation documented in the previous century as so-called political ‘folks’ movements’.”

Furthermore: “Theories of parasite activities can thereby cause rather intriguing thoughts in relation to IT (Information Technology). Data-viruses are well known and people show strong addictions to the net and all kinds of IT equipment. It is of course quite natural according to Carl Jung’s theories about social dependencies. How frustrating it is when the net is unavailable for the mobile, PC and TV. However, there can be more than simple data viruses that manipulate the information. Uncritical utilizations can cause manipulations of persons similar to hypnotic states and parasite activities. That might change the behavior unconsciously and against a person’s will. Furthermore, biological IT implants are highly unusual – till now. But people have great tendencies towards self-medicating with psychotic drugs to alter the

UnderConscience. Therefore, 'hypnotic' 'parasites' might be used as willingly if it becomes an option. IT dictionaries should include a new term 'data-parasite' in addition to 'data-virus'."

Nevertheless, the TED talk 'Dan Dennett: Dangerous memes' puts the concern at a more cautious perspective than 'Ed Yong. The term 'memes' suits very well the theories of T.A., where any communication can be extracted to a minimum and cleansed for noise. It is like using digital technics and data analysis, in order to analyze the real meanings and communications. Similarly, there can be made M.A. (Memes Analysis) which can be used to analyze the real meanings and communications of ideologies and isms. (See UU 2013.nov.29 about isms). However, summing up Dan's concerns of dangerous memes, - he uses Ed's example of parasite controlled ants' brains, and continues: "Humans is the only specie that are willing to scarify their lives (and take others') for ideas, values, isms, religions etc. These are replicated and spread from person to person like software or viruses. There are well documented events in human history that such ideas have caused great misdeeds and miseries for humanity, - intended or not. We should be more aware about the dangerous memes now, in the global information technological age, because such dangerous memes can spread like computer viruses via internet and cause fatal harm. However, like it is pointless to hate HIV, - it is pointless to hate certain memes. We need to focus on understanding in order to find remedies, cures and immunities, - and simply figure out how to live with it without causing global psychotic-neurotic mass-reactions at S-E/S-I level – again and again.

Now, since it is close to x-mast, a related question pops up. What could be most archetypical memes of all humanity? – The rivalries of Abraham's 3 women and the horoscopic Belief in the Ages? (See UU 2013.des.27)

The Waterboys was formed in 1983 by Mike Scott with musicians from Scotland, Ireland and England. The band has played several styles, but mostly a mix of Celtic folk music with rock and roll. "The Whole of the Moon" is a single from the album 'This Is the Sea'. It was not a big success, only making the lower ends of the chart. The subject of the lyrics has inspired speculations but is a tribute to inspirational figures like Prince, himself and from the novel 'Winter's Tale'. Each line describes his own perspective and immediate contrasts to the song's subject like "I saw the crescent / You saw the whole of the moon". The origin of the band's name 'the Waterboys' might be associated to 'Aquarius', the next astrological sign for the 'new age'. However, it seems rather obvious that 'the moon' is used as a metaphor for 'la luna' and the poetic mysticism associated with lunacy. The lyrics might even be drug-related. Most famous such association is Pink Floyd's 'The Dark Side of the Moon' where each song is related to some dark side of lunacy. This song was also chosen in the trilogy UU 2012.aug.03.
