

## Pete Murphy – Strange kind of love

2015.feb.20

Ukens Utvalgte

This UU was dedicate philosophies of Love. However, like this UU theme 'Charlie' started, - Valentine's Day in Copenhagen was perverted by similar misdeeds. That will not change this original subject though, but there will be an unrestricted critique in the 'Extra UU'. Still, the repeating terror proves the need for talks about what Love really is, hoping some incapable can realize it too, - even though the greatest prophet of them all - tried and died.

The positive human inter-relations are vital for humanity's LifeQuality, progress and even existence. Love is one of the most serious aspects of human life, even though occasionally ridiculed and scientifically ignored. Philosophies of Love in this UU relates to the merged Freud/Jung 3x3 social-psychological model in order to point out some the necessities of emotional, sympathetical and philosophical Love. First, three previous translated writings on the subject is selected and translated. Then theories of Love will then be talked through in relation to the social-psychological ego-states Drive, Will and Belief.

"Philosophy concerns indeed the great fundamental questions about realities, existence, knowledge, values, sense, reasoning, thoughts, language and more. Religion is called 'The First Philosophy' and includes fundamental questions about the beginnings, ends, the universe, life, omniscience, positivity and more. The questions of this magnitude are unanswerable, simply because the human comprehension is limited. Moreover, the Temple (Christian) values are; Belief, Hope and Love, while State (Plato) values are wisdom, courage, moderation and justice. The universal 'golden rule of ethics' is like 'you should do to others like you want them to do to you'. This ethical feedback-system is an excellent example of advanced moral philosophy. However, logically, there can be eight variances of the rule in positive/negative and passive/active modus. Surprisingly one will probably recognize variants that are unwanted realities." (UU 2013.mars.01)

"Simplifications of moral philosophy was talked through in UU 2013.mars.01: "One can sum up most philosophical values to be 3 incomparable value-systems of; Good, Useful and Right (GUR). The value 'Good' relates to personal feelings that cannot be inter-personal transferred. 'Useful' relates to social interactions, trade, enterprises etc. 'Right' is related to undisputable absolutes. Only oneself is the best to evaluate own moral. Terms like 'no moral' is an illusion, or merely an excuse to appear neutral. Anyone can evaluate an opinion or action according to the values; Good, Useful and Right, and even grade values to be GUr, gUr, guR etc. Alternatively, negative opposing values like; Bad, Abuse and Wrong (BAW) can be related. Humans can discuss own values with other persons and hopefully come to some understanding and agreements. It sounds trivial, - but that is how simple advanced, moral philosophy can be used by anyone. Then anyone should think more about their own values and dare to communicate with others about it." An extension of the value-systems form 'OK' (Thomas Anthony Harris) to GUR, can surely be used for advance digital logic, like more advanced IT systems can." (UU 2014.aug.22)

"Philosophies about LifeQuality is also about moral and consequently moral philosophy, - ethics. It concerns standards for values, rules and attitudes. All the philosophies together from all times are obviously too comprehensive. However, they are also influenced by historical simplifications, contradictions, over-focus, exclusions and anti-democracy. Most present philosophers do not believe much in absolutes of morally 'right' and 'wrong', though. Consequently, ideas of punishment and rewards are accordingly adjusted. Moreover, the former philosophical believes in absolute determinism (faith) are mainly replaced with democratic philosophies concerning the 'free will'. Consequently, humans should not be judged guilty for unfree or unconscious action and are not accountable for related punishment or rewards. Human emotions

and spontaneity is now acknowledged as moral factors, despite the unpredictable consequences. For instance, the existence of Love and such moral influences are now recognized even though it cannot be scientifically proved or predicted. Emotions are vital feedback systems for survival because they are closely related to the life-sustaining heart. It might explain humanities great ability to survive the harshest conditions.” (UU 2013.mars.01)

Love is not included as a factor in the social-psychological 3x3 model, mainly because the phenomena is not quite logically explainable yet. However, rather unscientifically, this ‘x-factor’, this ‘fifth element’ this ‘insanity’ is vital for human life and behavior. Most people know the changes personally as (biological) puberty experiences. However, in relation to the 3x3 model, there are such puberty and adulthood for all the ego-states of 3x3, - not merely personal, but collectively at organizational level and for humanity as a whole. This hypothesis is not yet thought through and cannot be talked through here either. Anyhow, here is a start:

Love at Drive states is mentioned several times, especially related to biological reactions and Games of ‘Sexual’ and ‘Animal Farm’ (AF) categories. However, the thoughts were extended to organization level when first trying to explain Superior-Id in UU 2014.aug.15: “S-I stems from the primitive stages in human development and is the life-force, the will to survive and even love and hate. It is the ‘animal’ within us, controlled by the ‘lizard brain’ and also collectively described as the ‘beast’ and ‘monster’. Such terms about humans are used in public debates and not invented here.” “The collective life-force consists of every individual personal life-force. A quote from the movie ‘Jurassic Park’ seems to be eternally true: “Life will find a way” (to survive and develop). However, that was written in relation to some very negative chapters in human history. On the contrary, - the Love for flora and fauna is evident for most human behavior.

Love at Will states is the most ignored one. The reason is that Will is dominated by kinds of logic, - including psychology (logics for the soul). It is said to be cynical, but rather appears so for objectivity’s sake. Personal emotions are not prioritized. Freud, who formulated the original ego-states (Superior-Ego, Ego and Id) seems to lack abilities of Love, or simply excluded Love at S-E and Id states as irrelevant or insanity. Anyhow, it seems clear that he was possessed with ‘Love’ for his own logic – the psychology. There is an urge that men (Y-chromosomes) seem to have, - or maybe there is an envious Drive for incapability to give biological birth. This Love, this obsession, for creative thinking, has caused real inventions as own properties. In fact, Intellectual Property Law is now global.

Love at Belief states is a greater concern than realized. Actually, this whole UU theme ‘Charlie’ is based on this ego state. The existence of Love in Belief is very evident with all the religious movements. However, the Belief ego-state do include belief in anthropologies and logics (science) as well as divinities. Yet, there is an admirable honesty in religious belief, because they actually admit it is a belief. On the other hand, scientists’ belief in own science are too often presented as absolute truth, - without proper proofs. Love for deceptions are dangerously close to psychosis. Anyways, Belief concerns 50/50 probability of truth, while hope is not probable and knowledge is rather certain.

Horrible acts can be motivated by Love. It is recognizable how a person desperately in love might harm oneself, the loved one and even society. Too much Love is simply unhealthy and can be traumatic. There are numerous expressions of negative sides of Love in music, expressions and art. Such goes for Love relation to Will and Belief as well as Drive. However ulterior, - it will be discovered by use of extended terms as explained in UU 2013.april.19 “It is possible to make socialpsychological relations and use prefixes like neuro, psyko, sosio, xeno, pedo, ‘matro’, ‘patro’, ‘ego’, ‘jerko’, ‘nerdo’, ‘sulko’. Furthermore, it is possible to substitute the suffix ‘cracy’ (power) with mania, phobia, patia and philia”. With such extended use, the terminology of Belief is broadened to Sophimania, Sophiphobia Sophipatia and Sophiphilia. Terms like Philosophical mania, or Sophimania, indicates the danger within. This will be further talked through in a

later UU dedicated Games of Belief. However, it is as evident that sociophilia, like Marxism, can be as harming as pedophilia at national level. (The extra UU highly indicates so.)

The original intention was not to write about Hate, but rather most aspects of Love. However, that did not work, after the Copenhagen 14/2 event, - so here are some thoughts. Love and Hate are generally recognized as opposite emotions of positive/negative, construction/destruction, connection/disconnection etc. However, Hate can have positive outcomes as Love can have negative sides, in the sense that disconnection might be necessary for new connections and destruction of the old might be necessary to give room for new constructions. Older generations should give room for new generations to evolve in time by peaceful means to avoid hateful and destructive events. Emotionally, it seems that some outbursts of accumulated negativity are as necessary as flushing the toilet. It should however not be directed towards other people, but to sanitary systems. Furthermore, general expressions in misery might mistakenly be perceived as directed hatred and suppressed thoughts might need emotional outbursts to be relieved. Unfortunately, Hate is abused as means in Games. Games of Terror are unfortunately the reason for this UU Theme 'Charlie'. It is alarming that such Love and Hate can get completely out of control collectively in 4<sup>th</sup> degree Games with unrecoverable and irreversible outcomes. However, the terrorists' acts seems not to be based on true Hate (UD), but hypnotic phobic memes (OB) planted with NLP (Neuro-linguistic programming). (See more at UU 2014.aug.01.)

'Conscience' concerns three levels of the second dimension in the 3x3 model. (The model is explained in UU 2014.sept.12.) Love relates to UnderConscience in not explainable ways like biology (UD), ideas (UW) and dogmas (UB). Love at OverConscience level are basically expressions, transmissions and influences. E.g. prophets claim to be divine influenced (OB), social gatherings are basically communicable (OW) and intimacy and sexual acts are interrelated (OD).

Maturity does not merely concern biology. The Drive puberty is evidently and the changes of mind are explain by such UD changes. However, maturity concerning Will and Belief is not that evident and evolves in stages after the Drive maturity phase. Hypothetically, the maturities might be reached about the ages of 20 for Drive (sexual), 40 for Will (platonically) and 60 for Belief (philosophical). Yet there is no doubt that influences and developments starts long before, as an infant loves its parents. There can be rather complex inter-relation of these during growth, - just like we all have experienced Drive puberty changes.

A new Game category for Belief was announced earlier in this UU theme 'Charlie'. The new Game categories CdE (Coup d' Etat) for Will and AF (Animal Farm) for Drive has been talked through in UU 2014.nov.28 and UU 2015.jan.30. The new Game category for Belief is WoW (Well of Wisdom) that relates to several archetypical myths. The mythological origin of WoW does not exclude Drive or Will. Quite on the contrary. As Jung explained, humans have collective archetypes that occasionally are expressed at UnderConscience level as symbols, dreams, 'feelings' etc. Such are often expressed collectively and synchronized via OverConscience in acts, art, science and myths.

The most famous WoW Games are expressed in the myth of Garden of Eden. Atheists as well as theists should recognize this archetypical expression as a vital collective Belief for Humanity. Basically, it is about humans' LifeQuality, the freedom of Will and the strive for Wisdom. Furthermore, the Tree often symbolized age/continuity, generations, branches and gates between worlds. However, it was wrong of the prophet Moses to blame the Prophet Adam's woman for 'the first sin', deception and misery. Actually, since Moses' existence is disputed and Adam is probable just mythical, the myth does most certainly not stem from God. Such unjust prejudice is of BAW (Bad/Abuse/Wrong). It is crucial to stop such theocratic lies and psychosis, - for human Love's sake.

Finally, taken from; UU 2015.feb.06; "Some 'dangerous' memes of traumatized theocrats should not be allowed to overrule sanity and get away with blaming God/Allah for it. They need confrontations. It is however a hard nut to break. The prophet Jesus proved that with his life by forgiving misguided humans for their unintended sins. Yet, - even though there are doubts of his heritage, - there is no doubt about his democratic prophesy in the Quran." Obviously, since the Christian church has practiced forgiving for 2000 years, and is as powerful as ever, - it is obvious that God/Allah do not reject such forgiveness, but rather support it.

Peter Murphy is often presented in UU. He was a cult figure in the band Bauhaus. In the later solo career, he evolved his status with music from light pop to heavy ballads with complex vocal and lyrics of metaphorical and religious kind. The album 'Love Hysteria' and 'Deep' with the song 'A Strange Kind of Love' was made at the top of his career. They are strong albums from his most creative period. It went downwards with the next album '[Holy Smoke](#)'. At a time, this catholic was suspected to have converted to Islam. He denied the claims and said he just recognized Sufism. Anyways, the poetry of 'A Strange Kind of Love' suits this UU Theme well: "This is no terror ground or place for the rage. No broken hearts, white wash lies. Just a taste for the truth - perfect taste, choice and meaning. A look into your eyes."

## My Bloody Valentine- Don't ask why

2015.feb.20

Extra UU

Not a main point, but I lost the appetite for a wonderful Valentines dinner when the news hit about the 'Charlie' massacre attempts in Copenhagen 14/2. This extra UU is devoted to uncover the real Game at play of who, how and its anti-thesis. It should be clear by now that such misdeeds, and all the related, are acts of war and treason. They will eventually be treated as such. No dilution of ideology, theology or anthropology overrules that.

Straight to the conclusions. There is going on multiple Games of the CdE (Coup d' Etat) category. They are Will-related of 4<sup>th</sup> degree (war), but involves all the 3x3 ego-states Drive, Will and Belief. The massacres in Europe and IS are basically of AF (Animal Farm), but however diversions for pre-CdE Games by testing routines, reactions and disloyalties of Public Services like the Police. The main Game is LYAHF (Let's You And Him Fight) that has a third and ulterior actor who makes the two other parts fight until one is beaten and the Spoils can be collected. At ego-state Belief, it is not a real rivalry of Muslims, Jews, Catholics and Protestants. Atheists might gain relatively by theists mutual self-destruction. In fact, the Game seems rather to be an extended re-play of the CdE attempts in European nations by the so-called '68 generation.

There are reasons to think the meta-Game is an atheistic CdE, when focusing on certain events in relation. The massacres in Oslo, Paris and Copenhagen appeared to be executed by single autonomous persons with quasi-religious motives. However, there is no evidence that a single person did multiple massacres although one person was publically identified. Such major operations, planning and cover-ups requires large amounts of resources, people, money, time and Game playing at international level. The major hindrance to such crimes in civilized nations is obviously the police. Such crimes are impossible to execute unless the police itself is considerably infiltrated and manipulated. Therefore the police in Norway, Denmark and

France are proved to be so by the terror acts. The evidences are hidden in plain sight for the whole world to see and investigate. Failure to do so, indicates that the legal and political systems are just as manipulated as the police. There are some single indications that links it all, and more, together. Some of this is talked through in previous UU about the Jackal, GRAF and Pirate Bay.

'Dangerous Memes' (UU 2015.feb.13) lives on in organizations and their related. A most relevant source for such 'Belief' relations and networks were mentioned in UU 2014.nov.21. "A most reputed RAF agent is called 'Carlos the Jackal' alias Ramírez Sánchez. He is currently in jail for double lifetime in France for killing 11 people, injuring 150 and murdering of three agents. Historically, in 1968, Carlos opted for the Patrice Lumumba University in Moscow that was reputed as a notorious hotbed for recruiting foreign communists to the Soviet Union. He was expelled from the university in 1970 by disciplinary reasons, though. Then he travelled to Beirut and Lebanon, where he volunteered for the PFLP (Popular Front for the Liberation of Palestine) in 1970 and tried to establish his own organization with Syrians, Lebanese, and Germans. Carlos was also connected to the STASI that provided him with an office and safe houses in East Berlin, a support staff of 75, a serviced car, and allowed him to carry a pistol in public. The STASI files also show links to the KGB (today's FSB). There is no public information if Carlos and Putin had relations when they both were with the KGB in East Germany. However, Carlos the Jackal was most certainly closely related to RAF-dnk."

Belief concerns ideologies as well as theologies. Cascades of ideological CdE Games were doped with harmful ideological memes in '68, - like outcries for armed revolutions and massacres of civilians. The same concept goes with theology as well (UU 2014.nov.21). "Anyways, in addition to the mysterious cascade of CdE called 'Arabian Spring' there is a very ulterior 4<sup>th</sup> degree CdE Game player at stage. However, less mysterious is the Syrian war with several Muslim groups with loads and loads of Russian weapons, traded by murky Olicrates via Cyprus. Nevertheless, the newest actor in Muslim self-genocides is the so-called IS, alias ISIL alias ISIS. It does not seem to be true religious at all, but rather another neo-RAF, - Jackal style. In fact, the L in ISIL mean Levant that includes Jordan, Israel, Palestine, Lebanon, Cyprus an south Turkey, - which indicates that Israel is a long term goal."

RAF and PROSA were mentioned as 'bullet points' in the start of this UU theme 'Charlie' (UU 2015.jan.09), saying: "Ulterior RAFs and alike exist in most nations and have variations like BRAF and GRAF." The hypothesis of the present multiple RAFs is talk through several times and accumulated in UU 2014.juni.13. In brief, 'Red Army Factions', despite their extreme ulteriority, were disclosed in several European nations and probably exists in all. A RAF-dnk cell called 'Blekingegadebanden' was named after the disclosure of a weapon depot in Copenhagen. Besides, the hypothesis of RAF development is the pre-RAF as BRAF (brown-red), formed from the ww2 Stalin-Hitler alliance and postwar-Games. This century's RAF has become GRAF (green-red) where green as the color of Islam and do not symbolize of nature at all. Furthermore, another bullet point said; "Pro-Russian Oligarch, Separatists and Autonomes (PROSA) do not merely operate in Ukraine." This is based on present media observations on how the neo-SU CdE Games are played, where there are hierarchies of RAF cells organized, yet manically denied like in 'Underworld' Games of mafia bosses. The executioner in Oslo, Paris and Copenhagen are displayed as Autonomes, merely to disguise and protect the massively organized crimes behind.

The Norwegian police were seriously manipulated during the Oslo massacres. The infiltrations and manipulations of public sector were directly causes to the extent of killings and destructions. The condition has not improved despite investigations, critics and political decisions. This is talked through in the UU Theme "Terror rettsaken i Norge" in UU 18.mai.2012 to UU 20.Juli.2012 and UU 2012.aug.24.)

It is necessary to control public data systems in order to execute CdE crimes. Such has not been proven in Norway, though highly indicated in many ways, - e.g. the delays in modernizing terror laws, the major failed IT projects, the obvious corruptions in investments, the failing communications, investigations and action.

However, massive and long-lasting cyber-crimes has been uncovered in the Danish police. This was mentioned in UU 2014.nov.28: "The massive cybercrimes against the Police, Military, Tax-authorities Public health in CSC Denmark and IBM mainframes were executed by disloyal employees, remote computers in Pirate Bay and controlled from Asia. The delays in police investigation indicate massive organized crimes that also include employees in the Danish police force. Therefore, it is simply beyond any nativity to claim that this major operation was organized by two young sociopaths." "Most alarming is the extensive use of the hackers' favorite operating system - Linux. Anyhow, the ongoing trial in Denmark is most probably just the tip of an iceberg in all of the public sectors in all NATO nations."

Furthermore: "In fact, the Danish police hindered the investigations for 11 months and actions were taken only after several serious warnings from the Swedish police force, since the Pirate Bay founder was Swedish. According to the prosecution, there were copied personal information from the Danish police's criminal registers, drivers' license register and the EU police register (Schengen) about international criminals in Europe. To top it all, the access to 10,000 police officers' password and email was copied via Pirate Bay to Asia. By experience it seems reasonable to advice the two major IT providers that Microsoft Denmark might be as infiltrated as CSC Denmark, - and that IBM Denmark cannot play on all sides anymore and needs to choose NATO or not - before it all backfires." This refer to the warning in UU 2014.nov.28: "Now it is real. The 'Big Red' faction has acquired 'Big Blue' IT customers including the majority of mainframes in the NATO nations. IBM sold to Lenovo their control over Intel technology, some software, personnel and customers, including major IT systems in public sectors." "Knowing all too well that the ongoing global cyber-wars between NATO, Russia and China has gone too far, - the security needs immediate massive upgrade. The most secure solution for Intel processors is to upgrade to Windows 2008 or 2012 operating system." It might even be beneficial to get rid of the old, ineffective and expensive IT systems and substitute it with new efficient, inexpensive, secure systems.

It was the Swedish police, not the Danish police, who shot at the terrorist in Copenhagen, according to Swedish newspapers. However, Danish police were very present with officers from PST, PET and the local police. The debate at 'Krudttønden' had three main speaker, not merely the Swedish cartoonist. The Ukrainian Inna Shevchenko, the Polish Agnieszka Kolek and the French ambassador were also present. These were obviously meant to be massacred as well. All involved of the misdeeds are therefore accomplice to attempted murder on a foreign diplomat. It highly indicate that the first massacre attempt was political motivated, - not theological. The second massacre attempt seems to fit the terrorists' personal agenda though. He was obsessed by the Israel-Palestine conflict, he often expressed his hatred towards Jews and was a reputed Thai boxer. He was heavily armed to execute a massacre of Jews at a ceremony. Two Danish police officers at the site did not stop the terrorist, but a civilian Jew did, - with his own life. Moreover, police reported that guns malfunctioned and the bulletproofed vests were hard to get in time. There will probably be more reports of critical malfunctions, - especially if Denmark officially asks Sweden and Europe for assistance. Norway and France should do the same.

Such 'Dangerous Memes' are possessed with brainwashing in prisons too. Drugs and probably hypnosis technics like NLP (Neuro-linguistic programming) are used. (UU 2014.aug.22.) Such should be characterized as 'mental rape', where phobic hate is planted and projections directed towards opponents like Jews, civilians and democrats. In that way, the deal seems to be that the first massacre was on command of PROSA while the second massacre was a personal reward.

'Remote controlled Jackal memes' is an alarming thought. Although probably not quite so, - some of it is highly possible and probably true. The terrorist in Copenhagen certainly changed behavior in prison before the attacks. The terrorist in Oslo change behavior in Eastern Europe camps before the attacks. Europe's anti-terror chief Gilles de Kerchove has strongly warned about the radicalizations processes in prisons.

There is certainly organized brainwash programs at work. The conditions are there, - including psychotic drugs.

'My Bloody Valentine' redefined what noise meant within the context of pop songwriting, like the Velvet Underground, Sonic Youth, and the Jesus and Mary Chain before them. Frankly, I chose this band because their name suits the situation. The song 'Don't ask why' also somehow suites, while the video is actually less disturbing than most. However, that also is descriptive for the event and situation.
