

Genesis- After the Ordeal

2015.april.10

Ukens Utvalgte

Closing this Charlie theme is to prepare a proper closure of the present Age. All Ages and 'Testaments' have expiration dates. The Old Testament expired 2000 years ago and was replaced with The New Testament. N.T. and Quran will be replaced by an 'Aquarian Testament' in 2150. However, the transition starts in 2060 and some claim we are already there. Anyways, - this is a unique opportunity to improve and orchestrate human perceptions of values, visions and missions for the millennia to come. This conclusive UU will finalize the reasoning for termination of Islamism's aggressions. Yet, all the thinking has turned the focus to a meta-view beyond first impressions of this UU theme. Peaks of theories of LQ, 3[^]3, 5D and GHRL will be presented for how the future Testament might be.

There is no drama involved in such a slow transition to a new Age and another Testament. 'Old' and 'New' are meaningless titles for the Ages Testaments, though. Since the Ages are based on zodiac astrology, the previous Testaments should rather be called The Piscean Testament (N.T), The Arian Testament (O.T), The Taurean Testament (BC 4006-2006), The Geminian Testament (BC 6006-4006), The Cancerian Testament (BC 8006-6006) and The Leonian Testament (BC 10500-8000). The recurring upgrade of the writings are innovative and necessary, because increasing knowledge should replace the beliefs that are proved wrong. Values, visions and missions must be adjusted according to new perceptions of realities, - even divinities.

There is no need to go berserk in theocratic warfare based on adjusted foundations and perceptions. The Mayans did not go berserk in their 2012 Age transition, and we should not prove ourselves less civilized. However, there are some fatal biblical mistranslations that 'the end of the Age' is deliberately changed to 'the end of the World'. Still, that is just as childish as all the doomsdays mass-psychosis about 2012. On the other hand, it would be naïve to believe that certain theocrats will not promote war. These Piscean and Arian Ages has 4000 years proof of that. This is a main reason why the Aquarian Testament should not involve Games of GoT and KoC like the previous Ages did. (UU 2015.april.03) It should have a prevention built in like the UN charters have.

The Quran became a major concern in this UU Theme 'Charlie', even though the diluted executors cannot be truly religious. The event led to the conclusion that the available versions of the Quran simply are blasphemous in themselves. It is written that the Prophet Abraham disobeyed God's command to execute his wife's adopted son due to contra-order by a (fallen) angel. The prophet Moses smashed God's 10 commandments, which certainly is blasphemous. Prophet Adam disobeyed God in Eden and was expelled by God. Earlier, 1/3 of the angels in Heaven refused to bow for Adam and was expelled (fallen) from Heaven for that. After the Eden incident, the rest of the angels must have been expelled (fallen) for obeying the disobedient Adam too. Jinns are considered demons in N.T., but the rest of them must have followed their fellow angels in the miserable faith. Besides, "In pre-Islamic Arabia amongst pagan Arabs, Allah was not considered the sole divinity, but having associates and companions, sons and daughters – a concept that was deleted under the process of Islamization. In Islam, Allah has become unique, the only deity, creator of the universe and omnipotent." (UU 2015.jan.30) It is self-evident that the present copies are not like the original, but rather manipulated by sinners, fallen angels, demon jinn or whatever they should be named.

The Quran is not a recognized add-on to the Piscean Testament. As mentioned in UU 2015.mars.27: "The ambition in Roma2 was to build 'Heaven on Earth'. The emperors were promoted to be God's representatives. The theocracy of Roma2 developed a compromise consisting the Trinity of God, humans and spirit, in addition to herds of angels, symbolized with zodiac astrology, Egyptian Isis cults, and Etruscan

pontifexes. Yet, Jinns were mostly excluded as evil demons. It all boiled down to a theological stew that anyone should accept." Outside 'Heaven on Earth', in the polytheistic Arabia, there were written some 'alternative testament' including fallen angels and demon Jinns from the failed conquer of Egypt. None of those writings was accepted to the Piscean Testament for obvious reasons. However, 'The Book of Revelation' (The Apocalypse) was added later on like some 'Trojan Horse'. The Mongols were provoked by the cruel punishment for nonbelievers like themselves. Mongols/Muslims formed a joint mission to storm the gates of 'Heaven on Earth' to prevent such misdeeds. They got unexpected help when Roma2 was plundered and seized by 'The Pirates of the fourth Crusade'. They did not manage the city and it became easy to invade. (UU 2014.april.25) Besides, the pirates handed over the coat of Arms of Roma2, 'the double headed eagle' to Moscow, a monk declared Moscow as the 3rd Roma and Ivan was titled Tsar/Caesar. (UU 2013.Mai.24)

Astrologers' interpretations of astronomy is occasionally criticized in UU. Those are certainly not prophecies, but rather guidance for focus areas. It is briefly described as: "The Age of Pisces is mainly of Monotheism and Spirituality, especially characterized by Christianity age. Pisces is associated with the continuous research of humanity about the truth hidden behind what is perceived by five senses, which corresponds with the mysteries associated with Christ's life. Also like with the previous transition into the Age of Aries, the people were reluctant to evolve into the new thinking of the transitioning age symbolized by the Passion of Christ narrative." (Ref Wikipedia) Monotheism did somehow work in the sense that half of humanity worship one God and not several. There are rather different perceptions of that one God, though. It is hard to say whether people are more spiritual these days, but there must be more collective awareness due to extended population and communication capabilities. Self-awareness and humanity has grown the last 500 years and has become fundamental after the world wars. A most important human quality is the will and ability to forgive those who truly wants to undo wrong. This qualitative feedback of humanism is necessary for Good/Constructive/Right value-systems and progression. Jesus died trying under false accusations of blasphemy.

The Aquarian Testament can be drafted anytime by anyone. It is the recognition that is hard. Unfortunately, history shows that too many unqualified scripts are used. It is easy to see with today's insight on the real future of the past. Some properties on the Aquarian Age is commonly known since it is based on Zodiac astrology. "Astrologers believe the coming Age of the Aquarius affects mankind, possibly by influencing the rise and fall of civilizations or cultural tendencies. Traditionally, Aquarius is associated with electricity, computers, flight, democracy, freedom, humanitarianism, Idealism, modernization, astrology, nervous disorders, rebellion, nonconformity, philanthropy, veracity, perseverance, humanity, and irresolution. Many astrologers consider the appearance of many of these Aquarian developments over the last few centuries indicative of the proximity of the Aquarian age. However, there is no agreement on the relationship of these recent Aquarian developments and the Age of Aquarius." (Ref Wikipedia)

Most of the mentioned astrological properties is as general as any astrological fortuneteller could name. Surely associations to 'electricity, computers and flight' is not ancient or divine at all, - but rather added on lately to preserve some kind of credibility. Zodiac astrology is like any fortune telling occult myths like tarot, enneagram and other fortunetelling tools. However, it can be used as an entertaining and engaging way to set focus on some vital aspects of human Values, visions and missions. It has somehow worked in the past and should not be discarded, - just modified and revealed for what it is and not. Following is some previous mentioned theories about Belief, LifeQuality and Moral philosophy and GHRL.

The theories of Belief was developed significantly in this UU theme: "The Superior-Devine (S-D) is the most complex by far. The properties of the 3[^]3 (3x3x3) social psychological ego-state 'Belief' is not possible to fully describe. It is like the term 'religion', i.e. 'The First Philosophy', and includes fundamental questions about the beginnings, ends, the universe, life, omniscience, positivity and more. The questions of this

magnitude are unanswerable, simply because the human comprehension is limited. Besides, Belief is not about knowing scientific facts at all, but rather a realization that the probability is about 50/50 for a belief to turn out true. (Hope concerns unlikely beliefs with about 10% probability to be proved true.) Consequently, claiming to know whether a divinity exist, or not exist, is just as false, and do not concern Belief at all, but rather Games of Will. Such ulterior Games of false Belief are unfortunately common and can be dramatic, as the Charlie Game in Paris 7/1 and Copenhagen 14/2 indicates." "The Belief dimension of the 3x3 model is different from Drive and Will. Freud and Jung called it 'Superior-Ego', while Berne called it 'Parent'. Belief concerns ideas of what we cannot possibly fully understand, yet need to know and trust. Here (in this UU theme 'Charlie', the) focus is set on Belief in Supremacies like the S-E. The Superior-ID (S-I/Drive) was included 2 years ago. Now, the Superior-Devine (S-D/Belief), a new and third subcategory, is included to complete the model. However, with this completion of the theoretical part of this Charlie theme, the (previous) 3x3 model has become a 3^3 model, i.e. 3x3x3, because of the 3x subcategories in Drive, Will and Belief." (UU 2015.mars.13)

Moral philosophy is essential and summarized in UU 2015.mars.06. "If the moral, ethics and philosophies of LifeQuality should be put down to a single sentence, - it could be 'I'm OK – You're OK' (ref Thomas A. Harris). It is about tolerance to OK persons, as well as a recognition of oneself. Consequently, it is also about speaking out and making clear statements to 'not-OK' persons, organizations and nations. Next, there should be more awareness about destructive psychosocial Games in order to end them harmlessly (ref 'Games People Play' by Eric Berne)." Moreover in UU 2014.sept.05: "A healthy human has a mature balance between these three (Id, Ego, Superior-Ego). Therefore it safe to say that the mental health reflects the personality – whether it is allowed to develop and free to self-realize. However, a suppressed Ego cause unbalance and becomes mental unhealthy, - in worst cases get mental illness and disorders."

20 years ago, there was a realization that LifeQuality was probably the most important word for any human. Consequently, it should be for human religion too. The LQ UU theme was blogged weekly for a year and developed to 4 sub-themes: 'Basic theory' (from UU 2013.feb.01), 'Empires' (UU 2013.mai.03), 'National', (UU 2013.aug.09) and 'Meta' (UU 2013.nov.08). The final definition is in UU 2014.okt.17: "LifeQuality is defined as: A person's totality of properties and potentials to satisfy stated and implied needs." "Maslow's Hierarchy of Needs shows 5 main categories; Physical, Safety, Social, Respect and Self-realization." The 'stated needs' are similar to the 'Human Rights'. "The 193 UN member-states are obligated to secure their citizens' rights concerning; private properties, self-determination, security, privacy, family, work, education, in addition to freedoms of thought, conscience, religion, expression and more."

Despite knowing that UN has not eliminated warfare of all kinds, the belief that UN's collective conscience has prevented a nuclear ww3 lead to the conclusion that any humans need and deserve a Global Human Right Law (GHRL). Also knowing that the UN do not have legal powers to make nations live up to their obligations, the path is multi-lateral NHRL. "All NHRL (National Human Right Laws) should at least include UNC (United Nations Charter) that provides the UN powers to investigate and mediate in international disputes and authorizes international economic, diplomatic, and military sanctions and force to resolve the disputes, - as well as the ICCPR (International Covenant on Civil and Political Rights) and ICESCR (International Covenant on Economic, Social and Cultural Rights)." (UU 2014.okt.17) GHRL has a separate Facebook page and an Avaaz petition page, - however still very pacified.

A quite intriguing opportunity of a new Age is to adjust measures of time. The previous transition to the Piscean Age altered moths from 10 to 12, reset the annual counting to zero and marked Julius and Augustus as divine as Roman gods. The zodiac division of time causes constantly difficulties and error compared to universal standardized scientific measures. Days divided into 24-, 60- and 10-number systems is as absurd as astrology itself. 2x10 hours/day, 100 min/h and 100 sec/h is more manageable. Moreover, it is confusing

to divide a year into 12 times 28 or 30 or 31 days. Even 'The International Fixed Calendar' of 13 months á 28d/4w is more manageable. Another interesting suggestion from Isaac Asimov simply excludes the moon from the calendar and uses 4 seasons of 91 days each. The simple fact that the earth, sun and moon do not follow any standard numeric systems cause need for periodic adjustments. (UU 2013. jan.04) Moreover, this BC/AD has merely Piscean relevance and do not concern humanity as a whole much. It should be considered to find a starting-year that relevant for the start of human civilization and reset at 2150 to that.

Focus on water, is a main meme for the Aquarian Age. Water should be promoted in any positive ways. Firstly, we are 65% water ourselves, we comes from water and is vitally dependent on water. Sufficient, clean water is the very basic for human LQ and will be most vital when we reach 12 billion at the Age shift. However, we have not discovered most Earth area as believed, because 2/3 is undiscovered under the seas. Discovering, exploring and cultivating the water-worlds will require more than an Aquarian Age. Furthermore, real space explorations seem to be taking off and a main component in space is water – mostly frozen though. However, life is seeded, not created on earth which means that comets are potential carriers of lifeforms of any kind, and any planet or moon are possibly seeded too. Most intriguing might be that new rounds of seeding are yet to come and how do we deal with new 'God's creation, - here or in the solar neighborhood. Anyhow, we simply cannot visiting another solar system in the Aquarian Age either, - just send some drones with sensors. (The Theme 'Accidental Genesis 2' is in UU 2012.aug.31 to UU 2012.dec.28)

Humanity grows and is at the state like a 3 years old infant. (UU 2014.april.04) The association is based on the tremendous growths in individuals, the telecom, computing and big-data utilizations. The figure of speech is meant to help ourselves realized that even though we personally might have reached adulthood, - humanity has not and goes through tremendous inner changes we ourselves long ago forgot. Most vital, there are ongoing and upcoming opportunities, challenges and dangers of crucial outcomes. We can, if we will, influence the outcomes. The changes humanity goes through is when an infant's neural system finally is developed, the senses fully connects to the brain and ability to sense, think and response is possible. We adults know it is important what is done and not. The outcomes are influenced on how we help or not. However, there is no adult humanity yet. What to do about that for the millennia to come? A global language that anyone understand is required. Any nation – any school could agree on that and start teaching right now.

Realizing prospect of an Aquarian Testament was a personal mind changer just some days ago. It might be so for others too. The Testament's quality depends highly on the first abstract drafts. Quite understandable, it will take a lot of time and information to think such through. Imagine humanity's state in 3000 AD is necessary to pass halfway. What will be important and not, lies within futurologists and not ambitious rivals of Thrones, States and Temples. There will also be rivalries toward the Aquarians, like there were between Pisceans, Arians and Taureans. Their psychosocial Games might escalate from 4th degree (war) to 5th degree (apocalypse). Elementary acknowledgement of basic human social psychology should be preventions enough to reduce to 3rd degree.

In order to make Testament applicable for 2000 years, there is required futuristic imaginary skills beyond any individual. Reasonable Collective philosophical will might be enabled this century. Such is imagined in the epic saga by Isaac Asimov called 'Foundation' and is called 'Psychohistory'. The hypothesis is that it might be possible to predict the socialpsychological outcomes for large masses over long time, - even though individual psychohistory is impossible. Most fortunately, the Foundation is now to finally be filmed as a TV series on HBO this year. The 5D model was inspired by that science fiction to realize maps of alternative social-political futures and pasts. It is explained in UU 2014.sept.12. It is integrated with the 3[^]3 model (UU 2015.mars.13) that is based on theories of Freud and Jung. It is not fully developed yet and can

of cause be modified to several uses. However, the main purpose is to evaluate false history to find truths and imagine alternative future options.

5D futures and pasts have been issues in UU for years and can be read about of those who search. The 3^3 5D model will be prepared for a separate UU theme called 'The Aquarian Testament'. For now, the most urgent 5D task is to realize GHRL.

Finally, not to forget a basic question for this UU Theme 'Charlie'.

Qui est Charlie? (Who is Charlie?) It is not a person, but a collective conscience (Je suis Charlie). Archetypes are like Chaplin. The social psychology of Charlie was like a childlike Nerd (Id) opposing the Parent (Superior-Ego) in a dual-Game Schlemiel (provocation) - NIGYYSOB (Now I've Got You, You Son Of a Bitch). God damn it.

Do not shoot (or crucify) humanity's messengers – and blame God for it.

That is blasphemy.

Genesis is a favorite band from the youth. I got to know the original band about the period of 'Selling England by the Pound'. This instrumental masterpiece 'After the Ordeal' shows what art-rock is. The title indicates that it is time to heal from the traumas and improve. Do not repeat mistakes too often, - that is idiocy. Do not escalate repeating mistakes – that is pure evil.

Most of the original Genesis albums are now available on YouTube for anyone to enjoy.

Extra UU1

John Foxx is one of the talents that at a point in time falls from his band and starts anew for himself. He was the front figure of Ultravox when the foundation for a breakthrough was made. Then, he wants to do it all by himself, - with real synth sound. He made several impressive pop-rock albums with original music, sound and lyrics. However, he never got the breakthrough he deserved. Then he made a very different double-album called 'Cathedral Oceans'. It sound like meditation music. Frankly – I have not heard it all even though owning a copy. However, as futuristic as he is, - it suits well to the idea of an Aquarian Testament. All we now need are gills, - not wings. I would have put 'An Ocean We Can Breathe' first if there was an ok video and lyrics available.

Extra UU2

SAGA is a Canadian art-rock group that had its break-through in the 80'. The band is most known for the early works where the members showed their special instrumental talents and even sometimes switched instruments with each other. This song is done entirely by the keyboardist, - the playing, the singing and

even the clarinet part. The lyrics is a reminder, - a future peak at our present from our past. The answer is obvious, - yes, there are regrets. We are not collectively suicidal, but want an OK LQ.

Saga - No Regrets (Chapter Five) + Lyrics

Extra UU3

The New Testament is 500 years beyond the Quran. This video shows an ironic way of what has become of some Christian 'Imams' and what can be expected of future Islamism Imams, - Calif wannabe. The person in the video uses Jesus as his product. Some future Imams might use Muhammed as their money and pleasure machine too. Just substitute 'Jesus' with 'Allah' in the lyrics. No surprise - history repeating. It can all be a fishy business, while gone fishing.

Such critics are not blasphemy, but probably heresy towards certain blasphemous theocrats. Such critics are not blasphemy, but probably heresy towards certain blasphemous theocrats.

Genesis - Jesus He Knows Me (1991) + Lyrics
