

## Depeche Mode – Singles Tour 1998

2015.aug.28

Ukens Utvalgte

Temaet Pausemusikk gir nå konserter man gjerne skulle ha sett. Det er selvfølgelig betenkelig med streaming og IPR, men hensikten er at noen forhåpentlig vil støtte artistene og kjøpe deres musikk. Depeche Mode er ofte omtalt i UU og her er deres hit-singler samlet i en Live konsert. Det må være som et eneste stort karaokeshow i ren 'Husker du' -stil. Men en skulle gjerne vært til stede i de tidligste tider, - for den viktigste person forlot bandet allerede etter første album. Vince Clarke var desidert synth guroen som gav bandet sitt fundament. Clark har siden vært 'musikeren' i Yazoo, The Assembly og Erasure, og har samarbeidet med band som Blancmange, Heaven 17 og The Human League. Men han forlot Depeche Mode med begrunnelsen at han fikk «discomfort at the direction the band were taking». Det ble da også markert ved de to senere plate-cover som ble symbolisert med sigd og hammer.

## Depeche Mode- Wrong

2015.aug.28

Extra UU

How to heal the Dane psychiatry? This sincere question rises after seeing the TED Talk 'How do we heal medicine?' The speaker pinpoints some problems, challenges and solutions for the health industry in general. That certainly applies to the Dane psychiatric industry too, - which seems to be trapped in its own rivalries of pre-Freudian obsessions and illusions. A collective organization can conceal, deceive and project, like resourceful psychotic clients can, - especially when it is autocratic, alienated and a major drug supplier. Anyhow the psychiatric diagnostics, - it all should be founded on basic ethics like GCR (Good/Constructive/Right) and not BDW (Bad/Destructive/Wrong).

Some brief points from the TED Talk are: "The health services lack holistic visions and an organization based on LifeQuality (LQ). Doctors rather try to find symptoms that suit their competences than the patient's real needs. The use of coordinated 'check lists' caused reduction of incorrect diagnosis, incorrect treatments, deaths and reduced costs by 1/3. The pharmacy industry manipulates the health personnel and clients by merely publishing positive test-results, - even when the negative ones are more." Moreover, as commonly known, - psychotic and neurotic narcotics, and hypnosis, can cause experiences similar to psychosis." (UU 2014.aug.01) Unprofessional psychiatric diagnoses, mistaking drug-effects and hypnosis for psychosis, do cause faulty cures that can worsen the clients' health.

Seen from a clinical perspective, a psychosocial analysis of the Dane psychiatric industry should be most welcome by the industry itself. However, based on observations, the client-organization rather seems to determinedly resist by deliberately evade qualitative analysis on critical issues. If so, higher authorities should use force in order to reduce its damages on itself and society. Still, some issues are rather of criminology than psychiatry, which indicates that organized crime is involved. Generally, international crimes mainly concerns drugs, money, bondage and weapons (UU 2014.dec.12 and UU 2014.juni.13). Criminal persons and organizations are therefore Game-players per definition, where psychology and psychiatry are merely means in their Games.

Criminal Games are mainly of the category Underworld, but can include categories like Life Games, Marital Games, Party Games, Sexual Games, Consulting Room Games and even Good Games'. These are often mentioned in UU and summarized in UU 2015.mars.06. "Some classic Games are: YDYB (Why Don't You, Yes But), IFWY (If It Weren't For You), WAHM (Why does this Always Happen to Me?), SWYMD (See What You Made Me Do), UGMIT (You Got Me Into This), LHIT (Look How Hard I've Tried), ITHY (I'm Only Trying to Help You), LPAFJ (Let's Pull A Fast one on Joey), NIGYSOB (Now I've Got You, You Son of a Bitch), LYAHF (Let's You and Him Fight), RAPO 'Psychiatry' and 'Courtroom'. A complete list of Berne's classic Games are talked through in his book 'Games People Play' that is now free on the internet. "Some (self-defined) new Games are: DAC&UAC (Devide&Conquer & Unite&Conquer), ISR (It Started with the Retribution), ABD (Attack is the Best Defense), Jante/TUD (The Ugly Duckling), TLM (Two Little Maids), BGGG (Bad Guy, Good Guy), RPPP (Robbing Pete to Pay Paul), ODAB (One's Death – Another's Bread) and the Russian BOOFY (Beat your Own and Others will Fear You). Psychosocial Games are in general described in UU 2014.sept.12.

Nevertheless, the psychocracy is probably amongst the strongest powers of all, - even in civilizations like the Dane. Therefore, the psychocracy should be parliamentary supervised, like bureaucracy and democracy, and regulated to avoid civil damages. However, the very opposite seems to be true. Psychiatric organizations are the most secret, impenetrable and protectionistic of all. Recent public cases are the illegal data-exchange of sensitive info to the drug industries with the DAMD database, the 'brain damaged' psychiatrist that continued prescribing drugs for years with institutional protection and the massive prescription of 'Lykke piller' (Happiness pills) and ADHD pills to minors (UU 2015.juli.03). Furthermore, there are also proof that Danish psychiatry do experiment with unclassified drugs on minors, do alter established psychiatric terminology and do reverse attitudes towards pre-Freudian sexism, - with the opposite gender-antipathy. However, the psychocracy do counterattack, - just like some of its clients. The results speaks for itself, - the psychocracy has become a master of international psychocratic Games.

A diagnosis includes investigation of backgrounds, traumatic events and relations. In previous UUs, the modern psychosocial history stretches over 500 years in the Nordic region, - including Russia. However, such a complex issue can only provide some new discoveries and point of views. A thesis is that the present Dane psychosocial condition was initiated about 1864 with the Throne CdE and following mass-massacre of the previous king's men at the German border. It peaked half a century later in 1914 with a similar procedure to the imperial Throne and following CdE (Coup d' Etat) and mass-massacre of the emperor's men. About 2014, - it has reached another historical shift that should be 5D analyzed with alternative future scenarios (UU 2014.nov.28). Anyways, the hypothesis is that the matriarch obsessions in the psychocratic industry's OverConscience seems to stem from the apocalypse in the Winter Palace, centered around its sole survivor, - princess Dagmar of Denmark, alias Tsarina Maria of Russia. This hypothesis is elaborated based on previous writings, especially UU 2014.dec.19, UU 2014.aug.01, UU 2014.juli.18, UU 2014.jan.10, UU 2013.april.19 and UU 2013.april.12.

To put it brief, there was a fierce rivalry between the widowed tsarina Maria/Dagmar and her German tsarina in law Alexandra. This Game of the Throne was exploited by the Moscow State in a CdE, with help from the occult agent Rasputin. The whole world were eventually dragged into the war-Games, more commonly known as ww1, ww2 and ww3 (coldwar). Russian secret services, historically known as the Oprichnina, last known as KGB and FSB, have most certainly been involved. No doubt that the tsarina was involved in imperial home-affair and most influential to imperial secret services. The serious claims that the young tsarina Alexandra was a German spy, not truly Russian orthodox and sexual unfaithful, were probably main reason for arresting the family and finally executing them. This, and related themes, are comprehensive and not very relevant for this issue. However, the psychosocial talk-through of Norden over a 500 years period starts with UU 2013.Mai.24, continues with UU 2014.mai.02 and continues as a theme from UU 2014.nov.07 to UU 2014.dec.05. Moreover, the psychosocial theory of Superior-Ego and Superior-

ID is explained in UU 2014.jan.10 and UU 2015.mars.13. Still, it should not be surprising any more that Denmark has been in bondage by Russia since the collapse of the Nordic Union 500 years ago.

In psychohistorical views, the psychocratic patriarch vs matriarch Games shifted in early in the 20<sup>th</sup> century, - just prior to ww1. The very fundament of enlightened psychology started with Sigmund Freud, 'the patriarch of psychoanalysis', who used dialogues with the clients. However, one fatal theoretical conclusion was that sexualities (ID) caused envious Electra/Oedipus complexes (child vs parent) and homosexuality (men vs women). The statement was dedicated Freudian psychology that "elimination of clitoral sexuality is a necessary precondition for the development of femininity, since it is immature and masculine in its nature." Such patriarchal sexist psychotic obsession seems occult and did cause major causalities to the democratic civilizations. However, further developments of psychology and psychiatry neutralized such beliefs after ww2. Psychiatry evolved in accordance to human rights and human decency.

Nevertheless, and most alarming, the present Dane psychiatry reverses present psychology toward pre-ww1 level by postulating anti-thesis similar to "a cause to minor's psychotic condition can be due to 'elder men' (not women)". Thereby, the Dane psychiatric industry deliberately propagandizes the collective OverConscience with sexist superstitions. That do initiate rivalries in civil core families causing psychosocial conflicts, traumas and schisms. Such mass-psychotic dogmas suits the description of Games like LYAHF, DAC, and BOOFY. Btw, the divorce-rate in Denmark is beyond average. Furthermore, their listing of 'mania' as causes for psychosis is far too blurry. Such information should at least be specific of what kind of manias are and are not. If so, they should also mention other related prefixes and suffixes. Some examples are mentioned in UU 2015.feb.20 and UU 2013.april.19. "It is possible to make socialpsychological relations and use prefixes like neuro, psyko, sosio, xeno, pedo, 'matro', 'patro' (...). Furthermore, it is possible to substitute the suffix 'cracy' (power) with mania, phobia, patia and philia". With such extended use, the terminology (...) is broadened to (f.ex.) Sophimania, Sophiphobia Sophipatia and Sophiphilia. Terms like Philosophical mania, or Sophimania, indicate the dangers within."

Plato's allegory of the Cave suits the psychocracy in particular. (See video hereunder.) In brief, the tale is that some people are bound in a cave looking at a curtain that reflects 2D grey shadows of the real world outside. They come to descriptions, definitions and conclusions on how the real world must be. However, when a visitor from the real world explains the reality he actually lives in, - there is no understanding, but collective agreement to reject or change the visitor. Taking the allegory to the present, - psychocrates would use drugs, pills or hypnosis, dependent on their dominating regime; Throne, State or Temple. Moreover, using sexist imagination on the cave allegory, some might percept shadows like some male jurassic dino lurking and grumping out there in the reality, - very eager to get the minor back to its natural life.

It was necessary to upgrade and extend the classic Freudian models to organizational levels in order to enable psychosocial analysis. The result is a joint Freud/Jung/Berne model called 3x3. This was further developed to the 3<sup>^</sup>3 (i.e. 3x3x3) model. It is explained and used from UU 2015.juni.05 to UU 2015.juli.24 about the Danish parliamentary election. "The terms are developed from-via-to: Id-Child-Drive, Ego-Adult-Will and Superior Ego-Parent-Belief. A second dimension of conscience is added in order to merge Jung with Freud's 3-state; UnderConscience, Conscience and OverConscience. The third dimension contains of 3 subcategories of Drive, Will and Belief. These are interrelated via the conscience dimension. However, the subcategories are open for adaption and modifications to what is to be analyzed, for example persons, organizations, nations, empires or humanity. Furthermore, the subcategories are related to Game categories too, - which is not directly in the 3<sup>^</sup>3 model. For example, sub-categories for Personal level is; Drive (Sulk, Nerd, Jerk), Belief (Matriarch, Authority, Patriarch), while Parliamentary relates to Will (Legislative, Executive and Judging (LEJ, - or LUD in Danish) and National/Imperial relates to Drive (Throne), Will (State) and Belief (Temple). A combination with collective Game categories were discussed in UU

2015.feb.27, UU 2015.mars.06 and UU 2015.mars.13 where: Drive (RF, AF and WL), Will (KoC, GdE and GoT) and Belief (UNO, WoW and SET).

The 3<sup>^</sup>3 psychosocial model should most certainly be interesting to use for analyzing the Dane psychocracy. However, such complexity of organizations and relations cannot possibly be done here and now. On the other hand, some thoughts might initiate imaginations: At imperial level, it seems that domains of psychocracy are mainly related as Throne/Drugs, State/Pills and Temple/Hypnosis. The past century has been State-dominated which caused criminalization of what their oligarchs cannot patent, - i.e. natural drugs. Furthermore, classic definition of schizophrenia is redefined to not include spirits and demons, but rather include extended terms of other psychosis to keep constant numbers of clients and market shares of pills.

Sexist psychiatry, like the Freudian and the Dane, are not legitimate in democratic civilizations in this century. General conclusions based on gender is unprofessional and should be disqualified as such. However, diagnosing extreme organizations might lead to single out one person that controls the Games, - male or female. As mentioned in UU 2014.dec.19 "One person's psychosis can undoubtedly be propagated to an entirely psychiatric organization – even nations. It is proven in STV documentary 'The woman behind Thomas Quick' (Kvinnan bakom Thomas Quick) that is talked through in UU 2014.juli.18: "The Quick case lost all its fantastic attention with the disclosure that he was no mass murderer at all, but merely a childlike patient with free meals, housing, drugs and hypnosis under the psychiatric matriarch. There seems to be some Oedipus-relations where life-long room service was the reward. "He admitted 39 murders (some in Norway) and was convicted for 8 that he did not even do. No technical evidences and no witnesses have ever linked him to any of the convicted murders. The trials lasted for years and cost 200 million kroner. The murders were made up by a desperate person that lied to get drugs, social relations and attention. He was supported by a cult of psychologists, doctors, police, prosecutors and layers, - that lied just as much, - or even more."

Is such organizational insane manipulation, like indoctrinating false memories, possible in Dane psychiatry too? Most certainly - yes. 'Organized insanity' in S-E/S-I relations for organizations and nations' is talked through in UU 2014.jan.10 and UU 2013.april.12: "The Enneagram/NLP destructive potentials can hardly be worse than in relation to Freud/Berne psychosocial Game-analysis. It can function like a dominating and psychotic Superior-Ego that can transfer its psychosis to the client's S-E, make ID's neurosis and even split its Ego. There are potentials for the whole spectrum of Berne's described Games, - especially LYAHF, NIGYSOB, Debitor, SWYMMMD, Courtroom, LHHIT, Schlemiel, WDYYB, Rapo, Uproar, HDYGOH, LPFOJ, IOTHY and certainly Psychiatry. The destructive results of such Ennea/NLP psychosocial Games in enterprises and governments most certainly gain their rivals and competitors most of all." Furthermore, the DR documentary 'Crimes under hypnosis' (Forbrytelse under Hypnose) and the relation to NLP is mentioned. (See also the related Derren Brown's 'The Assassin'.) Terms like mass-psychosis, brainwash and indoctrination can surely be related to such unsound S-E/S-I relations. Identifications of such ulterior and abstract organizations might be easier with use of metaphoric terms like 'The Psychopathy' and 'The Sociopathy', to relate their activities of mass-psychopathy and mass-sociopathy to the psychosocial Games." (UU 2013.april.19)

A personal outrageous experience is that the Dane doping industry abuses minors for illegal experimenting with enhancing drugs. Illegal sport's drugs are definitely physical and psychological damaging to minors. Proven after-effects are symptoms similar to CBS (Charles Bonnet syndrome) where subconscious images appears in the conscience, which proves that there are damaged neurons in the brain. The crimes were covered up by public servants by blaming the minor for being psychotic. A teacher even suggested a year in psychiatry to 'deal with the demon'. Such Jante-Games are psychological and sociological damaging in itself. Next, the Dane psychiatry prescribed non-approved Asian anti-psychotic drugs named Aripiprazole by

Otsuka Pharmaceutical Company, related to the very same enterprise that produces the famous sports-drink Pocari Sweat. The Dane psychiatrist's analysis of the minor concluded with all the most serious psychiatric terms in the book, a suspicious diagnosis that most certainly will indicate improvements at later time, - whether the drug works or not. However, the illegal psychiatric drug was substituted when the minor occasionally suffered from nose bleedings. These examples are definitely of organized crime towards minors in the public services. Anyhow, there should be no doubt to the seriousness of illegal drug industry in Danish sports, when the world-famous CSC bicycle teams was exposed in the report by 'Anti Doping Danmark, ADD. These drug-related organized international crimes in Danish sports and psychiatry might very well be related.

As initially mentioned, it all comes down to basic ethics of GCR (Good/Constructive/Right) and not BDW (Bad/Destructive/Wrong). This basic system of ethics is explained in UU 2015.juni.26. A main challenge for the democratic civilizations, in relation to occult psychiatry, is first of all to hinder BDW ethics. Unfortunately, international psychocratic crimes are capable to promote BDW by isms, attitudes and ideologies concealed as GCR mass-psychosis. Still in doubt? See Danish videos 'Børn af Christiania (The Children of Christiania)' and 'Fuckr md din hjrne (Fuckng wth your Brn)'.

How to heal the Dane Psychiatry?  
Tear down The Wall.

Depeche Mode is often used in UU, - like later today in the ordinary UU 2015.aug.28 that present a hit-single concert. However, this song 'Wrong' is an ethical anti-thesis BDW (Bad/Destructive/Wrong) and dedicated in particular to the Dane psychocracy. The lyrics is of an unfortunate man that is manipulated to believe that his misfortune is due to superstitious faith. The video shows the real situations and consequences, - quite metaphorical of cause.

### **Extra UU1 - Børn af Christiania**

Just recently, the Dane national TV made a documentary about the drug promoting community right in the center of the capital Copenhagen. There should be no doubt that the Dane authorities are bound and that superior forces overrules Danish objections to the ongoing crimes. There is only one power large enough paralyze Dane authorities in such a way for so long. Overall – this is a testimonial about the state of the legal system, - probably for other major areas too. Follow the money.

The public announcement says about the documentary: "For the first time, the children that grew up in the hippie community Christiania tells how their childhood really was. They confront their parents with the unpleasant experiences and taboos that have been covered up throughout Christiania's history."

The place is previously described in UU 2014.dec.19: "Furthermore, drugs are sold in criminal environments and thereby naturally cause crimes. Hashish is 'doped' with amphetamine and thereby increase the addiction to the most dangerous 'psychotic' drugs. Consequently, there is an unintended interaction between the illegal and legal drug markets. Patients that are introduced to drugs in the legal health-services can get addicted and get contacted by the illegal drug-market thereafter."

### **Extra UU2 - Fuckr md din hjrne**

(DR TV series - Fuckng wth your Brn)

Jan Hellessøe is a Dane expert on psychological manipulation. He has entertained and manipulated the DR audience for half a year with his TV shows. Somehow, this TV series provides awareness about the manipulations that have always been going on in societies, - even in the ancient Egyptian Stone Age civilizations millennia ago.

<https://www.youtube.com/watch?v=2sA3UXonzeo&list=PL3cmvj7EFzEq3wGUEdFAjsQ448CpGAAIk>

<https://www.dr.dk/tv/se/fuckr-med-dn-hjrne/>

Previously mentioned, in UU 2014.dec.19: "The Danish and English hypnotists Jeppe Schjøtz and Derren Brown clearly warn and demonstrate how hypnotic crimes are done. This was summed up in UU 2014.nov.28: "Even hypnosis technics like NLP (Neuro-linguistic programming) suggestions and questioning are used, - in addition to inducing false memories and perceptions. These abuses have escalated and are mentioned in UU 2014.aug.01, UU 2013.april.12 and UU 2011.juli.08. The uses and abuses are far more common than the public realize, simply because the victims do not realize what happens at all. In fact, that is the whole point of NLP and Games. In Denmark, NLP is wide-spread as training programs, also for leaders, in the public and private sector. In politics, such skills can probably be found amongst so-called spin-doctors. NLP is even merged with the occult Enneagram in the so-called 'NLP Huset' in Demark. If still in doubt about NLP, see the Derren Brown videos provided below." All the cases of NLP abuse in Denmark seems not to be included in psychological and psychiatric diagnosis as social causes, - despite all the documentation and warnings from professionals. Consequently there must be a high rate of faulty diagnosis, treatments and violations of HR and LQ."
