

Michael Jackson- Smooth Criminal

2015.okt.16

Ukens Utvalgte

The Dane Parliament (Folketinget) is the sovereign Legislative power that propose, accept or reject national laws and regulations. Its Government ensures the Quality of the Executive and Judicial powers, - whether they do their job or not. Since the quality of LEJ is so critical for Danes, the 3 following UU will analyze the LEJ Quality in order to pinpoint obstacles to Dane cooperation with other European nations in fighting international crime and corruption. Finally, a last UU will conclude why Danes should vote 'Yes please' and not be fooled by 'Smooth Criminals' to reject EUROJUST, EUROPOL and CEPOL.

International criminal organizations are definitely the main enemies to a well-functional Danish Government, Police and Legal system. The ulterior silencing of that obvious fact indicates how manipulated the societies already are. As mentioned in UU 2015.okt.02: "(LEJ) are bound to the Parliamentary principles of 'division of powers' and the 'rule by law', which are maintained by the Police and Legal systems. Most vital to any civilization is their Penalty laws that prevents and removes the most damaging crimes in society. The European nations that signed the International legal agreements of EU, ECHR and UN decades ago should immediately ratify and execute them as national law. However, - political and criminal corruption have certainly been influential and corrupting. Dane LEJ needs strengthening by international cooperation, - in order to maintain their civil democracy."

Parliamentary democracy is fragile and can be naïve. However, democracy is the only way to secure 'common sense' as a political factor in the LEJ System. Without 'common sense', the LEJ powers will sooner or later become alien and unsound, - corrupted and decay, - and finally collapse, - probably in a Coup d'Etat (CdE Game). It might be hard to realize how much hardcore Game players can influence political actors in- and outside the Parliament. However, international criminal organizations can be like mafias of several kinds, - like the Italian mafia, the American mafia, the Russian mafia, Chinese mafia and lots of more. These can be extremely violent, - physiologically, psychologically and even politically. Such do not prioritize Danish democracy, parliamentary or laws, - but are rather anti- such. Therefore, it is necessary for all the democratic citizens to realize that a single nation cannot ever counter-fight international crime, - and should never reject their fellow international crime-fighters. Rejecting such help is surely self-destructive and crime-promoting.

Furthermore "The article 'Political corruption' mentions several types of corruption like; extortion, comradeship, scandalizing, electoral cheating, fraud, 'financial mess', bribery and mafia activities. Global corruptions concern mainly drug-trafficking, human smuggling and whitewashing of money. The annual global political corruption is estimated to be about 1 trillion \$/year, the global GWP is about 70 trillion \$/y and the Norwegian (and Dane) GNP is about 1 trillion Kr/y. This means that the Norwegian (and Dane) political corruption is about 2% of the state's budget, i.e. about 20 milliard kr/y. That suites the thumb-rule that there is an average of 2% disloyal employees (in most firms)." This also include terms like industrial espionage, information thefts, sabotage, pillaging, manipulation, disinformation, prostitution, slavery, narcotics, weapons, robberies, terror, and tax-fraud." Corruption is per psychosocial definition Games, due to the hidden agendas to gain at other's costs. (See the detailed descriptions of Games in UU 2014.sept.12.)

There are sociopolitical model that can uncover some of the 'Underworld' Games at play, - the hardcore Games that hinder the Dane authorities to fight domestic crimes. It is based on the well-known truth that humans are dishonest and ulterior by nature – and that denying that fact merely exposes a Game at play. "A classification counts 34 categories. Bad faith, Barefaced lie, Big lie, Bluffing, Bullshit, Butler lie, Contextual lie, Cover-up, Deflecting, Delusions, Dismissal, Economical with the truth, Exaggeration,

Fabrication, Fib, Fraud, Half-truth, Haystack answer, Honest lie, Jocose lie, Lie-to-children, Lying by omission, Lying in trade, Minimization, Misleading and dissembling, Noble lie, Omission, Pathological lie, Perjury, Polite lie, Puffery, Speaking with forked tongue, Weasel word & White lie. Anyhow, deceptions can be of positive or negative moral and not necessarily ethical rejectable. It is however important to have system of Values like GCR (Good/Constructive/Right) in order, when facing such." (UU 2015.mars.06 and UU 2013.mars.15) This can certainly be analyzed as psychosocial Games as described in UU 2014.sept.12.

This summary of defined Games from UU 2015.aug.28 might be helpful. "Criminal Games are mainly of the category Underworld, but can include categories like Life Games, Marital Games, Party Games, Sexual Games, Consulting Room Games and even Good Games'. These are often mentioned in UU and summarized in UU 2015.mars.06. "Some classic Games are. YDYB (Why Don't You, Yes But), IFWY (If It Weren't For You), WAHM (Why does this Always Happen to Me?), SWYMD (See What You Made Me Do), UGMIT (You Got Me Into This), LHIT (Look How Hard I've Tried), ITHY (I'm Only Trying to Help You), LPAFJ (Let's Pull A Fast one on Joey), NIGYSOB (Now I've Got You, You Son of a Bitch), LYAHF (Let's You and Him Fight), RAPO 'Psychiatry' and 'Courtroom'. A complete list of Berne's classic Games is talked through in his book 'Games People Play' that is now free on the internet. "Some (self-defined) new Games are: DAC&UAC (Devide&Conquer & Unite&Conquer), ISR (It Started with the Retribution), ABD (Attack is the Best Defense), Jante/TUD (The Ugly Duckling), TLM (Two Little Maids), BGGG (Bad Guy, Good Guy), RPPP (Robbing Pete to Pay Paul), ODAB (One's Death – Another's Bread) and the Russian BOOFY (Beat your Own and Others will Fear You), in addition to the new in extra UU 2015.okt.09, PPP Parroting Pravda Propaganda. Psychosocial Games are in general described in UU 2014.sept.12."

The 3D model is another tool to improve the perception of political Games. The 3D political model is a psychosocial version of the traditional 1D political model. It is described in UU 2015.juni.12 for Dane and Nor parties. Originally, 3D was related to the parliamentary fundamentals Throne/State/Temple, but is now rather related to LEJ (Legislative/Executorial/Judicial). "A 3D model gives different perceptions of the political world than today's 1D model. Organizations' names can be misleading. Confusing is that the Dane Venstre (Left) is like the Norwegian Høyre (Right), and that the Dane Radikale Venstre (RV) was a civil (borgerlig) party in Government, while the Norwegian RV (Rød Valgallianse) was a left-extremist failure. Furthermore, the 1D model shows several parties 'in the middle' while the 3D presents more descriptive relations. The Nor SP (Senterpartiet/farmers) is confusing, since it is not in the center of neither 1D, 2D nor 3D. Politically, SP moved from Throne to State and is now bound to State subsidies. KrF (Kristelig Folkeparti) relates more to Throne and State than Temple due to family policies and the State dominated Church (Statskirken). FrP/DF (Fremskrittspartiet/Dansk Folkeparti) was originally Throne oriented, with factions' hard rhetoric of anti-State. Rødt (Red) and EL (Enhedslisten) are extreme State parties that still find civil war 'necessary means' for their CdE (Coup d' Etat) ambitions. National socialists relate, as the name indicates, to State, but became dominated by the next generation, - national communists (after ww2)."

Furthermore, "Political organizations changes over time. It shows in a 4D model, where 3D positions reveals movements over time. Terms like 'conservative' and 'radical' are no longer fixed positions in 3D, but show stillness and movements in 4D. Organizations can even be relatively conservative or radical in timeframes. The organization, not party, LO is one of Norway's most conservative political organization, despite its extremely radical origin. LO's bond to AP (Arbeiderpartiet/Labor) makes it a powerful para-LEJ actor. (UU 2013.sept.20 and UU 2013.aug.23.) On the other hand, conservative organizations of the previous century can be relatively radical now, because they are in opposition instead of position. The 4D model will also show organization that come and go. Relations of short-lived extreme organizations might show as pulsing constants in the 4D model, like the Nor line of NKP, AKP, AKP-ML, RV and Rødt."

Estimates say that ca. 80% of the Dane voters want to stay with Europol. However, 3 parliamentary parties encourage Danes to reject that. Those parties and numbers of MPs are DF (Dansk Folkeparti = 37), LA

(Liberal Alliance = 13) and EL (Enhedslisten = 14). That is 64 MPs out of 179, i.e. 35% of parliamentary votes. This indicates that several MPs already can be corrupted by 'smooth criminals' at the cost of their voters' trust. As mentioned in the introduction UU 2015.okt.02 "This extraordinary Dane referendum can be fatal for any nation in the European continent as well. In a worst-case scenario (5D), Denmark might become a 'Pirate Bay', a 'Kardemomme State', an 'Outlaw Haven' and an 'infected firewall'." "Consequently, it is legal for EUROJUST, EUROPOL and CEPOL to counter-fight criminal manipulations of the upcoming Dane referendum, - while Denmark still has valid treaties with the pan-European authorities.

Therefore, the focus is set on the 3 parties that appears to be manipulated by international crime. The parties were described in UU 2015.juni.12 prior to the 2015 election in Denmark. Some of the following writings of EL and DF are translation of previous Norwegian comments from UU 2015.juni.12. Still, even though clear indications of crimes cannot be proved, some Duck analysis will do for now. I. e. "If it looks like a duck, swims like a duck, and quacks like a duck, then it probably is a duck."

"EL (Enhedslisten) represents another 4D pulse in the constant series from DKP (Danmarks Kommunistiske Parti). DKP's origin is bound to the 21 conditions of the 100 years old Moscow Thesis, with dictatorial state-capitalism, Stalinism and collective assimilation of Dane citizens. EL got their first success as anti-Europeans to the referendum of the EU Maastricht treaty, concerning democratic and anti-oligarchic regulations of the European Internal Market. The dogmatic success made EL an unreliable supporting party to social-democratic (SD) governments. (Later, the anti-European concept was used by Nor SP (Senterpartiet/bondepartiet), but SP did not tell its voters that its origin was similar to Dane EL (DKP/NKP)). EL's main politics are anti-European and they use environmental arguments as veto in the Parliament. EL sometimes threatens to overthrow the Government although they claim to support it. EL influenced SF (Socialistisk Folkeparti) considerably, and gained greatly on SF's loss of voters, after SF promises were proven unrealistic. (The Norwegian SV suffered the same faith in a similar same political Game.) Now, the old Stalinists front-figures are replaced with 'sexy girls' that evade debates about violent CdE and anti-democratic state-capitalism. On the other hand, today, EL is more complex than simple Stalinism, - because they have to please all their political factions like Trotskyism, Maoism and Islamism (UU 2014.juni.13)." EL main argument against EUROJUST, EUROPOL and CEPOL are unrealistic alternative opt-ins. EL plays DAC Games of confusion on the Dane citizens and points to Norwegian useless opt-outs, just like their Norwegian comrades in LO do.

DF (Dansk Folkeparti), on the other hand, is believed to be a Dane civic (borgerlig) party in a traditional 1D political perspective. The 3D and 4D models, however, will reveal that the party is no longer like its origin. This ulterior change is most recently talked through in UU 2015.juni.12. «DF (Dansk Folkeparti) is seemingly on the other side of the red-blue blocks (i.e. outer blue). DF was originally FrP (Fremskridspartiet), but was split in a PROSA-like DAC/UAC Game. Dane oligarchs in the public sector reacted hard on the newcomer's judicial attack on State's abuse of undemocratic dominance. State oligarchs responded by jailing the FrP leader in a questionable tax trial. Later, the FrP secretary divided the party to the matriarchal Dansk Folkeparti (DF). A similar CdE attempt was tried in 1995 at the Nor FrP, with extreme-nationalism similar to Nashi (Наши), the so-called 'Putin Jugend' (UU 2014.nov.14).

Today, Dane DF exposes strong anti-European and anti-Muslimism fundaments, while the Nor FrP dare not talk about EU at all. The differences between Dane DF and Nor FrP was clearly expressed after the terror case in Oslo, where the Stoltenberg Government building was blow up and their youth organization was massacred (UU 2011.aug.05). "After the terror-attack on its Government, The Norwegian parliament agreed to moderate political expression during the national crisis. Then, this Dane 'Tante Jante' in a pre-mature puberty-mentality, dare to criticize Norwegian politicians to "compromise the freedom of speech" and to "be without a political spine". These outbursts did not influence Norwegian policies, - but rather raised questions of what the DF Game is, who is really talking and what the ulterior motives are. Later, the

matriarch leader retired and her most prominent anti-European candidate was exiled to the EU Parliament. However, during Dane national political milestones, the exiled DF candidate appears in Denmark as an over-subsidized propagandist with messages like 'Parroting Putin Propaganda (PPP)'. Slogans like 'More Denmark – less EU' seems also to refer to Denmark as a nova-Russian state (ref UU 2015.juli.24). Recently, the DF campaign against European patent-protection failed, - and did uncover present true bonds for some DF candidates. In relation to the 4D model, both Dane DF and Nor FrP are definitely moving from Throne to State (none-European), - with occasionally CdE attempts. However, a main difference is that Nor FrP joined the Government, while Dane DF disappointed their voters by immaturely rejected the invitation to govern. (That would probably cost a lot of votes if announced before the election.)

LA (Liberal Alliance) surprised a lot when they flipped from accept to reject the Europol/Eurojust opt-ins. That was announced right after the parliamentary election and after rejecting to join the Government. (That would probably cause loss of votes, if announced before the election.) This major 4D shift reveals alternative dominance of unknown origin. LA is no longer like its public image and the reason is secret. However, as for EL and DF, some 'duck testing' might help. One possible reason might be that party is lured to believe that they might gain extra votes like Nor SP, Dane EL and SF by simply propagate 'No' without any intellectual, legal and ethical debate. Anyways, LA now propagates European Free Trade without Legal control of oligarchs, which can cause public and non-public market predators to ruin the democratic markets. Furthermore, LA actually accept Bitcoin as payment for party membership, which definitely associates them to Shanghai-like trade, internet piracy and other illegal market activities. In contrast, LA now demands an in-depth re-investigation of the Government's previous engagement in the 'Middle East'. That used to be EL way to hurt Dane Governments. Such Blame-Games are highly irrelevant for the upcoming referendum and will surely disturb the campaigns and the Government's daily work. LA simply contribute to EL's never-ending CdE Games. Howto expose the new LA Games? As usual, "follow the money", - or rather in this case "follow the Bitcoins".

A major Dane parliamentary Game shift happened when the previous DF leader became President of the Parliament. The following is translated from Norwegian in UU 2015.juli.24. "Now, when the dominant DF matriarch got the post as the president of the Parliament, - the upcoming Games in the Parliament becomes rather predictable. The Dane FrP fell and was divided when someone accused the leader (Glistrup) for tax-fraud, which got him arrested and jailed. DF seems to be managed like a folkschool class with 'real' Danes. (UU 2015.juli.03). It is like a Nashi (Наши) -culture that got a flag like a diagonal Dannebrog. LYAHF and Jante Games needs rivaling opponents, - and there are several aggressive candidates in the new Parliamentary to attack the minority Government. Then, the stage is set for a new-defined matriarchal Game 'Cockfight In the Henhouse' (CIH) from the new 3^3 Game category AF (Animal Farm) (UU 2014.sept.12). Likewise, more Games in the classical category 'Sexual Games' relates to 'A Dollhouse' (UU 2014.sept.12). However, the upcoming Europol Games will be played in all of LEJ, because the Executorial and Judicial powers also do deviate from alternative agendas, - even though illegal.

(Note: Such Games as CiH are from the 3^3 (3x3x3 dimensional) socialpsychological model (UU 2014.sept.12), - a completely redefined categorization of Games. It includes Jungian worlds of humanity's nature that is far from fully explored. However, in brief, the 3^3 Game categories were related to the basic socialpsychological ego-states Drive (previously ID/Child) as AnnimalFarm (AF), WildLife (WL) and RainForest (RF) (UU 2015.feb.27). However, - although the 3^3 Game categories are relevant for societies, the simpler Berne 3D Game categories are more relevant for LEJ Game analysis.)

Michael Jackson needs no introduction, although his image will change after he suddenly altered status from being a living legend. His too early passing has altered the Blame Games from pointing at him to pointing at related, paparazzi and fortune hunters. Actually, the hit 'Billie Jean' was made in defense of the

first RAPO Game charges. He probably did not realize how true this video was to his real life. Michael Jackson was definitely constantly surrendered by Smooth Criminals. Who saw that in time?

Michael Jackson - Smooth Criminal (Michael Jackson's Vision) + Lyrics

During the Norwegian parliament election, there were 3 extra UU about political 'ghosts' in 3 major political parties. The Extra UU 2013.okt.04 talked about Nor FrP and especially the deceased Fridjof Frank Gundersen. He was their legally alibi and highly influential as a backbencher for FrP politics. He was probably the main reason why FrP never was willing to express their true opinion towards Europe and EU. However, - it should not be that hard to realize why and what oligarchic relation hides in the closets.

Extra UU1

It is hard to compresence the conflicts and consequences of organized crime in Europe. The TV-series Crossing Lines gives interesting insight in an entertaining way, - like other criminal TV-series. However, this TV-series is not about Europol and Eurojust, but some similar fictional organizations that fights international crimes in Europe.

The TV series is available on Netflix, - that can be seen free in a months' time.
