

## Sparks / FFS- Johnny Delusional

2015.nov.06

Ukens Utvalgte

This closing UU blog concludes the Dane Europol referendum theme. Surely international criminal organizations fight Dane 'Rule of Law' with hardcore Underworld Games. Ignoring such and believing the ulterior political deceptions, is a final stage of losing oneself as person, organization and nation. However, these UUs concluding views are both political and cultural. In order to suggest 'Howto heal the Dane LEJ powers', the 3D LEJ model is extended to the 3x3D at nations' level. The model is a merged and innovative version of Freud and Jung theories, in addition to theories of LQ (LifeQuality), GUR (ethics) and 5D (scenarios). Nevertheless, this double UU will first provide some summaries of the political view; next present some psychosocial views and finally some overall concluding thoughts.

It is a fact that international Criminals organizations fight Dane 'Rule of Law' with hardcore underworld Games. The introduction in UU 2015.okt.02 elaborated the concern. "There will be an extraordinary Dane vote concerning the European international Police and Judicial co-operation. 'Yes please', is the obvious rational respond for the great majority of civilized Danes. EUROJUST, EUROPOL and CEPOL are essential to protect themselves against the overwhelming international organized crime. However, powerful minorities of international criminal organizations do proactively oppose such hardening of law and order, - obviously. They will most certainly manipulate political campaigns in their cloaked ways. It might even appear as legitimate political oppositions by respected politicians. The outcome might even alter, if unaware of such ongoing psychosocial 'Underworld' Games." The following 3 UU talked through issues concerning the balance of the three constitutional Powers; the Legislative, the Executive and the Judicial powers (LEJ).

The 3D political model, that is the basis for the LEJ model, was introduced to this theme in UU 2015.okt.16. "The 3D model is another tool to improve the perception of political Games. The 3D political model is a psychosocial version of the traditional 1D political model. It is described in UU 2015.juni.12 for Dane and Nor parties. Originally, 3D related to the parliamentary fundamentals Throne/State/Temple, but now rather relates to LEJ (Legislative/Executorial/Judicial). "A 3D model gives different perceptions of the political world than today's 1D model. Organizations' names can be misleading. Confusing is that the Dane Venstre (Left) is like the Norwegian Høyre (Right), and that the Dane Radikale Venstre (RV) was a civil (bourgeoisie/borgere) party in Government, while the Norwegian RV (Rød Valgallianse) was a left-extremist failure. Furthermore, the 1D model shows several parties 'in the middle' while the 3D presents more descriptive relations. The Nor SP (Senterpartiet/farmers) is confusing, since it is not in the center of neither 1D, 2D nor 3D. Politically, SP moved from Throne to State and is now bound to State subsidies. KrF (Kristelig Folkeparti) relates more to Throne and State than Temple due to family policies and the State dominated Church (Statskirken). FrP/DF (Fremskrittspartiet/Dansk Folkeparti) was originally Throne oriented, with factions' hard rhetoric of anti-State. Rødt (Red) and EL (Enhedslisten) are extreme State parties that still find civil war 'necessary means' for their CdE (Coup d'Etat) ambitions. National socialists relate, as the name indicates, to State, but became dominated by the next generation, - national communists (after ww2)."

Furthermore, from the UU 2014.sept.12 about political Games, - here slightly modified to LEJ. "Positioning organization in the 3D model can be done by using coordinates like (x,y,z) for L,E,J (originally: where Throne,State,Temple is (Th,St,Te)). General stereotyping in a scale from -10 to +10 can then have the following positions: Royalists (civilians -bourgeoisie/borgere) (+10,0,0), Republicans (public servants) (0,+10,0), Theocrats (Judges) (0,0,+10), Left-extremists (-10,+10,-10), Right-extremists (+10,-10,-10), religious warriors (-10,-10,+10), UN (+5,+5,+5), hunters/farmers (0,0,0) etc. The size of the 3D item could represent Powers like Influence, money, members, etc. 'Democratic' is rather about general respect for

others and true democrats should be position on all positive scales. Any negative numbers rather reveals bogus organizations that are not what they express." This is certainly not measured for Dane, Nordic or European nations. However, an fair assumption is that the average for LEJ can be set to (+5,+5,+5). However, the focus should not be set on an average, but rather at the extreme negative actors, that drags the quality of LEJ from +10 towards the negative.

Moreover, from UU 2015.okt.16, "Political organizations change over time. It shows in a 4D model, where 3D positions reveals movements over time. Terms like 'conservative' and 'radical' are no longer fixed positions in 3D, but show stillness and movements in 4D. Organizations can even be relatively conservative or radical in timeframes. The organization, not party, LO is one of Norway's most conservative political organization, despite its extremely radical origin. LO's bond to AP (Arbeiderpartiet/Labor) makes it a powerful para-LEJ actor. (UU 2013.sept.20 and UU 2013.aug.23.) On the other hand, conservative organizations of the previous century can be relatively radical now, because they are in opposition instead of position. The 4D model will also show organization that come and go. Relations of short-lived extreme organizations might show as pulsing constants in the 4D model, like the Nor line of NKP, AKP, AKP-ML, RV and Rødt." As mentioned throughout this theme and especially in UU 2013.sept.20 and UU 2013.aug.23, there are powerful para-LEJ organization in Denmark, Norden and probably in all European nations. They are major Game player in national LEJ, since they are highly illegal according to national penalty law. However, the ulterior Moves becomes indirectly apparent during such vital decisions like this Dane referendum concerning European cooperation with EUROJUST, EUROPOL and CEPOL. Para-LEJ politicians uncloaked themselves by public indignation when head of Europol, Rob Wainwright, told some truths about the real consequences of a Dane opt-out from Europol.

The first pillar, the Legislative power (Lovgivende), was discussed in UU 2015.okt.16 to set focus on apparent indications on dysfunctionalities. "Estimates say that ca. 80% of the Dane voters want to stay with Europol. However, 3 parliamentary parties encourage Danes to reject that. Those parties and numbers of MPs are DF (Dansk Folkeparti = 37), LA (Liberal Alliance = 13) and EL (Enhedslisten = 14). That is 64 MPs out of 179, i.e. 35% of parliamentary votes. This indicates that several MPs already can be corrupted by 'smooth criminals' at the cost of their voters' trust. As mentioned in the introduction UU 2015.okt.02 "This extraordinary Dane referendum can be fatal for any nation in the European continent as well. In a worst-case scenario (5D), Denmark might become a 'Pirate Bay', a 'Kardemomme State', an 'Outlaw Haven' and an 'infected firewall'." "Consequently, it is legal for EUROJUST, EUROPOL and CEPOL to counter-fight criminal manipulations of the upcoming Dane referendum, - while Denmark still has valid treaties with the pan-European authorities." For 3D political model, the Dane parties DF, LA and EL are negative toward LEJ and main reasons why the LEJ Quality score is beneath the acceptable for European nations.

The second pillar, the Executive power, (Udøvende) was discussed in UU 2015.okt.23 to set focus on apparent indications on dysfunctionalities. "The Dane Executive power is known as the 'Public Sector'. It is committed to provide products and services to Dane citizen and society as the Parliament and its Government order. A main reason to serious mismanages is obvious, - public servants are rarely investigated and put to trial according to the national penalty law. Some coldwar public servants are 'untouchables' to the Legal system." Furthermore, "The relations in Dane and Nordic societies become far more transparent when knowing the 100 years rise of the Red Mafia and the accordingly corruption of LEJ (Legislative/Executorial/Judicial powers). The public sector has cold war legacies that are not applicable, and even illegal, to this century's Denmark and Europe. The conditions and potentials of the nations are well documented in the OECD report 'Government at a Glance' and the Produktivitetskommissionens rapport (UU 2015.juni.05 and UU 2015.juni.26). Furthermore, Denmark and Norway seem to have some of the same fatal malfunctions in Police and Military as concluded by the Norwegian '22/7 Commissions report'. As talked through in UU 2014.okt.17. "The economic crimes of scandalous public projects and services are mentioned in UU 2013.nov.01. UU 2013.sept.27 describes the basic professional knowledge

about qualitative governing, maintain and innovating public services, - in addition to the massive critique in the 22/7 Commission's report." For 3D political model, the para-LEJ organization LO is negative toward Dane LEJ and main reasons why the LEJ Quality score is beneath the acceptable for European nations.

The third pillar, the Judicial power (Dømmende), was discussed in UU 2015.okt.30 to set focus on apparent indications on dysfunctionalities. "The parliamentary LEJ system (the Legislative/Executorial/Judicial powers) are obliged to Rule by Law. Thereby, it is criminal to cause improper ratification of Parliament's laws and regulations, improper execution in the public sector and improper arbitrating and judging in the courts. In fact, there is no valid argument for such illegalities, like putting the blame on lack of resources, information or money. Those arguments are, however, too often abused in relation to the Judicial system. An alarming indication of critical system faults is that no judge ever seems convicted despite all the criminal scandals in the public sector that the free press expose. Such indications are typical for Mafia organizations too. It indicates that the Judicial cultures can be worse than for public servants in the Executing power". "Confusion and misinterpretations about the legal system reduces the Judicial quality. It can cause punishment of innocents and rewarding of criminals. Such misjudgments are object for national Penalty law, - even for the judges. Clearly, international criminal organizations need to target key-personnel in the legal system to make their business gainful and to avoid penalties." (UU 2015.okt.30.) For 3D political model, rivaling non-European unions are negative toward Dane LEJ and main reasons why the LEJ Quality score is beneath the acceptable for European nations.

"Europe is the cradle of democracy." This dogma is fundamental for any European nation. However, Europe has only 10% of the world's populations, and Denmark merely 0.1%. Therefore, Europe is crucial to humanity and extra hard to defend. The Quality of Lives is as fundamental for democracy, nations and organizations, as for any person. This was talked through in UU 2015.april.10. "20 years ago, there was a realization that LifeQuality (LQ) was probably the most important word for any human. Consequently, it should be for human religion too. The LQ UU theme was blogged weekly for a year and developed to 4 sub-themes: 'Basic theory' (from UU 2013.feb.01), 'Empires' (UU 2013.mai.03), 'National', (UU 2013.aug.09) and 'Meta' (UU 2013.nov.08). The final definition is in UU 2014.okt.17: "LifeQuality is defined as: A person's totality of properties and potentials to satisfy stated and implied needs." "Maslow's Hierarchy of Needs shows 5 main categories; Physical, Safety, Social, Respect and Self-realization." The 'stated needs' are similar to the 'Human Rights'. "The 193 UN member-states are obligated to secure their citizens' rights concerning; private properties, self-determination, security, privacy, family, work, education, in addition to freedoms of thought, conscience, religion, expression and more." Unfortunately, and evidently, anti-democratic nations opposes the Human Rights and Needs, sometimes aggressively with conning Underworld Games. Their need for self-defense is obvious, - even though opponents denies such existence, motives and actions.

The most evident anti-European thesis is 'the Moscow-thesis', 'the International' – 'the 3rd Comintern'. "It was initiated with Lenin and the first European ww1, executed by Stalin and the second European ww2 and continued through the 50 years of coldwar towards European nations. The now published 21 Conditions proves the international crimes towards European (and American) parliamentary nations. "C1 In the columns of the press, at public meetings, in the trades unions, in the co-operatives – wherever the members of the Communist International can gain admittance – it is necessary to brand not only the bourgeoisie (civilians/borgere) but also its helpers, the reformists of every shade, systematically and pitilessly." "C3 "In almost every country in Europe and America the class struggle is entering the phase of civil war. Under such conditions, the communists can place no trust in bourgeois legality. They have the obligation of setting up a parallel organizational apparatus, which, at the decisive moment, can assist the party to do its duty to the revolution (CdE Game). In every country where a state of siege or emergency laws deprive the communists of the opportunity of carrying on all their work legally, it is absolutely necessary to combine legal and illegal activity." (UU 2015.okt.30.)

The imperial sociopathic process was talked through in UU 2014.okt.31. "The Man of Steel / Stalin, alias Ioseb Besarionis je Jūgašvili, was originally a local mafia boss in Caucasus that advanced to the chief of operations to the Bolsheviks. They financed the organization with bank robberies, kidnapping, extortions and murders. He was imprisoned and sent to Siberia seven times but was always set free. He had no military background and did not serve in WW1. The need for better reputations was arranged by starting the newspaper Pravda (Truth). Next he took the nickname Stalin (Man of Steel) to propagate himself and his organization. Lenin said that Stalin was the right person to operate Soviet and posted him as general secretary. Soon Lenin got stroke and had to resign. Stalin continued Lenin's merits with 10 times the execution of own citizens. Stalin simply made Moscow a mafia empire. Nevertheless, Stalin is now a 'patriarch of mass-psychopathy'." UU 2014.juni.06. These genocides of tens of millions of their own citizens were presumably simply to ensure loyalty to the new State regime instead of the previous Throne regime as part of the CdE Game. Brute logic might be that killing and brutalizing is most effective. However terminating the previous elite is like lobotomizing oneself as a society. The retardation and traumas take centuries to psycho-socially heal, - if ever possible at all."

This 100 years imperial war towards European democratic citizens has far from ended. In fact, historically, the origin of this manic obsession can be traced to the first Roma (Roma1) and beyond. As summarized in UU 2015.okt.09. "Even lesser known is the cultural legacy Moscow think it has to Roma2 and those rivalries in the region - UU 2015.mars.27: "It helps to understand Roma3/Moscow and its heritage from Roma2 with understanding of the theocratic history. The following (one out of) three paragraphs provides translated summaries from UU 2014.april.25. "There was a highly questionable constitution of Rome3 based on a monk's statement (UU 2014.mai.02)." Furthermore, "The crusades (of Roma2) were first arranged with Roma1 State soldiers. European Thrones supported them, when the Muslim caliphate conquered Egypt, Jerusalem, Syria and other important middle-eastern regions. However, the fourth crusade was fatal. Some 'pirates of the fourth crusade' (P4C) attacked the Christian Roma2 instead of the Muslim Egypt. Roma2 was plundered to ruins and could not rise again under the following chaos. The crusaders failed to administrate the city so decay and the final fall was unavoidable. The crusaders' actions and faiths are full of mystical Games. However, they might have known about Marco's tales and seen the coming Muslim/Mongol invasion, - or simply did the preparations. They might have wanted to save treasures and spread them to European temples and thrones prior to the joint Khan/Caliph attack. The 'Da Vinci Code' is merely one example of some dramatic Games at play." (UU 2014.april.25) The pirates handed over the coat of Arms of Roma2, 'the double headed eagle' to Moscow, a monk declared Moscow as the 3rd Roma and Ivan was titled Tsar/Caesar. The Duchy of Moscow grew rapidly by systematic invasions, tax and terror." That legacy seems to be a recurring obsession to Moscow. However, in 3x3 social-psychiatric terms, the obsession has rather properties like mass-psychosis.

However, yet again, such comprehensive model as 3^3D should not fully be used in such limited psychosocial issue as the ongoing Dane LEJ yes/no referendum. The focus is therefore set on 3x3D imperial S-E/S-I obsessions and the psychosocial damaging dysfunctions to itself and the related. As mentioned in UU 2014.okt.31 about the first realization when the S-E/S-I relation was discovered. "Finally how the idea Superior-ID became: "The Oprichnina/Praetor is like a definition of psycho-social Games. The Actors and the Games are ulterior and concealed like the very nature of secret services. It is however, a problem if the democratic Quality of Life is not respected. It is serious if the organization consider itself as a Superior-Ego and individual as inferior. It is catastrophic, if it also inherited the properties of Ivan's murky mentality as a collective obsession." The theory of Superior-Id is talked through in UU 2014.jan.10 and the OD (OverConscience Drive) in UU 2014.aug.22." Furthermore, "Ivan (the terrible) attacked the Baltic region brutally. The nations responded with raids, invasions and blockades. The Polish, Lithuanians, Swedes, Dutch and Germans were together in the resistance. Ivan accused that Novgorod could end up being catholic in a polish/Lithuanian alliance. The claim has no documented validation though. Roma3's final annexations by

Ivan and Oprichnina was terrible and led to the 'Novgorod massacre' in 1570. This also terminated the trade-route between the Baltic sea, Kiev and the Black Sea/Roma2." (UU 2014.mai.02 & UU 2014.nov.21.) In a psychosocial sense, the Moscow thesis is a destructive Superior-Ego, - and the European world wars and the Russian Patriarch wars are evidences.

The 100 years old Red Mafia was presented in a video-documentary in extra UU 2015.okt.23. The global Olicracy is founded on brutal mass-assimilations of Throne servants by the CdE State regime, the created the Thieves worlds in Gulag Camps that climaxed in the so-called Bitch Wars. The Gulag colonialization programs have deployed the anti-democratic cultures in order to deploy the Comintern conditions for CdE in European and American democracies throughout the 50 years of cold war. This hypothesis goes along with the hypothesis about PROSA, GRAF and GRU, as talked through in UU 2015.okt.09. Its Gimmick is basically an Underworld version of the classic NIGYSOB (Now I've Got You, You Son of a Bitch), and related classical games like Schlemiel, IFWY (If It Weren't For You), WAHM (Why does this Always Happen to Me?), SWYMD (See What You Made Me Do), UGMIT (You Got Me Into This), LHIT (Look How Hard I've Tried), ITHY (I'm Only Trying to Help You), LPAFJ (Let's Pull A Fast one on Joey), LYAHF (Let's You and Him Fight), RAPO 'Psychiatry' and 'Courtroom'. "Some (self-defined) new Games are: DAC&UAC (Devide&Conquer & Unite&Conquer), ISR (It Started with the Retribution), ABD (Attack is the Best Defense), Jante/TUD (The Ugly Duckling), TLM (Two Little Maids), BGGG (Bad Guy, Good Guy), RPPP (Robbing Pete to Pay Paul), ODAB (One's Death – Another's Bread) and the Russian BOOFY (Beat your Own and Others will Fear You) (UU 2014.sept.12.) In In a psychosocial sense, the Gulag is a destructive Superior-ID, - and the European world wars and the Russian Patriarch wars are evidences.

The development of the 3<sup>rd</sup> dimension, from 3x3D to 3<sup>^</sup>3D, came when realizing that there has to be a Jungian S-I like there is a Freudian S-E. The following paragraphs summaries of the relations between the 3<sup>^</sup>3D socialpsychological model and the 3x3D political LEJ model, i.e. Judicial power in UU 2015.okt.30, Executive power in UU 2015.okt.23 and Legislative power in UU 2015.okt.16.

(The Judicial dimension) As mentioned in UU 2015.mars.13. "The Belief dimension of the 3x3 model is different from Drive and Will. Freud and Jung called it 'Superior-Ego', while Berne called it 'Parent'. Belief concerns ideas of what we cannot possibly fully understand, yet need to know and trust. Here, focus is set on Belief in Supremacies like the S-E. The Superior-ID (S-I/Drive) was included 2 years ago. Now, the Superior-Devine (S-D/Belief), a new and third subcategory, is included to complete the model. However, ( ... ), the (previous) 3x3 model has become a 3<sup>^</sup>3 model, i.e. 3x3x3, because of the 3x subcategories in Drive, Will and Belief." Furthermore, "The Supremacy dimension is based on Freud's classical psychological 'ego-state' Superior-Ego, - i.e. any overruling of human Will and Drive. It is hereby sub-categorized into S-I (Superior-ID), S-E (Superior-Ego) and S-D (Superior-Devine) in order to suite the 3<sup>^</sup>3 psychosocial model. It does not concern theological or philosophical question of whether long gone ancestors, gods or other divinities exist, - but concerns the belief in, or denial of, such. Psychologically, it is valid since no one can deny the existence and importance of believes, - religious or not. Yet, subcategorizations of Belief cannot be as concrete as for Will or Drive, - like tangible terms on does not describe the intangible well. Besides, the values of Good/Use/Right (GUR) and Throne/State/Temple (Th/St/Te) are still relevant and is re-vitalized in this sense." Furthermore "As mentioned in UU 2015.mars.13, the new 3<sup>^</sup>3 social (GAME) sub-categories for the ego-state Belief are: UNO (Universal Natural Order) a UB (UnderConscience Belief) sub-category of Drive that relates to S-I (Superior-ID). WoW (Well of Wisdom) a CB (Conscience Belief) subcategory and related to CW (Conscience Will). SET (Supreme Extra Terrestrial) an OB (OverConscience Belief) sub-category of Belief that relates to S-D (Superior-Devine)." (UU 2015.april.03)

(The Executive Dimension) Furthermore "More relevant for this UU's Executive LEJ dimension is the next psychosocial 'Will' dimension. As initially explained in UU 2015.mars.06: "The merged 3x3 Game model does mostly apply to the social ego-state 'Will'. Freud and Jung call it 'Ego', but Eric Bern called it 'Adult'.

This UU sets focus on three social Game categories of Will, namely KoC (King of the Castle), CdE (Coup d'Etat) and GoT (Games of Temples). Such a large theme needs an archetype to grasp the idea, - a simple stereotype like Napoleon. The main reason to focus on Games is the simple truth that everyone lies and deceives. This reality is underestimated and have serious consequences, - as the Charlie incident in Paris showed." However, the most relevant Game category is rather called GdE (Games d'Etat) that includes CdE and all the pre- and post-games related. (In relation to this second psychoanalysis of Dane LEJ, the 3^3 Game categories should rather be related as: KoC – relates to the Parliament and Government and all the games in there. (UU 2015.okt.16) GdE – relates to the public sector that has been talked through in this UU. GoT – relates to all the believes, especially Platonic beliefs in the State and related isms. ('Isms' are talked through in UU 2013.nov.29.)

(The Legislative dimension) "Such Games as CiH (Cockfight In the Henhouse) are from the 3^3 (3x3x3 dimensional) socialpsychological model (UU 2014.sept.12), - a completely redefined categorization of Games. It includes Jungian worlds of humanity's nature that is far from fully explored. However, in brief, the 3^3 Game categories were related to the basic socialpsychological ego-states Drive (previously ID/Child) as AnnimalFarm (AF), WildLife (WL) and RainForest (RF) (UU 2015.feb.27). However, - although the 3^3 Game categories are relevant for societies, the simpler Berne 3D Game categories are more relevant for LEJ Game analysis." Nevertheless, Drive is very relevant for the Red Mafia. The Gulag colonialization programs has been a breeder for Red Mafia cultures and become a global S-I in every European and American nations and states (ref. the Comintern's 21 conditions).

Then, the main question is; How-to Heal LEJ? The challenge has several resemblance to the Extra UU 2015.aug.28. "How to heal the Dane psychiatry? This sincere question rises after seeing the TED Talk 'How do we heal medicine?' The speaker pinpoints some problems, challenges and solutions for the health industry in general. That certainly applies to the Dane psychiatric industry too, - which seems to be trapped in its own rivalries of pre-Freudian obsessions and illusions. A collective organization can conceal, deceive and project, like resourceful psychotic clients can, - especially when it is autocratic, alienated and a major drug supplier. Anyhow the psychiatric diagnostics, - it all should be founded on basic ethics like GCR (Good/Constructive/Right) and not BDW (Bad/Destructive/Wrong)."

Furthermore, "It was necessary to upgrade and extend the classic Freudian models to organizational levels in order to enable psychosocial analysis. The result is a joint Freud/Jung/Berne model called 3x3. This was further developed to the 3^3 (i.e. 3x3x3) model. It is explained and used from UU 2015.juni.05 to UU 2015.juli.24 about the Danish parliamentary election. "The terms are developed from-via-to: Id-Child-Drive, Ego-Adult-Will and Superior Ego-Parent-Belief. A second dimension of conscience is added in order to merge Jung with Freud's 3-state; UnderConscience, Conscience and OverConscience. The third dimension contains of 3 subcategories of Drive, Will and Belief. These are interrelated via the conscience dimension. However, the subcategories are open for adaption and modifications to what is to be analyzed, for example persons, organizations, nations, empires or humanity. Furthermore, the subcategories are related to Game categories too, - which is not directly in the 3^3 model. For example, sub-categories for Personal level is; Drive (Sulk, Nerd, Jerk), Belief (Matriarch, Authority, Patriarch), while Parliamentary relates to Will (Legislative, Executive and Judging (LEJ, - or LUD in Danish) and National/Imperial relates to Drive (Throne), Will (State) and Belief (Temple). A combination with collective Game categories were discussed in UU 2015.feb.27, UU 2015.mars.06 and UU 2015.mars.13 where: Drive (RF, AF and WL), Will (KoC, GdE and GoT) and Belief (UNO, WoW and SET)." However, the 3^3 model is too extensive to fully analyze Dan LEJ for this simple yes/no referendum. Some simple analysis will conclude this theme. It would however, be highly useful tool in the aftermaths order to heal Dane LEJ, like the suggestions on Howto heal Dane psychiatry in the Extra UU 2015.aug.28.

Concerning organizational health. "Is such organizational insane manipulation, like indoctrinating false memories, possible in Dane psychiatry too? Most certainly - yes. 'Organized insanity' in S-E/S-I relations for organizations and nations' is talked through in UU 2014.jan.10 and UU 2013.april.12: "It can function like a dominating and psychotic Superior-Ego that can transfer its psychosis to the client's S-E, make ID's neurosis and even split its Ego. There are potentials for the whole spectrum of Berne's described Games, - especially LYAHF, NIGYSOB, Debitor, SWYMMD, Courtroom, LHHIT, Schlemiel, WDYYB, Rapo, Uproar, HDYGOH, LPFOJ, IOTHY and certainly Psychiatry." Furthermore "Terms like mass-psychosis, brainwash and indoctrination can surely be related to such unsound S-E/S-I relations. Identifications of such ulterior and abstract organizations might be easier with use of metaphoric terms like 'The Psychopathy' and 'The Sociopathy', to relate their activities of mass-psychopathy and mass-sociopathy to the psychosocial Games." (UU 2013.april.19)"

Concerning obsessive S-E/S-I domination. "A diagnosis includes investigation of backgrounds, traumatic events and relations. In previous UUs, the modern psychosocial history stretches over 500 years in the Nordic region, - including Russia. However, such a complex issue can only provide some new discoveries and point of views. A thesis is that the present Dane psychosocial condition was initiated about 1864 with the Throne CdE and following mass-massacre of the previous king's men at the German border. It peaked half a century later in 1914 with a similar procedure to the imperial Throne and following CdE (Coup d' Etat) and mass-massacre of the emperor's men. About 2014, - it has reached another historical shift that should be 5D analyzed with alternative future scenarios (UU 2014.nov.28). Anyways, the hypothesis is that the matriarch obsessions in the psychocratic industry's OverConscience seems to stem from the apocalypse in the Winter Palace, centered around its sole survivor, - princess Dagmar of Denmark, alias Tsarina Maria of Russia. This hypothesis is elaborated based on previous writings, especially UU 2014.dec.19, UU 2014.aug.01, UU 2014.juli.18, UU 2014.jan.10, UU 2013.april.19 and UU 2013.april.12."

Furthermore, from UU 2014.dec.19 "The S-E/S-I theories of organizations can even be lifted to Global levels during centuries. The most outstanding example is the CdE Game in the Winter Palace in 1914, - the Dagmar Syndrome. It started as a simple TLM/(TOL) Game between the rivalling tsarinas from Germany and Denmark. This is the ultimate example that cloaking of ulterior Games can lead to unlimited cascades of misdeeds and mischiefs, - like a snowball can cause an avalanche, - like a match can cause a forest fire and like the shot in Sarajevo. Here is a translated part of the talk-through in UU 2014.mai.30: "'Dagmar's last meeting with Rasputin' is the association to this UU. The title of the song is 'Messiah Ward' (which hints to an asylum). In other words, this will be another point of view on 1914, EW1/WW1 and the rest of that century. With hindsight, it is easier to see the moves of the Games, the players and the motives, - and who really lost and won. The overall plot should be clear after 100 years; (a CdE Game) to convert Roma3 from Throne/Temple in St. Petersburg to State in Moscow." There are far less costly ways to do so."

Basic philosophies about self-realization applies to organizations as well as persons. "Plato's allegory of the Cave suits the psychocracy in particular. (See video hereunder.) In brief, the tale is that some people are bond in a cave looking at a curtain that reflects 2D grey shadows of the real world outside. They come to descriptions, definitions and conclusions on how the real world must be. However, when a visitor from the real world explains the reality he actually lives in, - there is no understanding, but collective agreement to reject or change the visitor. Taking the allegory to the present, - psychocrates would use drugs, pills or hypnosis, dependent on their dominating regime; Throne, State or Temple." "The 3^3 psychosocial model should most certainly be interesting to use for analyzing the Dane psychocracy. However, such complexity of organizations and relations cannot possibly be done here and now. On the other hand, some thoughts might initiate imaginations: At imperial level, it seems that domains of psychocracy are mainly related as Throne/Drugs, State/Pills and Temple/Hypnosis. The past century has been State-dominated which caused criminalization of what their oligarchs cannot patent, - i.e. natural drugs. Furthermore, classic definition of schizophrenia is redefined to not include spirits and demons, but rather include extended terms of other

psychosis to keep constant numbers of clients and market shares of pills.” These issues are related to the 3<sup>^</sup>3 Game category Drive RF (Rain Forrest), though, that involves the unknown nature’s influences. It is not considered relevant for this Yes/No LEJ analysis.

LEJ is about the Laws, - and Laws are like some societies’ Operating System. It is practically not any harder to upgrade national Laws than organizational operating system. Obstacles are mostly due to destructive Games by political and commercial actors with alternative agendas. To elaborate that, the following is translated from the necrology written to Jon Bing in UU 2014.jan.24 b. “As Lovdata writes: “Jon Bing will be remembered for a lot in the Norwegian society. He will always be remembered as the visionary ‘Rettsinformatikeren’ (Rights-informatician) and ‘teknologijuristen’ (techno-lawyer), had imagination far beyond what we ever could.” Hopefully, the judicial environment will in time realize that laws and regulations are not any different from being society’s operating system (OS) and should be revised and upgraded just as effectively when required. Anti-democrats’ phobic relation to the Human Right Law (Menneskerettsloven) shall not be dominating in democracies. Bing’s book ‘Personvern i fare’ (‘Persons’ protection in danger’) provided highly visionary alerts about tendencies in IT & Tele, like the ‘electronic traces’ that can be misinterpreted and abused against innocents. This is, by the way, is the basic idea to UU themes like LifeQuality, Games and 3<sup>^</sup>3D.” Bing’s visions certainly emphasized the importance of making the social Superior Egos sound before destructive paths becomes irreversible.

Furthermore, as mentioned in UU 2015.okt.23, Sweden exposed a most alarming manipulating GdE Game that probably had been going on for decades in the Dane society’s ‘neuro-system’. “Dane crises in the Executive power shows different indications. This was mentioned in UU 2014.nov.28: “The massive cybercrimes against the Police, Military, Tax-authorities Public health in CSC Denmark and IBM mainframes were executed by disloyal employees, remote computers in Pirate Bay and controlled from Asia. The delays in police investigation indicate massive organized crimes that also include employees in the Danish police force. Therefore, it is simply beyond any nativity to claim that this major operation was organized by two young sociopaths.” “Most alarming is the extensive use of the hackers’ favorite operating system - Linux. Anyhow, the ongoing trial in Denmark is most probably just the tip of an iceberg in all of the public sectors in all NATO nations.” Furthermore as mentioned in UU 2014.dec.12 “Most alarming is the recent take-over of all IBM Intel Server in all NATO nations public and private sectors. (See UU 2014.nov.28.) Big Blue made Big Red by handing over the needed resources, network, servers and technology to execute considerable IT hacking, espionage, and info/money manipulations.” NATO nations’ public sectors do not seem to realize that most of their main IT systems are now legally in Chinese control too.” Dane public IT shows serious indications that the social Superior Egos is on a destructive paths that might become irreversible. The whole LEJ might be involved.

It is most crucial to realize the sociopathic warlike 4<sup>th</sup> degree Games going on in the national IT & Tele enterprises, public ones as well as commercial ones. There are also evidently indications that Nor Tele sector is as abused as the Dane IT sector. Despite serious warnings from NATO allied, Telenor has let the Chinese anti-NATO Huawei massive installations of G4 mobile network. The equipment has all capacities for illegal monitoring, manipulation and other foreign secret services. When established, a concerned newspaper hired an independent security company that registered most serious unregistered monitoring of mobile communications in governmental, financial and industrial centers in the capital Oslo. The head of PST (Norwegian secret service, like Dane PET) denied any illegal activity and closed the case in 6 months. However, now the government has allocated 12 million Kr to fight illegal mobile monitoring. Now, a major corruption case causes major political scandals. The Telenor related company Vimpelton has been involved in heavy corruption in Uzbekistan for years. Nor Telenor and Dane TDC are apparently competitors in Denmark, but very close in reality. (See related links below.) This close relation TDC/Telenor relations to anti-NATO actors concerns America as well as European nations, - just like the Moscow thesis does.

Unsound psychosocial neuro-systems, like some S-E/S-I relations, might be on destructive paths that might become irreversible.

Some final meta-philosophy concerning the humanity and its LQ (LifeQuality) is taken from UU 2014.aug.22 and UU 2014.dec.19 ('Waterboys – The Whole of the Moon'): "Parasites cause another alarming manipulation of the UnderConscience Drive (UD). It sounds more fantastic than hypnosis. However, to get the idea, it is recommended to see the TED video 'Ed Yong: 'Suicidal crickets, zombie roaches and other parasite tales'. It shows that collective synchronicity amongst animals are not always motivated by interpersonal socializations. In certain occasions, their UD is controlled by physical parasites that uses the hosts against their own good and to the parasites' gain. In any case, - such similar psychic activities for collective remote control of group synchronizations is certainly the situation documented in the previous century as so-called political 'folks' movements'."

Furthermore: "Theories of parasite activities can thereby cause rather intriguing thoughts in relation to IT (Information Technology). Data-viruses are well known and people show strong addictions to the net and all kinds of IT equipment. It is of course quite natural according to Carl Jung's theories about social dependencies. How frustrating it is when the net is unavailable for the mobile, PC and TV. However, there can be more than simple data viruses that manipulate the information. Uncritical utilizations can cause manipulations of persons similar to hypnotic states and parasite activities. That might change the behavior unconsciously and against a person's will. Furthermore, biological IT implants are highly unusual – till now. But people have great tendencies towards self-medicating with psychotic drugs to alter the UnderConscience. Therefore, 'hypnotic' 'parasites' might be used as willingly if it becomes an option. IT dictionaries should include a new term 'data-parasite' in addition to 'data-virus'." Although not directly relevant for the yes/no referendum, - it is highly relevant for in-depth analysis of national political cultures thereafter.

"Nevertheless, the TED talk 'Dan Dennett: Dangerous memes' puts the concern at a more cautious perspective than 'Ed Yong. The term 'memes' suits very well the theories of T.A., where any communication can be extracted to a minimum and cleansed for noise. It is like using digital technics and data analysis, in order to analyze the real meanings and communications. Similarly, there can be made M.A. (Memes Analysis) which can be used to analyze the real meanings and communications of ideologies and isms. (See UU 2013.nov.29 about isms). However, summing up Dan's concerns of dangerous memes, - he uses Ed's example of parasite controlled ants' brains, and continues: "Humans is the only specie that are willing to sacrifice their lives (and take others') for ideas, values, isms, religions etc. These are replicated and spread from person to person like software or viruses. There are well documented events in human history that such ideas have caused great misdeeds and miseries for humanity, - intended or not. We should be more aware about the dangerous memes now, in the global information technological age, because such dangerous memes can spread like computer viruses via internet and cause fatal harm. However, like it is pointless to hate HIV, - it is pointless to hate certain memes. We need to focus on understanding in order to find remedies, cures and immunities, - and simply figure out how to live with it without causing global psychotic-neurotic mass-reactions at S-E/S-I level – again and again." A most primitive such 'dangerous memes' is certainly the Red Flag that deliberately was made to provoke collective instinct subconscious like a bull in bullfighting.

A final suggestion to 3x3D political LEJ level in UU 2015.juni.19 is translated from Norwegian. "The challenges are at the fundamental level. The Parliaments should agree on solutions to normalize society by comprehensive detachment from the coldwar collective obsessions and bondages. Thereby, the main challenge for any democratic parliament is to find together, promote democracy by uncovering and fight any anti-democratic Games. Consequently, focus should be set on 3 primary goals. Democrats should find together against anti-democrats despite any kind of party or ism. Parliamentarians should promote

parliamentarism, even if it means judicial penalty consequences for anti-parliamentarians. The governments shall govern the Executive powers, - and not the opposite like some para-governments. The terror-cases in both Copenhagen and Oslo should be sufficient warning signals. Open communication and cooperation should help both parliaments considerably.”

Sparks is a favorite band from my youth. The American duo consists of the two brothers Ron and Russel. Their music has often intelligent, sophisticated and biting text and a personal theatrical performance with stereotypical contrasts between the two very different brothers. They got great success and cult status in several countries. They left their band-concept in the late 70s and renewed as a newwave/synth duo with the cooperation with George Moroder. They have change their stiles and performance and been in front of the modern artful pop music. They have influenced other band and artists like Kurt Cobain, Cait Brennan, Dax Riggs, Franz Ferdinand, Morrissey, Arcade Fire, MGMT, Sonic Youth, Panda Bear, Ramones, Duran Duran, Björk, Depeche Mode, New Order, Def Leppard, Faith No More, Pixies, Ween, Will Sheff of Okkervil River, Mark Burgess of The Chameleons, The Human League, ABBA, Paul McCartney of They Might Be Giants. Personally, I would add Erasure, Petshop Boys, Eurythmics, Underworld, and lots of 'boys bands' and most in the DJ genre.

FFS (Franz Ferdinand and Sparks) is a merged super group formed by Scottish indie rock band Franz Ferdinand and American rock-pop band Sparks. The group's eponymous debut studio album in 2014. Sparks played in Copenhagen Tivoli with FF this summer after 20 year of absence. Sparks is recently presented in UU 2015.aug.07 and in UU 2011juni.03 as a critique to the Copenhagen environment conference in 2011. The association to 'Johnny Delusional' is related to the fact that human qualities like love and hate, mania and phobia, seems insane and irrelevant for nerdy psychiatrists. Unfortunately, LEJ, seems to suffer from the very same delusional lack of empathic qualities.

### **Extra UU1 - True Faith**

This double-UU consists of a political and a social part. This video 'True Faith' by 'New Order' represents the political part. The video is by the French choreographer Philippe Decouflé that is most famous for the spectacular OL ceremony in Paris in 1992. In this UU relation, the video is a brilliant artistic presentation of LEJ dysfunctionalities. The surrealist video provides ideas of bad management based on bad T.A (psychosocial Transaction Analysis).

Two opponents start out by beating each other, which is as intelligent as if they were beating themselves. That goes for parliamentary rivalries Games like CiH as well. There is a supervisor, an analytic a controller, a communicator and a task force. However, - after its all over, they must be left with a single question, - what happened? (This video is previously presented in UU 2013.mars.22.)

### **Extra UU2 - Foundation – Trailer**

I must have been slightly influenced by the masterpiece Foundation, - like so many other. The story concerns the collapse of an empire and how exiled psychohistorians influence events to minimize the damages. Starwars is a simply spin-off of this epic saga 'Foundation', like Terminator is a spin-off of Battlestar Galactica, - that is a spin-off of Starwars. Isaac Asimov was probably influence by his own history, since his family escaped Russia during the SU CdE in 1914 and he grew up in US.

As mentioned in UU 2015.april.10 "(The creation of the Foundation series) required futuristic imaginary skills beyond other individuals. Reasonable collective philosophical abilities might be enabled this century (with the global IT & Tele resources). Such is imagined in the epic saga by Isaac Asimov called 'Foundation' that concerns what is called 'Psychohistory'. The hypothesis is that it might be possible to predict the socialpsychological outcomes for large masses over long time, - even though individual psychohistory is impossible to predict. Most fortunately, the Foundation is now to finally to be filmed as a TV series on HBO this year.

The 5D model was inspired by that science fiction to realize maps of alternative social-political futures and pasts. The model is explained in UU 2014.sept.12. It is integrated with the 3^3 model (UU 2015.mars.13) and is based on theories of Freud and Jung. It is not fully developed yet though and can of cause be modified to several uses. However, the main purpose is to evaluate false history to find truths and imagine alternative future options."
